THREE class options to explore one multi-disciplinary degree

The Profession and Practice in Parks, Recreation, and Tourism Management (PRTM 2000)
Explore the history and development of the profession, including professional organizations, current issues and trends, ethical principles and professionalism and professional competencies and development.

Impacts of Technology and Science in the Context of Play, Recreation and Tourism (PRTM 2110)
Learn how science and technology impact how people play, recreate and travel, while also examining the relationship among society, technology, and tourism and recreation.

Introduction to Sport Management (PRTM 2540)
Gain a conceptual understanding of sport management, while exploring career opportunities in the field and building necessary competencies.
