

# CLEMSON UNIVERSITY

## **POLICY FOR RESPONDING TO ALLEGATIONS OF RESEARCH MISCONDUCT**

---

**Endorsed by the Faculty Senate on March 11, 2008**

**Approved by the Academic Council on April 14, 2008**

**Approved by the Board of Trustees Research Committee on April 17, 2008**

**Approved by the Board of Trustees on April 18, 2008**

This policy addresses how Clemson University will respond to allegations of research misconduct as defined by various federal regulations. The procedures outlined in this document meet the federal regulatory standards established by both the National Science Foundation and the Public Health Service.

**CLEMSON UNIVERSITY**  
**Policy for Responding to Allegations  
of Research Misconduct**

## **I. Introduction \***

### **A. General Policy**

Clemson University (CU) expects ethical conduct on the part of all those engaged in research. As articulated in CU's professional ethics statement, researchers at CU seek to employ the highest standards of intellectual honesty.

Through its Office of Research and Economic Development (ORED), CU seeks to provide leadership in supporting a culture of research integrity within the University, a culture in which all participants in the CU research enterprise internalize and pursue the goal of self-directed responsible conduct of research. CU is proud of its tradition of excellence in research and of our longstanding commitment to the highest standards for scientific integrity and the responsible conduct of research. It is every researcher's responsibility to promote a commitment to intellectual honesty and personal responsibility for one's actions, and to respect everyone involved in the research enterprise. As an institution, we are committed to preventing misconduct in research and support good faith efforts to intervene in such misconduct.

### **B. Scope**

This policy and the associated procedures apply to all individuals at Clemson University engaged in research as defined in Section II of this document, including any research that is supported by the federal government or for which federal support is requested. This policy applies to any person paid by, under the control of, or affiliated with the institution, such as scientists, trainees, technicians and other staff members, students working as laboratory or research assistants, fellows, guest researchers, or collaborators at CU.

This policy and associated procedures applies to all allegations of research misconduct and will normally be followed when an allegation of possible research misconduct is received by any institutional official or committee. Particular circumstances in an individual case may dictate variation from the normal procedure deemed in the best interests of the institution and funding agency. Any change from normal procedures also must ensure fair treatment to the subject of the inquiry and/or investigation. Any significant variation should be approved in advance by the Vice President for Research and Economic Development of Clemson University.

Research practica are an exception to this policy. Research practica (usually in the form of course-related research projects and/or directed studies) are designed to provide students an opportunity to practice various research methods such as interview, observation and survey techniques, laboratory and field procedures, measurement of behavior (e.g., reaction time, speech, problem solving) as well as data analysis. Research practica also allow for skills development exercises such as literature reviews and online searches. Typically such projects are quite limited in scope, do not lead to generalizable knowledge and are not undertaken with that goal in mind. For example, a student may interview a peer when the interview does

not involve any sensitive, personal information or do literature reviews for a course-related research paper. These projects are considered "classroom exercises" and do not fall under the scope of this research misconduct policy. However, thesis and dissertation research done by graduate students for terminal degrees would fall under the purview of this policy.

## II. Definitions

- A. *Allegation* means any written or oral statement or other indication of possible research misconduct made to an institutional official.
- B. *Conflict of interest* means the real or apparent interference of one person's interests with the interests of another person, where potential bias may occur due to prior or existing personal or professional relationships.
- C. *Deciding Official* means the Vice President for Research and Economic Development (VPRED) of Clemson University. The VPRED will make determinations on allegations of research misconduct and any responsive institutional actions. The Deciding Official will not be the same individual as the Research Integrity Officer.
- D. *Federal support* means federal grants, contracts, or cooperative agreements or applications therefore.
- E. *Good faith allegation* means an allegation made with the honest belief that research misconduct may have occurred. An allegation is not in good faith if it is made with reckless disregard for or willful ignorance of facts that would disprove the allegation.
- F. *Inquiry* means gathering information and initial fact-finding to determine whether an allegation or apparent instance of research misconduct warrants an investigation.<sup>1</sup>
- G. *Investigation* means the formal examination and evaluation of all relevant facts to determine if research misconduct has occurred, and, if so, to determine the responsible person, the seriousness of the research misconduct and to evaluate appropriate action.<sup>2</sup>
- H. *NSF* means the National Science Foundation.
- I. *OIG* means the Office of the Inspector General, the office within the National Science Foundation (NSF) that is responsible for the research misconduct and research integrity activities.
- J. *ORI* means the Office of Research Integrity, the office within the U.S. Department of Health and Human Services (DHHS) that is responsible for the research misconduct and research integrity activities of the U.S. Public Health Service.

- K. *PHS* means the U.S. Public Health Service, an operating component of the DHHS.
- L. *PHS regulation* means the Public Health Service regulation establishing standards for institutional inquiries and investigations into allegations of research misconduct, which is set forth at 42 C.F.R. Part 93
- M. *Research* for the purposes of this document is defined as any systematic investigation, including research development (pilot testing), designed to develop or contribute to generalizable knowledge. Generalizable knowledge includes any systematically generated products of research intended for dissemination beyond the institutional setting (e.g., program evaluation research for internal use would not usually be applicable).
- N. *Research Integrity Officer* means the institutional official responsible for assessing allegations of research misconduct and determining when such allegations warrant inquiries and for overseeing inquiries and investigations.
- O. *Research misconduct* for the purposes of this document and as defined by the federal Office of Science and Technology Policy is fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results. Fabrication is making up data or results or recording or reporting made-up data or results. Falsification is manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record. Plagiarism is the appropriation of another person's ideas, processes, results, or words without giving appropriate credit. Research misconduct does not include honest error or differences of opinion. A finding of research misconduct requires that--(a) There be a significant departure from accepted practices of the relevant research community; and (b) The misconduct be committed intentionally, knowingly, or recklessly; and (c) The allegation be proven by a preponderance of the evidence.
- P. *Research record* means any data, document, computer file, computer diskette, or any other written or non-written account or object that reasonably may be expected to provide evidence or information regarding the proposed, conducted, or reported research that constitutes the subject of an allegation of research misconduct. A research record includes, but is not limited to, grant or contract applications, whether funded or unfunded; grant or contract progress and other reports; laboratory notebooks; notes; correspondence; videos; photographs; X-ray film; slides; biological materials; computer files and printouts; manuscripts and publications; equipment use logs; laboratory procurement records; animal facility records; human and animal subject protocols; consent forms; medical charts; and patient research files.
- Q. *Respondent* means the person against whom an allegation of research misconduct is directed or the person whose actions are the subject of the inquiry or investigation. There can be more than one respondent in any inquiry or investigation.

- R. *Retaliation* means any action that adversely affects the employment or other institutional status of an individual that is taken by an institution or an employee because the individual has in good faith, made an allegation of research misconduct or of inadequate institutional response thereto or has cooperated in good faith with an investigation of such allegation.
- S. *Complainant* means a person who makes an allegation of research misconduct.

### **III. Rights and Responsibilities**

#### **A. Research Integrity Officer**

The Vice President for Research and Economic Development, in consultation with the Faculty Senate President, will appoint the Research Integrity Officer who will have primary responsibility for implementation of the procedures set forth in this document. The Research Integrity Officer will be an institutional official who is well qualified to handle the procedural requirements involved and is sensitive to the varied demands made on those who conduct research, those who are accused of research misconduct, and those who report apparent research misconduct in good faith.

The Research Integrity Officer will appoint the inquiry and investigation committees, in consultation with other institutional officials as appropriate, and will ensure that necessary and appropriate expertise is secured to carry out a thorough and authoritative evaluation of the relevant evidence in an inquiry or investigation. The Research Integrity Officer will attempt to ensure that confidentiality is maintained.

The Research Integrity Officer will assist inquiry and investigation committees and all institutional personnel in complying with these procedures and with applicable standards imposed by government or external funding sources. The Research Integrity Officer is also responsible for maintaining files of all documents and evidence and for the confidentiality and the security of the files.

The Research Integrity Officer will report to ORI or other federal agencies as required by regulation and keep them apprised of any developments during the course of the inquiry or investigation that may affect current or potential federal funding for the individual(s) under investigation or that the federal agency needs to know to ensure appropriate use of Federal funds and otherwise protect the public interest.<sup>3</sup>

#### **B. Complainant**

The complainant will have an opportunity to testify before the inquiry and investigation committees, to review portions of the inquiry and investigation reports pertinent to his/her allegations or testimony, to be informed of the results of the inquiry and investigation, and to be protected from retaliation. Also, if the Research Integrity Officer has determined that the complainant may be able to provide pertinent information on any portions of the draft report, these portions will be given

to the complainant for comment.<sup>4</sup>

The complainant is responsible for making allegations in good faith, maintaining confidentiality, and cooperating with an inquiry and/or investigation.

C. Respondent

The respondent will be informed of the allegations when an inquiry is opened and notified in writing of the final determinations and resulting actions. The respondent will also have the opportunity to be interviewed by and present evidence to the inquiry and investigation committees, to review the draft inquiry and investigation reports, and to have the advice of personal counsel but counsel may not participate in the committee (inquiry or investigation) proceedings.

The respondent is responsible for maintaining confidentiality and cooperating with the conduct of an inquiry or investigation. If the respondent is not found guilty of research misconduct, he or she has the right to receive reasonable and practical institutional assistance in restoring his or her reputation.<sup>5</sup>

D. Deciding Official

The Deciding Official will receive the inquiry and/or investigation report and any written comments made by the respondent or the complainant on the draft report. The Deciding Official will consult with the Research Integrity Officer or other appropriate officials and will determine whether to conduct an investigation, whether research misconduct occurred, whether to impose sanctions, or whether to take other appropriate administrative actions [see section X].

#### **IV. General Policies and Principles**

A. Responsibility to Report Misconduct

All employees, individuals or committees associated with CU have an ethical obligation to report observed, suspected, or apparent research misconduct to the Research Integrity Officer. If an individual or committee is unsure whether a suspected incident falls within the definition of research misconduct, they may call the Research Integrity Officer to discuss the suspected research misconduct informally. If the circumstances described by the individual do not meet the definition of research misconduct, the Research Integrity Officer will refer the individual or allegation to other offices or officials with responsibility for resolving the problem.

At any time, an employee may have confidential discussions and consultations about concerns of possible research misconduct with the Research Integrity Officer and will be counseled about appropriate procedures for reporting allegations.

Individuals may also report suspected misconduct directly to a funding agency.

**B. Protecting the Complainant**

The Research Integrity Officer will monitor the treatment of individuals who bring allegations of research misconduct or of inadequate institutional response thereto, and those who cooperate in inquiries or investigations. The Research Integrity Officer will ensure that these persons will not be subject to retaliation in the terms and conditions of their employment or other status at the institution and will review instances of alleged retaliation for appropriate action.

Employees should immediately report any alleged or apparent retaliation to the Research Integrity Officer.

Also the institution will protect the privacy of those who report research misconduct in good faith to the maximum extent possible. For example, if the complainant requests anonymity, the institution will make an effort to honor the request during the allegation assessment or inquiry within applicable policies and regulations and state and local laws. The complainant will be advised that if the matter is referred to an investigation committee and the complainant's testimony is required, anonymity may no longer be guaranteed. CU will undertake reasonable and practical efforts to protect the positions and reputations of those persons who, in good faith, make allegations.<sup>6</sup>

The RIO may notify University Administrators as deemed appropriate.

**C. Protecting the Respondent**

Inquiries and investigations will be conducted in a manner that will ensure fair treatment to the respondent(s) in the inquiry or investigation and confidentiality to the extent possible without compromising public health and safety or thoroughly carrying out the inquiry or investigation.

Institutional employees accused of research misconduct may consult with legal counsel, faculty or staff ombudsman or a non-lawyer personal adviser (who is not a principal or witness in the case) to seek advice.

**D. Cooperation with Inquiries and Investigations**

CU employees will cooperate with the Research Integrity Officer and other CU officials in the review of allegations and the conduct of inquiries and investigations. Employees have an obligation to provide relevant evidence to the Research Integrity Officer or other institutional officials on research misconduct allegations.

**E. Preliminary Assessment of Allegations**

Upon receiving an allegation of research misconduct, the Research Integrity

Officer will immediately assess the allegation to determine whether the allegation falls under the definition of research misconduct, whether there is sufficient evidence to warrant an inquiry, and whether funding agencies must be notified. If the respondent is a graduate student, the Research Integrity Officer will consult with the dean of the graduate school responsible for the administration of the academic integrity policy.

## V. Conducting the Inquiry

### A. Initiation and Purpose of the Inquiry

Following the preliminary assessment, if the Research Integrity Officer has determined that the allegation provides sufficient information to allow specific follow-up, and falls under the definition of research misconduct, he or she will immediately initiate the inquiry process. In initiating the inquiry, the Research Integrity Officer should identify clearly the original allegation and any related issues that should be evaluated. The purpose of the inquiry is to make a preliminary evaluation of the available evidence and testimony of the respondent, complainant, and key witnesses to determine whether there is sufficient evidence of possible research misconduct to warrant an investigation. The purpose of the inquiry is **not** to reach a final conclusion about whether research misconduct definitely occurred or who was responsible. The findings of the inquiry must be set forth in an inquiry report.

### B. Sequestration of the Research Records

After determining that an allegation falls within the definition of research misconduct, the Research Integrity Officer must ensure that all original research records and materials relevant to the allegation are immediately secured. The Research Integrity Officer may consult with knowledgeable individuals for advice and assistance in this regard.

### C. Appointment of the Inquiry Committee

The Research Integrity Officer, in consultation with the Faculty Senate President and other institutional officials as appropriate, will appoint an inquiry committee and committee chair within 15 calendar days of the initiation of the inquiry. The inquiry committee should consist of individuals who do not have real or apparent conflicts of interest in the case, are unbiased, and have the necessary expertise to evaluate the evidence and issues related to the allegation, interview the principals and key witnesses, and conduct the inquiry. These individuals may be scientists, subject matter experts, administrators, lawyers, or other qualified persons, and they may be from inside or outside the institution. There must be a minimum of three individuals on the inquiry committee and a majority of the committee members must be tenured faculty.

The Research Integrity Officer will notify the respondent of the proposed committee membership within 10 calendar days of the appointment of the inquiry committee.

If the respondent submits a written objection to any appointed member of the inquiry committee or expert based on bias or conflict of interest within 5 days of notification of the membership, the Research Integrity Officer will determine whether to replace the challenged member or expert with a qualified substitute.

**D. Charge to the Committee and the First Meeting**

The Research Integrity Officer will prepare a charge for the inquiry committee that describes the allegations and any related issues identified during the allegation assessment and states that the purpose of the inquiry is to make a preliminary evaluation of the evidence and testimony of the respondent, complainant, and key witnesses to determine whether there is sufficient evidence of possible research misconduct to warrant an investigation. The purpose is not to determine whether research misconduct definitely occurred or who was responsible.

At the committee's first meeting, the Research Integrity Officer will review the charge with the committee, discuss the allegations, any related issues, and the appropriate procedures for conducting the inquiry, assist the committee with organizing plans for the inquiry, and answer any questions raised by the committee. The Research Integrity Officer and a representative of the Office of General Counsel will be present or available throughout the inquiry to advise the committee as needed.

**E. Inquiry Process**

The inquiry committee will normally interview the complainant, the respondent, and key witnesses as well as examining relevant research records and materials. Then the inquiry committee will evaluate the evidence and testimony obtained during the inquiry. After consultation with the Research Integrity Officer and a representative of the Office of General Counsel, the committee members will decide whether there is sufficient evidence of possible research misconduct to recommend further investigation. The scope of the inquiry does not include deciding whether research misconduct occurred or conducting exhaustive interviews and analyses.

**VI. The Inquiry Report**

**A. Elements of the Inquiry Report**

A written inquiry report must be prepared that states the name and title of the committee members and experts, if any; the allegations; federal support, if any; a summary of the inquiry process used; a list of the research records reviewed; summaries of any interviews; a description of the evidence in sufficient detail to demonstrate whether an investigation is warranted or not; and the committee's recommendation as to whether an investigation should be undertaken and whether any

other actions should be taken. A representative of the Office of General Counsel will review the report for legal sufficiency.

B. Comments on the Draft Report by the Respondent and the Complainant

The Research Integrity Officer will provide the respondent with a copy of the draft inquiry report for comment and rebuttal and will provide the complainant, if he or she is identifiable, with portions of the draft inquiry report that address the complainant's role and opinions in the investigation.

1. Confidentiality

The Research Integrity Officer may establish reasonable conditions for review to protect the confidentiality of the draft report.

2. Receipt of Comments

Within 10 calendar days of their receipt of the draft report, the complainant and respondent will provide their written comments, if any, to the inquiry committee. Any comments that the complainant or respondent submits on the draft report will become part of the final inquiry report and record. Based on the comments, the inquiry committee may revise the report as appropriate.

C. Time Limit for Completing the Inquiry Report

The inquiry committee will normally complete the inquiry and submit its report in writing to the Research Integrity Officer no more than 45 calendar days following its first meeting, unless the Research Integrity Officer approves an extension for good cause. If the Research Integrity Officer approves an extension, the reason for the extension will be entered into the records of the case and the report. The respondent also will be notified of the extension.

D. Inquiry Decision and Notification

1. Decision by Deciding Official

The Research Integrity Officer will transmit the final report and any comments to the Deciding Official, who will make the determination of whether findings from the inquiry provide sufficient evidence of possible research misconduct to justify conducting an investigation. The inquiry is completed when the Deciding Official makes this determination, which will be made within 60 calendar days of the first meeting of the inquiry committee<sup>8</sup>. Any extension of this period will be based on good cause and recorded in the inquiry file. If an investigation is warranted, it must begin within 30 calendar days of the Deciding Official's determination<sup>9</sup>.

## 2. Notification

The Research Integrity Officer will notify both the respondent and the complainant in writing of the Deciding Official's decision of whether to proceed to an investigation and will remind them of their obligation to cooperate in the event an investigation is opened. The Research Integrity Officer will also notify all appropriate institutional officials of the Deciding Official's decision.

## VII. Conducting the Investigation

### A. Purpose of the Investigation

The purpose of the investigation is to explore in detail the allegations, to examine the evidence in depth, and to determine specifically whether research misconduct has been committed, by whom, and to what extent. The investigation will also determine whether there are additional instances of possible research misconduct that would justify broadening the scope beyond the initial allegations. This is particularly important where the alleged research misconduct involves clinical trials or potential harm to human subjects or the general public or if it affects research that forms the basis for public policy, clinical practice, social services, education policy or public health practice. The findings of the investigation will be set forth in an investigation report.

### B. Sequestration of the Research Records

The Research Integrity Officer will immediately sequester any additional pertinent research records that were not previously sequestered during the inquiry. This sequestration should occur before or at the time the respondent is notified that an investigation has begun. The need for additional sequestration of records may occur for any number of reasons, including the institution's decision to investigate additional allegations not considered during the inquiry stage or the identification of records during the inquiry process that had not been previously secured. The procedures to be followed for sequestration during the investigation are the same procedures that apply during the inquiry.

### C. Appointment of the Investigation Committee

The Research Integrity Officer, in consultation with the Faculty Senate President and other institutional officials as appropriate, will appoint an investigation committee and the committee chair within 15 calendar days of the notification to the respondent that an investigation is planned or as soon thereafter as practicable. The investigation committee should consist of individuals who do not have real or apparent conflicts of interest in the case, are unbiased, and have the necessary expertise to evaluate the evidence and issues related to the allegations, interview the principals and key witnesses, and conduct the investigation.<sup>10</sup> These individuals may be scientists,

administrators, subject matter experts, lawyers, or other qualified persons, and they may be from inside or outside the institution. Individuals appointed to the investigation committee may also have served on the inquiry committee. There must be a minimum of three individuals on the investigation committee and a majority of the committee members must be tenured faculty.

The Research Integrity Officer will notify the respondent of the proposed committee membership within 10 days of the appointment of the investigation committee. If the respondent submits a written objection to any appointed member of the investigation committee or expert within five days of notification of the membership, the Research Integrity Officer will determine whether to replace the challenged member or expert with a qualified substitute.

D. Charge to the Committee and the First Meeting

1. Charge to the Committee

The Research Integrity Officer will define the subject matter of the investigation in a written charge to the committee that: Describes the allegations and related issues identified during the inquiry; Identifies the respondent; informs the committee that it must conduct the investigation as prescribed in paragraph E. of this section; defines research misconduct; Informs the committee that it must evaluate the evidence and testimony to determine whether, based on a preponderance of the evidence, research misconduct occurred and, if so, the type and extent of it and who was responsible; Informs the committee that in order to determine that the respondent committed research misconduct it must find that a preponderance of the evidence establishes that: (1) research misconduct, as defined in this policy, occurred (respondent has the burden of proving by a preponderance of the evidence any affirmative defenses raised, including honest error or a difference of opinion); (2) the research misconduct is a significant departure from accepted practices of the relevant research community; and (3) the respondent committed the research misconduct intentionally, knowingly, or recklessly; Informs the committee that during the investigation, if additional information becomes available that substantially changes the subject matter of the investigation or would suggest additional respondents, the committee will notify the Research Integrity Officer, who will determine whether it is necessary to notify the respondent of the new subject matter or to provide notice to additional respondents; and, Informs the committee that it must prepare or direct the preparation of a written investigation report that meets the requirements of this policy and federal regulations<sup>11</sup>.

2. The First Meeting

The Research Integrity Officer, with the assistance of a representative of the Office of General Counsel, will convene the first meeting of the investigation committee to review the charge, the inquiry report, and the prescribed procedures and standards for the conduct of the investigation, including the necessity for confidentiality and for developing a specific investigation plan. The investigation committee will be provided with a copy of these instructions and, where federal funding is involved, the federal regulation.

E. Investigation Process

The investigation committee will be appointed and the process initiated within 30 calendar days of the completion of the inquiry, if findings from that inquiry provide a sufficient basis for conducting an investigation.<sup>12</sup>

The investigation will normally involve examination of all documentation including, but not necessarily limited to, relevant research records, computer files, proposals, manuscripts, publications, correspondence, memoranda, and notes of telephone calls.<sup>13</sup> Whenever possible, the committee should interview the complainant(s), the respondents(s), and other individuals who might have information regarding aspects of the allegations. Interviews of the respondent should be tape recorded or transcribed. All other interviews should be transcribed, tape recorded, or summarized. Summaries or transcripts of the interviews should be prepared, and included as part of the investigatory file.<sup>14</sup>

## VIII. The Investigation Report

A. Elements of the Investigation Report

The final submitted report, which will go to the Deciding Official and any other required entities, must describe the policies and procedures under which the investigation was conducted, describe how and from whom information relevant to the investigation was obtained, state the findings, and explain the basis for the findings. The report will include the actual text or an accurate summary of the views of any individual(s) found to have engaged in research misconduct as well as a recommendation regarding any sanctions to be imposed and administrative actions to be taken by the institution.<sup>15</sup>

B. Comments on the Draft Report

1. Respondent

The Research Integrity Officer will provide the respondent with a copy of the draft investigation report for comment and rebuttal. The respondent will be allowed 10 calendar days to review and comment on the draft report. The respondent's written comments will be attached to the final report. The findings of the final report should take into account the respondent's

comments in addition to all the other evidence.

2. Complainant

The Research Integrity Officer will provide the complainant, if he or she is identifiable, with those portions of the draft investigation report that address the complainant's role and opinions in the investigation. The report should be modified, as appropriate, based on the complainant's comments.

3. Institutional Counsel

The draft investigation report will be transmitted to a representative of the Office of General Counsel for a review of its legal sufficiency. Comments should be incorporated into the final report as appropriate.

4. Confidentiality

In distributing the draft report, or portions thereof, to the respondent and complainant, the Research Integrity Officer will inform the recipient of the confidentiality under which the draft report is made available and may establish reasonable conditions to ensure such confidentiality. For example, the Research Integrity Officer may request the recipient to sign a confidentiality statement or to come to his or her office to review the report.

C. Institutional Review and Decision

Based on whether the investigation was thorough, fair and complete, the Deciding Official will make the final determination whether to accept the investigation report, its findings, and the recommended institutional actions. If this determination varies from that of the investigation committee, the Deciding Official will explain in detail the basis for rendering a decision different from that of the investigation committee in the institution's letter transmitting the report to the relevant funding agency or agencies. The Deciding Official's explanation should be consistent with the definition of research misconduct in this document, the institution's policies and procedures, and the evidence reviewed and analyzed by the investigation committee. The Deciding Official may also return the report to the investigation committee with a request for further fact-finding or analysis. The Deciding Official's determination, together with the investigation committee's final report, constitutes the final investigation report for purposes of federal review.

When a final decision on the case has been reached, the Research Integrity Officer will notify both the respondent and the complainant in writing. In addition, the Deciding Official will determine whether law enforcement agencies, professional societies, professional licensing boards, editors of journals in which falsified reports may have been published, collaborators of the respondent in the work, or other relevant parties should be notified of the outcome of the case. The Deciding Official

will inform University Administrators as necessary to implement appropriate corrective actions and/or sanctions. The Research Integrity Officer is responsible for ensuring compliance with all notification requirements of funding or sponsoring agencies.

- D. Transmittal of the Final Investigation Report to relevant entities.

After comments have been received and the necessary changes have been made to the draft report, the investigation committee should transmit the final report with attachments, including the respondent's and complainant's comments, to the Deciding Official, through the Research Integrity Officer. The Research Integrity Officer will submit the final report to ORI and/or other relevant entities.

- E. Time Limit for Completing the Investigation Report

An investigation should ordinarily be completed within 120 days of its initiation, with the initiation being defined as the first meeting of the investigation committee. This includes conducting the investigation, preparing the report of findings, making the draft report available to the subject of the investigation for comment, submitting the report to the Deciding Official for approval, and submitting the report to the relevant entities.<sup>16</sup>

## **IX. Specific Requirements for Reporting to ORI or OIG When PHS or NSF Funding Is Involved**

- A. A decision to initiate an investigation must be reported in writing by the Research Integrity Officer to the ORI or OIG on or before the date the investigation begins.<sup>17</sup> At a minimum, the notification should include the name of the person(s) against whom the allegations have been made, the general nature of the allegation as it relates to the definition of research misconduct, and the PHS applications or grant number(s) involved. ORI or OIG must also be notified of the final outcome of the investigation and must be provided with a copy of the investigation report.<sup>18</sup> Any significant variations from the provisions of the institutional policies and procedures should be explained in any reports submitted to ORI.
- B. If an institution plans to terminate an inquiry or investigation for any reason without completing all relevant requirements of the PHS regulation when PHS funding is involved, the Research Integrity Officer will submit a report of the planned termination to ORI, including a statement of the reasons for the proposed termination.<sup>19</sup>
- C. If the institution determines that it will not be able to complete the inquiry and/or investigation within the time frames required, the Research Integrity Officer will submit to ORI or OIG a written request for an extension that explains the delay, reports on the progress to date, estimates the date of completion of the report, and describes other necessary steps to be taken. If the request is granted, the Research

Integrity Officer will file periodic progress reports as requested by the ORI or OIG.<sup>20</sup>

- D. When PHS or NSF funding or applications for funding are involved and an admission of research misconduct is made, the Research Integrity Officer will contact ORI or OIG for consultation and advice. Normally, the individual making the admission will be asked to sign a statement attesting to the occurrence and extent of research misconduct. When the case involves PHS funds, the institution is not permitted to accept an admission of research misconduct as a basis for closing a case or not undertaking an investigation without prior approval from ORI.<sup>21</sup>
- E. The Research Integrity Officer will notify ORI or OIG at any stage of the inquiry or investigation if:
1. there is an immediate health or safety hazard involved;<sup>22</sup>
  2. there is an immediate need to protect Federal resources, reputations or other interests;<sup>23</sup>
  3. there is an immediate need to protect the interests of the person(s) making the allegations or of the individual(s) who is the subject of the allegations as well as his/her co-investigators and associates, if any;<sup>24</sup>
  4. it is probable that the alleged incident is going to be reported publicly;<sup>25</sup>
  5. the scientific community or the public should be informed;<sup>26</sup> or
  6. if research activities should be suspended;<sup>27</sup> or
  7. there is a reasonable indication of possible civil or criminal violation.<sup>28</sup>

## **X. Institutional Administrative Actions**

Clemson University will take appropriate administrative actions against individuals when an allegation of research misconduct has been substantiated.<sup>29</sup>

If the Deciding Official determines that the alleged research misconduct is substantiated by the findings, he or she will decide on the appropriate actions to be taken, after consultation with the Research Integrity Officer. The actions may include:

- withdrawal or correction of all pending or published abstracts and papers emanating from the research where research misconduct was found.
- removal of the responsible person from the particular project, letter of reprimand, special monitoring of future work, probation, suspension, salary reduction, or initiation of steps leading to possible rank reduction or termination of employment;
- restitution of funds as appropriate.
- completion of appropriate training, specified by the Deciding Official.
- disciplinary action against the respondent, up to and including termination from employment.

## **XI. Other Considerations**

- A. Termination of Institutional Employment or Resignation Prior to Completing Inquiry or Investigation

The termination of the respondent's institutional employment, by resignation or otherwise, before or after an allegation of possible research misconduct has been reported, will not preclude or terminate the research misconduct procedures.

If the respondent, without admitting to the research misconduct, elects to resign his or her position prior to the initiation of an inquiry, but after an allegation has been reported, or during an inquiry or investigation, the inquiry or investigation will proceed. If the respondent refuses to participate in the process after resignation, the committee will use its best efforts to reach a conclusion concerning the allegations, noting in its report the respondent's failure to cooperate and its effect on the committee's review of all the evidence.

B. Restoration of the Respondent's Reputation<sup>30</sup>

If the institution finds no research misconduct and, where relevant, if ORI concurs, after consulting with the respondent, the Research Integrity Officer will undertake reasonable and practical efforts to restore the respondent's reputation. Depending on the particular circumstances, the Research Integrity Officer should consider notifying those individuals aware of or involved in the investigation of the final outcome, publicizing the final outcome in forums in which the allegation of research misconduct was previously publicized, or expunging all reference to the research misconduct allegation from the respondent's personnel file. Any institutional actions to restore the respondent's reputation must first be approved by the Deciding Official.

C. Protection of the Complainant and Others<sup>31</sup>

During the research misconduct proceeding and upon its completion, regardless of whether the institution, OIG, or ORI determines that research misconduct occurred, the RIO must undertake all reasonable and practical efforts to protect the position and reputation of, or to counter potential or actual retaliation against, any complainant

who made allegations of research misconduct in good faith and of any witnesses and committee members who cooperate in good faith with the research misconduct proceeding. The DO will determine, after consulting with the RIO, and with the complainant, witnesses, or committee members, respectively, what steps, if any, are needed to restore their respective positions or reputations or to counter potential or actual retaliation against them. The RIO is responsible for implementing any steps the DO approves.

D. Allegations Not Made in Good Faith

If relevant, the Deciding Official will determine whether the complainant's allegations of research misconduct were made in good faith. If an allegation was not made in good faith, the Deciding Official will determine whether any administrative action should be taken against the complainant.

E. Interim Administrative Actions

Institutional officials will take interim administrative actions, as appropriate, to protect Federal funds and ensure that the purposes of the Federal financial assistance are carried out.

**XII. Record Retention**

After completion of a case and all ensuing related actions, the Research Integrity Officer will prepare a complete file, including the records of any inquiry or investigation and copies of all documents and other materials furnished to the Research Integrity Officer or committees. The Research Integrity Officer will keep the file for seven years after completion of the case to permit later assessment of the case. Authorized federal personnel will be given access to the records upon request.<sup>32</sup>
