Registering for Classes (Students)
1. Go to iRoar and login using your username and password.

2. Click on iRoar (SSB)

3. Click on student. Then, click the Registration tab.

4. Click add/drop classes, plan ahead and view schedule.
5. Click Register for Classes.

*It will ask you to select a term. Make sure you select the correct term.

6. To search for a class, enter the subject and course number into the appropriate fields and click search.

7. To add a class from your search, click add class when the results populate.

You can also register from a plan you, or your advisor, have created. Click on the Plans tab and add plan. You can also add each class individually from the plans.

**You are NOT registered for a class by clicking add. You have to click the submit button under your class summary to be registered. This is located in the bottom right of the page.
8. Once you have added classes, they will pop up in your class summary. You will not be registered until you click Submit. The classes will be pending until you click submit.

9. When you have clicked submit and registered for your classes, your schedule will show the classes you are registered for with a green check mark.

10. If you are unable to register because of an error, you will receive a notification to let you know what error you are getting. Pay close attention to the notification as it will explain what the error is and what is needed to fix it.

**If your error requires an override, those are given by the instructor or the registration coordinator of that department.

In addition, anytime you see the name of the course underlined you can click on it and it will show you the instructor and meeting times.
