Fall 2024

SOUTH CAROLINA BOTANICAL GARDEN

at CLEMSON® UNIVERSITY

Welcome to the Fall 2024 Plant Sale at the South Carolina Botanical Garden! We are so excited to be able to invite guests to the nursery to shop an excellent selection of plants this year, including many hard-to-find natives, perennials, shrubs, trees, and wetland plants.*

Thank you for your generous support of this critical fundraiser. In a typical year, our plant sales generate over half of our revenue, which we need for Garden and Nursery maintenance and so many other miscellaneous needs. Please consider becoming a Friend of the Garden, if you are not already, so that we can continue to offer free access to our grounds, 365 days a year.

How to shop the sale:

- Arrive at any Garden entrance and follow the signs to the nursery
- Park outside the gate where staff will direct parking
- Come in and start shopping!
- There are a limited number of carts available but you are welcome to bring your own
- The Checkout Tents will gladly hold your purchases while you continue to shop
- When you are finished shopping, the Checkout Tent will give you a ticket to take to the cashier where we accept cash, check, and credit card
- Drive your car to the Checkout Tent and we will load your plants for you

**Please note that this catalog list is not a guarantee that all listed plants will be available. There may also be selections available that are not included in this catalog.*

Calopogon tuberosus | grass pink orchid

4.5" pot... \$10 BOG

These orchids push up their new leaves and flower stalks with multiple flowers in early spring, bearing up to fifteen white to pink flowers on a robust plant. Bog plant which requires a consistently moist garden spot along the edge of a body of water or in a specially made bog garden. Grows 15" tall. Zone: 3-9

Dionaea muscipula | Venus fly trap

4.5" pot.... \$8 BOG

Prostrate, rosette growth from a short rhizome. Traps form on end of short petioles; inner surface of traps may be dark red or green (sun dependent); closed traps open in 5-14 days and die after 2-4 closings. Flowers in May/June are showy, white, five-petaled and held just above the foliage. Has a shallow root system. Native to parts of NC & SC. Primary food is ants. Grows 12" tall and 8" wide. Zone: 6-8

Drosera binata var. *dichotoma* 'Giant' | giant staghorn sundew

4.5" pot... \$14 BOG

A monster of a forked sundew, *D. binata dichotoma* 'Giant' generates forked sundew leaves up to two feet long with four to twelve forks. The natural habitat for these globes of flypaper is New South Wales, Australia, where many thousands of them can be found hanging from wet canyon cliffs. Its size makes it a voracious fly and crane fly catcher. In full outdoor sun, the plant will remain erect, leaves will redden, and overall size will remain slightly smaller. Has a brief winter dormancy and is tolerant to brief freezes down to 15°F. Grows 2' tall. Zone: 6-10

Drosera capensis | cape sundew

4.5" pot.... \$8 BOG

Large and handsome plants that are very easy to grow. They produce scores of showy pink flowers on tall stems and are easy to propagate. Their leaves move rather dramatically, and they are tolerant of a wide range of growing conditions. These are by far the most entertaining and popular of the *Drosera*. They will catch gnats, fruit flies and flies. Stems grow up to 10" tall. Zone: 9-11

Drosera filiformis | threadleaf sundew

4.5" pot... \$10 BOG

This striking member of the sundew family is distinctive, with its stringy leaves covered with glistening droplets of sticky exudate. Insects trapped in the sticky hairs are digested by plant enzymes. Researchers have found that substantial quantities of protein from the insects end up in the storage roots, demonstrating the importance of this source of nutrients. The southern plants are larger than the northern and are considered by some authorities to be the separate species *D. tracyi*. The genus name derives from the Greek *droseros* (dewy) and refers to the sticky droplets on the leaves. Grows to 4-12" tall. Zone: 5-9

Drosera intermedia | spoonleaf sundew

4.5" pot... \$12 BOG

Drosera intermedia or bird's nest sundew is sometimes called the water sundew, and for good reason. It loves extremely wet, saturated boggy conditions, often growing on floating mats, where it can grow its largest, 3+". It is medium height with a dazzling display of glistening tentacles in full sun, giving it a silvery appearance. The spatula-shaped leaves are green with bright red tentacles. It emerges early in the Spring and last throughout the Summer and Fall. It forms a sturdy winter hibernacula (resting bud), which is best pushed down to the surface in early Spring for best growth. The small flowers are white with a tint of pink on scapes with multiple blossoms. It flowers from June to August and often forms young plantlets on the flower spike (false vivipary). It frequently produce abundant seeds, giving it a nice spreading habitat. Grows to 1-3" tall and wide. Zone: 4-9

Lachnocaulon minus | Small's bogbutton

4.5" pot... \$16 BOG

A cute bog companion plant! Low growing, mat forming plant with small, round gray flower heads. Naturally found in wet sites such as pond edges, lake edges and ditches. Add some interest to your bog garden with these plants that look like little pin cushions. Grow up to 8" tall. Zone: 8-11

Lysimachia terrestris | swamp candles

4.5" pot... \$10 BOG

The swamp candle plant is native in Georgia and north through Maine, and in the states of Pennsylvania west to Iowa. Swamp candles can be identified by their bright yellow flowers that bloom up from the bottom with reddish lines down the center of the five petals. At the end of the growing season, red blobs form in the leaf axils. They resemble caterpillars or fruit, but they are neither. They are harmless, but do not eat them. Swamp candles are typically found in marshy areas in full and part sun. Swamp candles are rhizomatous, so they are better suited for a larger garden. As with other members of the *Lysimachia* genus, ecologists recognize swamp candles as having special value to native bees. Grows 3' tall. Zone: 3-8

Sarracenia 'Bug Bat' | pitcher plant

4.5" pot... \$24 BOG

A carnivorous plant and staple of bog gardening! Hooded pitchers stand 16" tall and serve as colorful, unique decoration in the garden. 'Bug Bat' has cinnamon red hoods that taper into chartreuse green at the base. White speckling adorns the back of each pitcher. Grows 14-16" tall and 12" tall. Zone: 5-9

Sarracenia leucophylla | white top pitcher plant

4.5" pot... \$30 BOG

Showy, fragrant, red blooms April-May. Noteworthy feature is that the top third or more of each pitcher is wonderfully pigmented white. The white top is usually innervated with green and/or red veins, overall making a very nice effect. The lip is very large, and often spouted. Grows 20-36" tall. Zone: 6-8

Sarracenia leucophylla 'Ginger' | pitcher plant

4.5" pot... \$24 BOG

Sarracenia leucophylla 'Ginger' is a very tall pitcher plant with dark red veins. The dark red coloration and veins dominate the upper portions of the tubes which attract many flying insects, particularly wasps. Grows 28" tall. Zone: 7-9

Sarracenia purpurea ssp. *venosa* | purple pitcher plant

4.5" pot... \$24 BOG

This stemless herbaceous perennial grows in the peaty soils of savannas and upland swamp margins usually in full sun. This species of pitcher plant is distinguished from most other species by that fact that it is a compact plant with decumbent pitchers that are open to the sky (they have vertical hoods), thus each pitcher collects rainwater in which trapped insects are killed by drowning in the rainwater/enzyme mixture located at the base of each pitcher. Grows 18" tall. Zone: 6-8

Sarracenia rubra | sweet pitcher plant

4.5" pot... \$24 BOG

A stemless carnivorous herbaceous perennial native to mucky soils of sunny bogs, swamps and streambanks scattered in the southeastern US from North Carolina to Mississippi. Modified leaves form distinctive, upright, slender-fluted pitchers of variable height ranging from 12-18" tall. Easily recognized because it has slender reddish pitcher-leaves that don't flare at the top. The lid of the pitcher is roughly circular in shape. In spring, a single flower rises on a leafless stalk (sometimes two flower stalks emerge from the same rhizome point) to about the same height as a mature pitcher. Flowers bloom from April to June. Flowers typically are fragrant. Each flower is followed by a 5-parted seed capsule. Grows 12-18" tall and wide. Zone: 6-8

Sarracenia x excellens | pitcher plant

4.5" pot... \$20 BOG

Sarracenia x excellens is a naturally occurring hybrid of *S. leucophylla* x *S. minor* with tall, erect multi-colored pitchers accented with rows of white areole (windows) and a heavy network of scarlet red and purple veins. The hoods are broad and undulating with ruffled margins. They are tinted a pinkish red, and arch over the trap opening. It is a vigorous grower and forms large full colonies. As with other *S. leucophylla* hybrids, it has a nice show of spring pitchers, but a great show of large, vigorous and stout fall pitchers. This hybrid was named in 1885 after its "excellent" appearance. Grows 12-16" tall. Zone: 6-8

Sarracenia x moorei 'Conversation Piece' | pitcher plant

4.5" pot... \$24 BOG

A unique garden plant that is true to its namesake! 24" tall tube-like pitchers will be a "conversation piece" with most every visitor to your garden. The tall, lime green pitchers have red hoods with distinctive veining. Flowers appear in summer as tall, nodding blooms a similar red color to the pitchers. In fall the pitchers turn burgundy with black veins and white accents on top. Keep constantly moist and use a heavy peat mix or media simulating a bog environment for best success. Grows 24-26" tall and 12-18" wide. Zone: 5-9

Sarracenia x 'Purpetrator' | pitcher plant

4.5" pot... \$24 BOG

Petite red pitchers make a subtle statement in pond margins or floating islands. Grows 6-8" tall. Zone: 6-8

Spiranthes odorata | ladies' tress orchid

4.5" pot... \$10 BOG

A classic bog plant! Features small, very fragrant, hooded, white flowers densely arranged in vertical, slightly spiral-like rows on spikes typically growing 9-18" (less frequently to 24") tall. Blooms in late summer to fall, often to first frost. Lance-shaped, linear leaves in basal rosettes, with some leaves extending up the flower spikes. The spiraling flower arrangement is the result of uneven cell growth, which results in a twisting of the flower stems. Grows 9-24" tall. Zone: 5-9

Xyris caroliniana | Carolina yelloweyed grass

4.5" pot.... \$8 BOG

Carolina yelloweyed grass is a perennial wildflower found in pine flatwoods, sandhills, wet prairies, coastal dune swales and bog edges. It blooms late spring through fall and is primarily pollinated by wind and bees, but other insects are known to visit the flowers. Its flowers are relatively small yet conspicuous, and look like little white or yellow butterflies dotting the landscape. Flowers are born in cone-like heads atop a smooth, twisted scape and may be solitary or in small clumps. *Xyris caroliniana* is a unique species – its flowers tend to open in the afternoon, while other species open in the morning. Fun Fact: Native Americans used an infusion of Carolina yellow-eyed grass roots to treat diarrhea. Grows 3' tall. Zone: 8-11

Abelia mosanensis Sweet Emotion® | hardy abelia

1 gallon... \$20 SEC B

Sweet Emotion® abelia is just the shrub to kickstart your heart - and your landscape. It's the hardiest abelia yet, growing where no abelia could grow before: in chilly USDA zone 4. It's also the most fragrant of any abelia, with white and pink spring blooms that perfume the air with the scent of jasmine. Add in its elegant habit, attractive seed heads, and orange fall foliage and you have the perfect shrub to showcase your good taste. Deer and rabbit resistant. Grows 5-6' tall and 6-7' wide. Zone: 4-8

Abelia x grandiflora Brilliantina™ | glossy abelia

1 gallon... \$20 SEC B

Abelia Brilliantina™ is a semi-evergreen perennial shrub grown for its attractive foliage and months of fragrant flowers. A unique abelia, Brilliantina™ is not only bold and beautiful but also well-behaved, with fewer errant shoots that need pruning. Its slender, gracefully arching dark-red stems bear bright variegated green, yellow, and orange leaves, which hold their variegation better than most, and clusters of bell-shaped, pink-tinged white flowers that sustain summer pollinators, including bees, butterflies, and hummingbirds. Grows 3-4' tall and 3-5' wide. Zone: 6-9

Abelia x grandiflora Mucho Gusto® | glossy abelia

1 gallon... \$20 SEC B

This shrub features soft, pointed, silvery green leaves with creamy white margins and tubular white flowers. Low maintenance, adaptability to soil types, and ability to handle periods of drought makes this abelia perfect for gardeners looking for a low-growing hedge, though it can be planted alone as well. Abelias generally are disease-free and are deer and rabbit resistant. Abelia is also considered a semi-evergreen, often keeping their leaves through the winter in milder regions. This shrub's drought tolerance and ease of care make it a popular choice among landscapers and plant enthusiasts alike. Grows 2-2.5' tall and 3-5' wide. Zone: 6-9

Aronia melanocarpa 'Autumn Magic' | black chokeberry

3 gallon... \$32 SEC C

An open, upright, spreading, somewhat rounded but leggy, suckering, deciduous shrub that is noted for its 5-6 flowered clusters of white 5-petaled spring (May) flowers, glossy elliptic dark green leaves with finely toothed margins, black autumn berries (blueberry size) and purple/red fall color. Its ability to withstand wet conditions makes it suitable for growing on the margins of ponds or streams. Excellent addition to naturalized areas where its suckering, colonial growth habit does not need to be restrained. Grows 6' tall and 7' wide. Zone: 3-8

Aronia melanocarpa 'Viking' | black chokeberry

7 gallon... \$42 SEC C

A deciduous shrub with masses of white flowers followed by clusters of large black fruit that persist throughout the winter. Flowers earlier than other varieties. Lustrous dark glossy green foliage offers wonderful fall color. Highly adaptable and deer resistant. Excellent for mixed borders or as a naturalizing plant. Grows 4-6' tall and wide. Zone: 3-9

Buddleia Lo & Behold® 'Pink Micro Chip' | summer lilac

1 gallon... \$18 SEC C

Lo & Behold® 'Pink Micro Chip' is the smallest member yet of this series of award-winning dwarf butterfly bush. It's a tiny and tidy mound of orchid-pink flower spikes, with a cute pincushion-like habit that makes it perfect for including in perennial gardens. Earlier blooming than other butterfly bush, which means you get non-stop color from early summer clear through frost. Highly deer and rabbit resistant, too! A non-invasive butterfly bush to boot! Grows 18-24" tall and wide. Zone: 5-9

Buddleia Lo & Behold® 'Purple Haze' | summer lilac

1 gallon... \$18 SEC C

This easy-care, dwarf shrub has a unique, horizontal, low spreading habit with feathery, deep green leaves and showy spikes of dark purple-blue flowers that radiate outward and downward. Blooms continuously from summer to fall. A newer selection from the Lo & Behold® series of compact, eco-friendly Buddleias, it is perfect for massing in borders, and a must for the butterfly garden! Will not produce unwanted seedlings. Grows 24" tall and wide. Zone: 5-9

Buddleia 'Miss Violet' | summer lilac

1 gallon... \$18 SEC C

Light up the landscape with the electric purple color of 'Miss Violet' buddleia. Pure, saturated color, luxuriously long flower spires, and a refined, semi-dwarf habit set it head and shoulders above the rest. Non-invasive. Grows 4-5' tall and wide. Zone: 5-9

Callicarpa americana | American beautyberry

3 gallon... \$20 SEC C

Callicarpa americana, commonly called beautyberry, is a loose open shrub valued for its spectacular fruits. The relatively insignificant flowers develop into prolific bright violet to magenta berry-like drupes which encircle the stem. These fruits remain attractive for a long time although they are generally gone before severe winter weather. Grows 3-6' tall and wide. Zone: 6-10

Calycanthus floridus | sweetshrub

3 gallon... \$24 SEC C

A dense, rounded, native deciduous shrub that produces suckers and forms colonies. Very fragrant, reddish-brown flowers begin in spring and continue into summer. Lustrous, dark green (pale beneath), ovate leaves turn golden yellow in fall. Prefers rich, loamy, well-drained soils but will tolerate clay. Commonly called Carolina allspice. Prune after flowering. Grows 6-10' tall and 6-12' wide. Zone: 4-9

Cephalanthus occidentalis | buttonbush

3 gallon... \$32 SEC B

A rounded, open branched, wetland shrub with tiny, creamy white flowers (1") in dense spherical heads. Sweetly fragrant and produced over a long period in late spring and summer. Typically grows in places that have standing water part of the year. Cannot tolerate drought. Responds well to pruning. Excellent for a rain garden! Typically grows 5-12' tall and 4-8' wide. Zone: 5-9

Cephalanthus occidentalis Sugar Shack® | dwarf buttonbush

1 gallon... \$22 SEC B

Buttonbush has long been prized as a native, but it was way too big for most landscapes. Not anymore! Sugar Shack® is half the size and adds colorful red fruit and glossy foliage. Add in cool looking, fragrant white flowers and you've got a delightful plant that shines from spring to fall. Grows 3-4' tall and wide. Zone: 4-10

Clethra alnifolia | sweet pepperbush

3 gallon... \$24 SEC C

A tall, many-branched, leafy shrub with spike-like, upright clusters of fragrant flowers. This shrub has erect, multiple stems; exfoliating bark; and simple, oval, toothed leaves which turn dull yellow to orange in fall. The dense, narrow, cylindrical flower spikes are often clustered together at branch ends. Fragrant flowers are followed by brown capsules which persist through winter. Grows 3-8' tall and 4-6' wide. Zone: 3-9

Clethra alnifolia 'Ruby Spice' | sweet pepperbush

1 gallon... \$16 SEC C

A deciduous shrub that is rounded, suckering, and densely branched, and is noted for producing a mid to late summer bloom of sweetly fragrant rose-pink flowers that stand above glossy green foliage. The leaves turn to attractive shades of yellow to golden brown in fall. The compact habit is excellent for small gardens. Effective in mass, mixed into perennial borders or along foundations. Grows 6' tall and 5' wide. Zone: 4-8

Clethra alnifolia Vanilla Spice® | sweet pepperbush

1 gallon... \$22 SEC C

This delightful, deer-resistant native plant attracts butterflies and hummingbirds. The attractive, glossy dark green leaves set off the pure white summer flowers. The flowers are wonderfully fragrant! Plant it near the deck or patio to enjoy the sweet scent in mid-summer. Selected for its extra large flowers - individual florets are roughly double the size of other varieties. Grows 3-6' tall and 3-5' wide. Zone: 4-9

Deutzia scabra 'Variegata' | fuzzy deutzia

7 gallon... \$40 SEC C

This old-fashioned flowering deciduous shrub is very pretty and breezy with panicles of fragrant white flowers in late spring/early summer. White-splashed and speckled leaves make this shrub impossible not to notice. Grows 4-6' tall and wide. Zone: 3-9

Euonymus americanus | strawberry bush

3 gallon... \$22 SH1

A low maintenance deciduous shrub native to the southeastern US. It has attractive yellow-green fall foliage and striking green stems in winter. *Euonymus americanus* has an open, airy habit that is sprawling when young but more erect as the plant matures. Fertilize it lightly as too much can burn the foliage. It can be grown on clay soils and is drought tolerant but also tolerates wet soils. Its bark is green but does split and become darker as the tree ages. Grows 4-6' tall and wide. Zone: 6-9

Hydrangea arborescens Invincibelle Sublime™ | smooth hydrangea

1 gallon... \$24 SH1

Invincibelle Sublime™ hydrangea (*H. arborescens*) ushers in a new day for full-sized smooth hydrangeas, with cloud-like mophead flowers floating above the plant on super-sturdy stems. Each floret of the big, fluffy blooms is a deeply saturated tourmaline-green that looks refreshing and intriguing in the garden all summer long. Very dark green foliage sets off the lively green of the blooms. Makes a fantastic cut flower, both fresh and dried, if you can bring yourself to remove them from the fabulous plant. Blooms on new wood. Grows 3.5-6' tall and wide. Zone: 3-9

Hydrangea arborescens Invincibelle Wee White® | smooth hydrangea

1 gallon... \$24 SH1

The first dwarf 'Annabelle' type hydrangea in the world! This cute little landscape plant ensures that any landscape can enjoy the reliability, low-maintenance, and season-long beauty of hydrangeas. It naturally grows as a tidy, rounded mound. Each flower emerges a soft, blush pink before changing to white, and is held up on a strong, supportive stem for a display that looks more like a bouquet of flowers than a landscape plant. Blooming begins in early summer and continues through frost, with new flowers appearing the whole time. Grows 12-30" tall and wide. Zone: 3-8

Hydrangea macrophylla BloomStruck® | bigleaf hydrangea

3 gallon ... \$40

SH1

BloomStruck® bigleaf hydrangea provides unforgettable impact in the landscape. This reblooming hydrangea adds color to the garden all season long with vivid rose-pink or blue-purple hydrangea flower heads, depending on your soil pH. BloomStruck® also has incredibly beautiful red-purple stems and dark green leaves with red petioles and red veins, which give great contrast to your other garden shrubs, perennials, and annuals. BloomStruck® has extremely strong stems, above average heat tolerance, and great disease resistance, especially to powdery mildew. It is a perfect combination of beauty and hardiness for your garden! Grows 3-5' tall and 4-5' wide. Zone: 5-9

Hydrangea macrophylla 'Penny Mac' | bigleaf hydrangea

3 gallon ... \$30

SH1

This popular selection provides a prolific display of fantastic mophead flowers repeatedly throughout summer – with minimal care. Blooms tend to be blue in acid soils and pink in more alkaline soils. Mass for a dramatic effect or combine with perennials and shrubs in beds and borders. Grows 4-6' tall and 3-4' wide. Zone: 5-9

Hydrangea macrophylla Summer Crush® | bigleaf hydrangea

3 gallon ... \$40

SH1

With a profusion of big raspberry red or neon purple blooms, Summer Crush® bigleaf hydrangea brings floral quality blooms to your garden or patio container. Not only is it drop-dead gorgeous, but it is compact, too. Summer Crush® only grows to a mature size of 18 to 36 inches tall and wide, so you can count on it to stay small, neat, and tidy throughout the season. That compact size paired with the stunning blooms make Summer Crush® a must for decorative containers for your patios, deck, entry, and more. Summer Crush® will make your outdoor living space the talk of the neighborhood. Grows 18-36" tall and wide. Zone: 4-9

Hydrangea macrophylla Wee Bit Innocent™ | bigleaf hydrangea

1 gallon ... \$22

SH1

Don't let its name fool you – the Wee Bit Innocent® bigleaf hydrangea packs a big punch in a compact size. This charming reblooming hydrangea is perfect for gardeners with limited space who still crave an abundance of blooms. Its sturdy stems hold up a profusion of pale pink double florets, creating a delightful display. For gardeners who prefer cool tones, planting Wee Bit Innocent® in acidic soil will transform the blooms to a lovely shade of blue. Grows 2' tall and 3' wide. Zone: 5-9

Hydrangea paniculata Little Lime Punch™ | panicle hydrangea

1 gallon ... \$22

SH1

Its blooms emerge lime green, but they mature a little differently. Flowers change progressively from the bottom up in a gorgeous array of white, light pink, and rich Hawaiian Punch red! As it reblooms throughout the summer you'll see these four colors mix to create a truly memorable show. With a compact habit and strong stems, you'll find that it's as useful in the landscape as it is beautiful. Fantastic color show - a mix of white, green, and pink all on one bloom! Grows 3-5' tall and wide. Zone: 3-8

Hydrangea quercifolia | oakleaf hydrangea

3 gallon ... \$22

SH1

A mound-shaped shrub, 3-12 ft. tall. Multiple stems are sparingly branched with picturesque canes. Older stems are exfoliating to reveal a rich, brown inner bark. The showy inflorescence of greenish flowers turns white then purplish and persists on the bush until mid-winter. The foliage, shaped something like that of red oak, becomes colorful in fall. Grows 6-8' tall and wide. Zone: 5-9

Hydrangea quercifolia Gatsby Moon® | oakleaf hydrangea

1 gallon ... \$22 SH1

Gatsby Moon® oakleaf hydrangea is truly swoon-worthy, thanks to its very large, very full mophead blooms. Few other oakleaf hydrangeas can compare in terms of flower volume: each inflorescence is comprised of densely-packed white florets that combine to make a sturdy, thick bloom. It also boasts beautiful foliage, especially in autumn, when it turns an array of red shades. A very special hydrangea for the gardener who can't get enough of the oakleaf! Grows 6-8' tall and wide. Zone: 5-9

Hydrangea quercifolia 'Munchkin' | dwarf oakleaf hydrangea

2 gallon ... \$30 SH1

An exceptional U.S. National Arboretum introduction. Enjoy a profusion of robust flower clusters that open white and age to pink, remaining upright even after heavy rain. Dark green, deeply lobed oak-like foliage turns brilliant mahogany in fall. Compact and well-suited for smaller landscapes, in groups, or as a hedge. Grows 3-4.5' tall and wide. Zone: 5-9

Hydrangea radiata Invincibelle Lace® | silver-leaf hydrangea

1 gallon ... \$22 SH1

This premiere plant flowers in delicate, pollen- and nectar-rich florets that not only provide amazing curb appeal but also supply necessary nutrients for butterflies and bees. Hydrangea blooms revive the garden in summer and sustain it through fall, but don't underestimate the beauty of the hydrangea bush itself. Even the stems, which allow the florets to gracefully sway in the wind, add to their appeal. And these stems are strong, wiry, and dark ruby hued – gorgeous! Grows 5' tall and wide. Zone: 3-8

Hydrangea serrata Tiny Tuff Stuff™ | mountain hydrangea

1 gallon ... \$22 SH1

Compact, bud-hardy reblooming hydrangea. It's tough, but delicate – Tiny Tuff Stuff™ hydrangea is extremely cold tolerant and beautiful. Extremely bud-hardy, each year it produces abundant lacecap flowers comprised of doubled sepals which appear on both old and new wood. While this plant leans to blue, the flower color may range from blue to pink to white. Grows 18-24" tall and wide. Zone: 5-9

Hydrangea serrata Tuff Stuff Ah-ha® | mountain hydrangea

1 gallon ... \$22 SH1

Ah-ha: you've found it! The perfect hydrangea for beauty, blooms, and blues, Tuff Stuff Ah-Ha® mountain hydrangea. Each lacecap flower is surrounded by a ring of lovely waterlily-like florets that are the most beautiful blue or pink colors. Tuff Stuff Ah-Ha® hydrangea is also an outstanding rebloomer, so you'll get more flowers over a longer period and much more to enjoy than conventional hydrangeas. Grows 24-36" tall and wide. Zone: 5-9

Hydrangea x Fairytrail™ Green | cascade hydrangea

1 gallon ... \$22 SH1

The Fairytrail™ series of cascading hydrangeas are known for their graceful arching branches, each node topped with a big gorgeous bloom. Meaning you get a fluffed up, fountain-like mass of flowers in the late spring. A brand new way to enjoy hydrangeas! Fairytrail™ Green, in particular, features cool, lime-green flowers. It is well suited for containers, hanging baskets, and areas in the landscape where it can drape dramatically, like at the top of a retaining wall. Top reasons to grow Fairytrail™ Green cascade hydrangea: Elegant green flowers, interesting habit, abundant blooms, heat tolerant, deadheading not necessary. Grows 4-5' tall and wide. Zone: 6-9

Hydrangea x Fairytrail™ White | cascade hydrangea

1 gallon... \$22 SH1

Add a touch of romance and grace to your patio with Fairytrail™ White hydrangea. Fairytrail™ White boasts an abundance of mophead flowers in spring, with arching branches featuring dozens of flower nodes. It thrives in containers and looks absolutely dreamy, cascading out of the sides of pots. This hydrangea is also exceptionally heat-tolerant, shade-tolerant, and low maintenance! Grows 4' tall and 4-5' wide. Zone: 6-9

Hypericum frondosum 'Sunburst' | St. John's wort

3 gallon... \$18 SEC B

Hypericum frondosum is a small, dense, upright, mounded deciduous shrub that is noted for its large showy golden yellow flowers and attractive blue-green foliage. It is native from Kentucky to North Carolina south to Georgia, Alabama and Texas. Blooms in June and July. Flowers give way to reddish-brown narrow ovoid fruit capsules that ripen in September and persist well into winter. Attractive exfoliating reddish-brown to purplish bark develops on mature stems. Foliage is semi-evergreen to evergreen in the southern part of its growing range. Deer resistant. Grows 3-4' tall and wide. Zone:5-8

Ilex verticillata | winterberry holly

size/price varies SEC B

Winterberry holly produces bright red berries that really shine in the fall and winter landscape. It is a deciduous holly, which means it loses its leaves in fall, but this makes that vivid fruit even showier. The berries can also be cut for use in floral arrangements. To produce berries a male and female plant are both required. Grows 3-12' tall and 3-12' wide. Zone: 3-9

	SEX	BERRY	SIZE	PRICE
Berry Poppins®	female	red	4-5'tall, 3-4' wide	1 gallon...\$20
Mr. Poppins®	male	no berry	8-12'tall, 6-10' wide	1 gallon...\$20
'Southern Gentleman'	male	no berry	4-5'tall, 3-4' wide	3 gallon...\$32
'Winter Red'	female	red	8-12'tall, 6-10' wide	3 gallon...\$32
'Red Sprite'	female	red	3-5' tall, wide	3 gallon...\$32

Itea virginica Fizzy Mizzy® | Virginia sweetspire

1 gallon... \$22 SEC C

A sweetspire that literally stands out in the landscape! Its abundant upright flower spikes are bright white and carry a light, lovely fragrance that attracts people and pollinators. An early summer bloom time helps bridge the gap between the seasons seamlessly and its thick, dark green foliage is handsome enough to carry the show for the rest of the season. With a petite size, you'll be able to use it in any size garden. Deer resistant. Very tidy, uniform habit. Grows 2-3' tall and wide. Zone: 5-9

Itea virginica 'Henry's Garnet' | Virginia sweetspire

3 gallon... \$22 SEC C

A compact, rounded, suckering shrub with arching branches. Late spring flowers are cylindrical, creamy white, fragrant, and borne in drooping racemes. Leaves turn dark red in fall and persist through December. Easily grown in average, well-drained soil. Good for wet locations. Grows 3-4' tall and 4-6' wide. Zone: 5-9

Itea virginica Scentlandia® | sweetspire

1 gallon... \$18 SEC C

Fabulously fragrant. Sweetspire is beloved for so many reasons: it's native, shade tolerant, deer resistant, has handsome foliage, amazing fall color, very showy flowers, and of course, delicious fragrance. So how could Scentlandia® sweetspire improve on the classic? Better hardiness, for one, so that even gardeners in the colder parts of its hardiness zone can enjoy the fragrance, year after year. It also boasts brighter, more consistent fall color, along with a compact, refined habit. Grows 2-3' tall and wide. Zone: 5-9

Lagerstromeria Barista® ‘Like a Latte’ | crape myrtle

5 gallon... \$36 SEC D

All the best qualities of a crape myrtle in a compact shape with enhanced disease resistance and cold hardiness. Fills with gorgeous clusters of white blooms from July to September, and both beautiful, hearty, and very drought resistant once established. The dark green leaves provide a perfect backdrop for the blooms and a beautiful contrast to the brighter greens of your garden. Grows 2-3’ tall and wide. Zone: 7-9

Lindera benzoin | spice bush

3 gallon... \$24 SEC C

Spicebush is a single- or few-stemmed, deciduous shrub that is a butterfly larval host. Dense clusters of tiny, pale yellow flowers bloom before the leaves from globose buds along the twigs. Flowers occur in umbel-like clusters and are followed by glossy red fruit. Both the fruit and foliage are aromatic. Leaves turn a colorful golden-yellow in fall. In the North this plant is thought of as the “forsythia of the wilds” because its early spring flowering gives a subtle yellow tinge to many lowland woods where it is common. A tea can be made from the aromatic leaves and twigs. Grows to 6-12’ tall and wide. Zone: 4-9

Magnolia ‘Jane’ | magnolia

3 gallon... \$30 SEC B

‘Jane’ is primarily noted for its shrubby habit, large reddish-purple flowers with white interiors and late bloom that is less apt to suffer frost damage in spring. Large cup-shaped flowers (to 8” diameter) are reddish-purple with white inside. Flowers bloom shortly before the foliage begins to appear. Flowers may sporadically repeat bloom in mid-summer. Ovate leaves to 6” long emerge with copper-red tints in spring, turn dark green by late spring and finally acquire yellow to bronze-copper tones in fall. Grows to 10-15’ tall and 8-12’ wide. Zone: 4-8

Philadelphus coronarius | fragrant mockorange

3 gallon... \$28 SEC B

This shrub is an old favorite, with its perfect white blooms, sweet scent and peeling reddish bark. While perhaps not as fitting for a more modern landscape, it is sure to bring up much nostalgia in a more traditional setting. Grows 10-12’ tall and 8-10’ wide. Zone: 4-8

Philadelphus coronarius Illuminati Sparks™ | mockorange

1 gallon... \$22 SEC B

Bring back the nostalgia of grandma’s garden with the citrus scent of Illuminati Sparks™ mockorange. The old-fashion look of mockorange has been updated with a pleasing look and better garden performance. Illuminati Sparks™ features stunning variegated foliage that is dark green with bright golden yellow speckles. In early summer clusters of citrus-scented white flowers emerge on long arching stems with an upright mounding habit. Mockorange is versatile in many soil types, including clay. This shrub blooms off of the old growth so don’t trim until after mid July or you may sacrifice the next season’s blooms. Variegation may disappear in the heat of the summer but it will resume in cooler temperatures. Grows 3-4’ tall and wide. Zone: 4-7

Physocarpus opulifolius Lucky Devil® | ninebark

3 gallon... \$36 SEC C

With bright yellow leaves, Lucky Devil® Ninebark is a spectacular shrub to serve as a focal point, informal hedge, or along the foundation of your home. With beautiful white blooms in spring, and orange fall color, this compact shrub is a multi-season wonder. While some yellow-leaved plants may bleach out in full sun, Lucky Devil® maintains its bright color to capture attention and serve as a strong accent to other plants in the landscape. Grows 3-4’ tall and wide. Zone: 3-7

Physocarpus opulifolius Summer Wine® | ninebark

1 gallon ... \$22 SEC C

Easy, durable summer color! An exciting improvement to Ninebark, Summer Wine® combines the fine texture and compact branching of *Physocarpus* 'Nanus' with the dark foliage of *Physocarpus* 'Diabolo.' Summer Wine® is an easy way to introduce wine-colored foliage into the home garden. It is fast-growing and has few, if any, pest problems. Its graceful, arching habit makes it very appealing in the landscape. It adds beautiful color and vibrancy to your garden, especially in spring. In early June it blooms with white button-like flowers that accent the leaves nicely. Pruning and other maintenance is rarely needed. Use it as a bold accent or part of a mixed border. Summer Wine® may even be cut for use in arrangements. Less apt to spread by suckering, this is a trouble-free addition to the home landscape. Grows 5-8' tall and wide. Zone: 3-7

Prunus persica 'Bonfire' | ornamental peach

3 gallon ... \$32 SEC D

'Bonfire' is a dwarf shrub which typically grows to 5' tall in 5 years. Features attractive, dark red leaves which hold their color throughout the growing season. Double pink-red flowers are produced in very early spring. Inedible peach-like fruits mature in summer but are often hidden from view by the dense foliage. Grows 4-6' tall and 4-6' wide. Zone 5-8

Rhus aromatica | fragrant sumac

3 gallon ... \$24 SEC C

Fragrant sumac is a sprawling shrub with velvety twigs and lower branches turned up at the tips. Glossy, aromatic, somewhat blue-green, coarsely toothed, trifoliate leaves turn orange, red, purple and yellow in the fall. In spring, fragrant sumac flowers appear before the foliage. The flower is a nectar source for adult butterflies. Fragrant sumac colonizes to form thickets and looks best when planted en masse or in drift-like plantings as it occurs in nature. It is fast growing, generally pest and disease-free, and drought-tolerant. Butterfly larval host plant. Excellent for erosion control. Grows 2-6' tall and 6-10' wide. Zone 3-9

Styrax americanus | American snowbell

3 gallon ... \$24 SEC B

A wetland species noted for showy, bell-shaped, pendulous, mildly fragrant, white flowers (1/2") from leaf axils or stem ends, in late spring (single or clusters of 1-4). Elliptic dark green leaves (to 3"). Prune as needed in winter. Best grown in acidic, organically rich, medium to wet soils with reasonable soil drainage. A host plant for promethea moth. Grows to 6-10' tall and wide. Zone: 6-9

Swida (Cornus) amomum | silky dogwood

3 gallon ... \$22 SEC C

Silky dogwood is a vigorous, spreading shrub that boats purple-red stems and dark green leaves covered in silky hairs underneath. Flat-topped clusters of tiny, creamy white flowers appear in late spring to early summer. While not particularly showy, they give way to attractive clusters of white berries, turning almost porcelain-blue as they ripen in late summer. Birds devour the berries. This shrub is a great choice for moist woodlands, shrub borders, naturalized areas, along streams/ponds or erosion control. Deer resistant. Grows 6-12' tall and wide. Zone: 5-8

Syringa x hyacinthiflora Scentara® Double Blue | lilac

1 gallon ... \$18 SEC C

A deciduous shrub with an upright growing habit. A heavy bloomer with very fragrant cool purple double floret blooms that take on a blue tone in sunshine. It has excellent disease resistance. Grows 72-96" tall and wide. Zone: 2-8

Viburnum carlesii Spice Baby™ | Koreanspice viburnum

1 gallon... \$22 SEC C

Compact and fragrant. With its fragrant spring blooms and attractive habit, compact Spice Baby™ Koreanspice viburnum brings greater versatility to this always-popular genus. Stronger growing than other compact varieties, it's an ideal way to bring the intoxicating fragrance of Koreanspice viburnum to small spaces. Grows 3.5-5' tall and wide. Zone: 4-8

Viburnum carlesii Spice Girl® | Koreanspice viburnum

1 gallon... \$22 SEC C

With its sweet pink blooms and stunning autumn foliage, Spice Girl® Koreanspice viburnum (*Viburnum carlesii*) is the perfect shrub to add multi-season interest to your garden. Each spring, Spice Girl® is studded with hundreds of fragrant blooms that fill your landscape with a spicy-sweet fragrance. Come fall, its green leaves transition to a rich red hue creating a colorful foliage display that you'll look forward to year after year. Spice Girl® is one memorable shrub! Add its shade tolerance and deer resistance into the mix, and you'll find yourself wondering why you didn't add it to your garden sooner. Try planting it as a fragrant flowering hedge or let it be the star of your landscape; however you use this viburnum, there is plenty to enjoy thanks to its fragrant flowers, berries, and fall foliage. Grows 7' tall and wide. Zone: 4-8

Viburnum dentatum | arrowwood viburnum

3 gallon... \$22 SEC C

An upright, rounded, multi-stemmed, shrub with white flowers in flat-topped corymbs in late spring. Flowers give way to blue-black drupes, which attract birds and wildlife. Ovate, toothed, glossy dark green leaves. Fall color ranges from drab yellow to orange and red. Vigorous and reliable. Use for shrub borders, hedges, and screen. A nice background for native plantings. Grow in average, medium, well-drained soil. Prune after flowering. Grows 6-10' tall and wide. Zone: 2-8

Weigela florida Midnight Sun® | weigela

1 gallon... \$22 SEC C

Celebrate summer with Midnight Sun™ weigela, a neat and tidy bun-shaped weigela with glossy, blazing orange and red summer-autumn foliage. Perfect for the front of the border, it functions much as a coleus would, but without having to replant it every year. It does bear pink flowers in spring, however, this plant's form and colorful summer through autumn foliage are what makes it special. Grows 12-18" tall and wide. Zone: 4-8

Xanthorrhiza simplicissima | yellowroot

1 gallon... \$10 SH1

In its natural habitat yellowroot is found on edges of streams or damp woods in sandy soil under a canopy of dappled sunlight. Flowers appear in spring in drooping panicles and fall color is yellow to reds. Spreads by suckers. It will grow in well-drained moist sandy or clay loams. The best fall color occurs with some sun. Use this plant as a ground cover on banks of streams, woodland gardens and naturalized areas. Its common name, yellowroot, comes from the roots of the plant, which are yellow. The roots and stems can be used in dye making. Stems have also been used in basket weaving. Grows 1-3' tall and 6-10' wide. Zone: 3-9

Acer buergerianum | trident maple

5 gallon... \$64 SEC B

Native to China, Korea and Japan. It is a small, rounded, deciduous tree that typically grows rather slowly. Triangular, three-lobed leaves are glossy green above and pale green beneath. Variable but usually attractive fall color features shades of dark red and orange. Non-showy, greenish-yellow flowers bloom in spring (April-May). Samaras mature in fall. Exfoliating bark will develop on mature trunks. Grows 20-30' tall and wide. Zone: 5-9

Acer palmatum 'Katusra' | Japanese maple

1 gallon... \$20 SH1

A lovely deciduous shrub, small tree with striking foliage season after season. Emerging golden-orange with pink edges in early spring, the delicate foliage of small 5-7 lobed leaves matures to bright green in the summer before turning brilliant shades of orange and yellow in the fall. Grows 10-12' tall and wide. Zone: 5-9

Acer palmatum Metamorphosa® | Japanese maple

1 gallon... \$26 SH1

A shrubby Japanese maple noted for the neat texture and ever-changing color of its foliage. In spring, the dissected foliage emerges yellow; a pink margin soon develops, then that shifts to white with shades of reddish-orange in summer. In autumn, the entire leaf transforms to orange-red and eventually red-violet. A finalist in RHS Plant of the Year competition at the Chelsea Flower Show. Grows to 5-13' tall and 3-10' wide. Zone: 5-8

Aesculus pavia | red buckeye

3 gallon... \$30 SEC C

A handsome shrub or small tree with showy thyrses (often called panicles) of deep red or yellow, campanulate flowers in early spring. It is normal for this plant to drop its leaves by the end of summer, so try to place it where it will be highly visible in the early spring but less noticeable after it drops its leaves. The seeds and young shoots are poisonous if ingested, and indigenous people crushed these parts and put them in water to stupefy fish for easier capture. Soap may be obtained from the roots and a black dye from the wood. Grows 10-20' tall and 15' wide. Zone: 4-8

Benthamidia (Cornus) florida | flowering dogwood

5 gallon... \$42 SEC C

Flowering dogwood is one of our finest native trees and is attractive in all seasons. It has gorgeous white-bracted flowers in spring, red berries and leaves in the fall, and is followed by striking bark and branch structure all winter long. Flowering dogwood typically develops an irregular rounded habit. It prefers well-drained acid soils and it makes an excellent specimen, understory tree or woodland edge tree as long as it receives shade during the heat of the day. Spring azure butterfly larval host plant. Grows 15-30' tall and wide. Zone: 5-9

Benthamidia (Cornus) florida f. *rubra* | flowering dogwood

5 gallon... \$42 SEC C

Small deciduous tree with a low branching, broadly pyramidal but somewhat flat-topped habit. Very popular landscaping tree. Blooms in early spring (April) shortly after, but usually overlapping, the bloom period of the redbuds. Pink to reddish pink, petal-like bracts which open flat, giving the appearance of a single, large, 3-4" diameter, four-petaled, pink flower. Bright red fruits are bitter and inedible to humans but are loved by birds. Fruits mature in late summer to early fall and may persist until late in the year. Spring azure butterfly larval host plant. Grows 15-30' tall. Zone: 5-9

Benthamidia japonica (*Cornus kousa*) | kousa dogwood

5 gallon... \$42 SEC C

Lovely, small deciduous single or multi-trunked tree with a spreading crown and long-lasting, showy, white spring “blooms” – four narrowly pointed petal-like white bracts that surround insignificant yellowish-green true flowers. Has graceful, horizontal-tiered branching. Red berry-like fruits are edible, but usually left for birds. A striking flowering tree with attractive shades of reddish-purple to scarlet fall color. Mottled, exfoliating, tan and gray bark on mature trees is attractive in winter. Popular as a specimen or small grouping around the home, near patios or in lawns. Also effective in woodland, bird or native plant gardens. Grows 15-30’ tall. Zone: 5-8

Cercis canadensis | Eastern redbud

size/price varies SEC D

Beautiful deciduous garden tree valued for its profusion of rosy pink flowers that cloak the bare branches to bridge the gap between winter and spring! Heart-shaped foliage emerges as the blooms fade and turns yellow in autumn before dropping. A wonderful landscape specimen with a nicely rounded crown. Works well as a specimen tree, in small groups, and is attractive in naturalized settings. The bark used as an astringent in treatment of dysentery, flowers eaten in salads or fried. Native Americans boiled the bark to make tea to treat whooping cough, roots and inner bark used for fevers, congestion, and vomiting. Zone: 4-9

Chionanthus virginicus | fringetree

3 gallon... \$34 SEC B

A native shrub or small tree with a spreading, rounded habit. Slightly fragrant, spring-blooming flowers in airy, terminal, drooping clusters (4-6”) of fringe-like, creamy white petals. Separate male and female plants (dioecious). Wide, spear-shaped leaves (to 8”) turn yellow in fall. Birds enjoy the grape-like fruit in late summer. Prefers moist, fertile soils. Intolerant of prolonged dry. Grows 10-20’ tall and wide. Zone: 3-9

Lagerstroemia indica ‘Catawba’ | crape myrtle

3 gallon... \$28 SEC D

‘Catawba’ has long-lasting dark purple flowers that appear in the late summer. With bronze-colored new leaves in the spring, its brilliant orange-red fall color, coupled with its interesting smooth bark makes for great year-round interest. It can be trained as a single trunk though its tendency is toward a multitruncked habit. It has been bred to be mildew resistant. Grows 15’ tall and 14’ wide. Zones 7-9

Magnolia macrophylla var. *ashei* | Ashe’s magnolia

3 gallon... \$34 SEC B

An understory, spreading deciduous shrub or small tree with large (to 2’), light-green glossy leaves. Flowers in early summer with white jasmine scented blossoms up to 10” across. Grow in moist, well-drained, preferably acidic to neutral soil; does not tolerate wet feet. Grows 30’ tall and wide. Zone: 5-8

Magnolia stellata 'Centennial Blush' | star magnolia

2 gallon... \$38 SEC D

'Centennial Blush' star magnolia provides a fantastic floral display of fragrant, delicate pink flowers covering the entire plant in spring. Attractive medium green leaves on an interesting branching structure follows in summer which eventually turn shades of yellow and bronze in autumn. Well adapted to a variety of soils, 'Centennial Blush' can be grown as a large shrub or a small tree and is perfectly suited for small urban gardens. Grows 12-18' tall and 10-15' wide. Zone: 4-9

Magnolia virginiana | sweet bay magnolia

7 gallon... \$58 SEC C

In the northern part of its cultivated growing range, it typically grows as either a 15-20' tall tree with a spreading, rounded crown or as a shorter, suckering, open, multi-stemmed shrub. In the deep South, it is apt to be more tree-like, sometimes growing to 60' tall. Features cup-shaped, sweetly fragrant (lemony), 9-12 petaled, creamy white, waxy flowers (2-3" diameter) which appear in mid-spring and sometimes continue sporadically throughout the summer. Oblong-lanceolate shiny green foliage is silvery beneath. Cone-like fruits with bright red seeds mature in fall and can be showy. This tree is a larval host plant for Spicebush Swallowtail and Eastern Tiger Swallowtail. Grows 10-35' tall and wide. Zone: 5-10

Malus sp. | crabapple

size/price varies SEC C

Flowering crab apple trees are a popular choice for spring flowering in colder regions. They are much hardier than other trees that flower in spring, such as Japanese Flowering Cherry, and they flower later, in May. They make ideal spring trees in cold areas, and in warmer regions they continue the spring display later into the year, as well as adding stronger colors. Zone: 4-9

	BLOOM	HEIGHT	PRICE
'Adams'	deep pink/red	15-20' tall, wide	5 gallon...\$38
'Callaway'	white	15-25' tall, 12-20' wide	3 gallon...\$32
'Profusion'	violet red	15-20'tall, 20-30' wide	5 gallon...\$40

Royal Raindrops®	fuchsia pink	15-20' tall, 12-15' wide	7 gallon...\$95

Pinckneya bracteata | fevertree

2 gallon... \$28 SH1

In earlier days, malaria and other fevers were treated at home with a medicine made from the inner bark of this tree giving it the common name "fevertree." The unusual, open, coarse habit of growth and showy flowers make this a conversation piece in any yard. Use it as an accent in a sunny shrub border or as a specimen near the patio or deck. This is certainly a tree to consider when planning a yard due to the small size and pest resistance. Grows 15-20' tall and 12-18' wide. Zone: 7-9

Prunus persica 'Pink Cascade' | weeping peach

3 gallon... \$54 SEC D

A truly beautiful tree with exquisite cascading branches of double rose-pink blooms in spring. Purple-red foliage. The ornamental version of the edible peach, flowering blossoms add interest to the garden year-round. Prefers well drained, organic rich soil. Suitable as a specimen plant in a small garden. Grows 15-20' tall and wide. Zone: 5-9

Prunus triloba | flowering almond

3 gallon ... \$32 SEC D

Also known as double flowering plum or flowering almond, *Prunus triloba* is a real show-stopper in spring. It is covered with masses of rich pink blooms in late April to early May. It is a large shrub or small tree with a spreading habit and bronze yellow fall color. Very hardy. May be pruned to maintain at a smaller size. Grows up to 13' tall and wide. Zone: 3-8

Swida (Cornus) alterniflora | pagoda dogwood

3 gallon ... \$30 SEC C

Unlike all other native dogwoods, this species has alternate rather than opposite leaves. The name Pagoda Dogwood alludes to the flat-topped crown, with horizontal layers of branches. The bitter berrylike fruits of this and other dogwoods are consumed in quantities in fall and winter by wildlife. Grows to 15-25' tall. Zone: 3-7

Vaccinium arboreum | sparkleberry

3 gallon ... \$24 SEC C

A coarse spreading, deciduous shrub or small tree. It usually grows 12-15 ft., but can reach 25 ft. Fragrant flowers resemble tiny, white bells. Inedible, persistent, black berries follow. Shiny, dark-green leaves turn deep red in the fall. Bark exfoliates and is composed of grays, rich browns, oranges, and reddish browns. A shrub or tree with short trunk, irregular crown of crooked branches, small, glossy, elliptical leaves, and shiny black berries. The fruit has thin, slightly sweet pulp and large seeds. Although not palatable to humans, the berries are consumed by wildlife. Grows 6-20' tall. Zones: 6-9

Viburnum obovatum | Walter's viburnum

3 gallon ... \$22 SEC B

A shrub or small tree featuring small, shiny leaves, and tiny, creamy white flowers in flat topped cymes. Early spring flowers are mildly fragrant and very showy. Red fruits (1/4") ripen to black. Often has multiple trunks and may sucker and form a thicket. Grow in moist to wet soils, but once established, does fine in normal landscape situations. Grows up to 30' tall (15' typically). Zone: 6-9

Acer rubrum 'Armstrong' | red maple

5 gallon ... \$62 SEC B

'Armstrong' is an exceptional tree in a highly desirable and fast-growing columnar form that grows tall and narrow for those tighter places. It provides aerial beauty, color, and privacy screening. This is a really wonderful tree that keeps its leaves into November/December and puts forth a very colorful display making it a real performer. It really is the perfect tree for so many situations. Grows 45-60' tall and 15-25' wide. Zone: 3-9

Acer rubrum 'October Glory' | red maple

5 gallon ... \$64 SEC B

'October Glory' is a female cultivar that is perhaps best noted for its exceptional fall color. It grows to 40-50' tall with an oval rounded form. Attractive red flowers appear in early spring before the foliage emerges. Flowers give way to red-tinged samaras. Glossy dark green leaves with red stems have 3-5 lobes and are 3-6" across. Leaves retain good green color well into fall. Orange to red fall color for this cultivar is brilliant in most years. Grows 40-50' tall and 30-40' wide. Zone: 4-9

Acer rubrum 'Sun Valley' | red maple

5 gallon ... \$48 SEC B

'Sun Valley' is a U.S. National Arboretum introduction. It is a male selection that is noted for having a symmetrical ovate crown and exceptional red fall color. It typically grows to 21' tall over the first 10 years, eventually maturing to as much as 30-35' tall in ideal growing conditions. Reddish male flowers appear in early spring. No fruit is produced. Medium green leaves (to 4" long). Fall color for this cultivar appears as a brilliant red in late fall. Grows 20-35' tall and 15-25' wide. Zone: 4-7

Acer saccharum FlashFire® | sugar maple

7 gallon ... \$94 SEC B

The Flashfire Maple, often known as the Caddo Sugar Maple, earned its name from the vibrant burnt-orange to red color its leaves turn in the fall. It's famous in Canada and New England for its remarkable red color, with attractive green foliage in spring and summer. You'll love this tree not only for its vivid color, but also for its hardiness and disease resistance. The Flashfire Maple can withstand temperatures as cold as -30° F, while also thriving in the consistent warmth of the southern United States. It's more resistant to mildew and disease than many other trees, and it doesn't mind low humidity or intense sunlight. It has a naturally neat, oval shape, and its five-foot canopy clearance provides year-round visibility. It's an attractive shade, border, or accent tree, with one of the most spectacular fall showings of any maple. Grows 40' tall and 45' wide. Zone: 4-9

Acer x freemanii Autumn Blaze® | Freeman maple

5 gallon ... \$48 SEC B

Acer x freemanii, commonly called Freeman maple, is a hybrid of red maple (*A. rubrum*) and silver maple (*A. saccharinum*). The Freeman maple cultivars commonly sold in commerce today reportedly combine some of the best features of both parents, namely, solid structure, attractive form and showy fall color (from red maple) and adaptability and rapid growth (from silver maple). 'Jeffersred', sold under the trade name of AUTUMN BLAZE, is an older cultivar that was discovered by nurseryman Glenn Jeffers in the late 1960s. This is an upright, fast-growing, deciduous tree with ascending branching and a dense, broad-oval crown. Each medium green leaf is deeply cut with five pointed lobes. As the trade name suggests, the foliage turns into an autumn blaze of orange-red to scarlet-red fall color. Flowers and fruit for this hybrid are very sparse. Grows 50-55' tall and 30-40' wide. Zone: 3-8

Carpinus caroliniana | American hornbeam

3 gallon ... \$24 SH1

A slow-growing understory tree with an attractive globular form. The smooth, gray trunk and larger branches of a mature tree exhibit a distinctive muscle-like fluting. The very hard wood of this tree was used by early Americans to make bowls, tool handles and ox yokes. Easily grown in average, medium moisture soil. Grows 20-35' tall and wide. Zone: 3-9

butterflies

hummingbirds

Castanea mollissima | Chinese chestnut

3 gallon ... \$32 SEC D

Medium sized, low-branched, deciduous tree with an open rounded crown. It is grown as an ornamental tree and/or for its edible nuts. It is noted for its resistance to chestnut blight which has nearly wiped out the native American chestnut (*Castanea dentata*). Features oblong, coarsely toothed, dark green leaves, that are soft green beneath. Leaves turn varying shades of yellow in fall. Aromatic monoecious creamy yellowish-white flowers appear in catkins in late spring. Flowers can be quite showy for a brief period. Flowers are followed by edible chestnuts which are encased in spiny burs – usually 2-3 nuts per bur. A beautiful specimen shade tree for lawns. Grows 40-60' tall. Zone: 4-8

Catalpa bignonioides | Southern catalpa

3 gallon ... \$22 SEC B

The Southern catalpa is a medium sized, flowering deciduous tree with a short, thick trunk and a broadly rounded irregular crown. It is a relatively easily grown shade tree that prefers moderate soils, but is tolerant of clay and wet or dry conditions including seasonal flooding. In nature, it is most often found in rich moist soils by the sides of streams and rivers and it has a reputation for escaping cultivation. This tree has an extensive root system and is sometimes grown to stabilize soil. Grows 30-60' tall and 20-40' wide. Zones: 5-9

Fagus grandifolia | American beech

3 gallon ... \$28 SEC B

A sturdy, imposing, large deciduous tree, it can be beautiful in a large area, but is not recommended for smaller landscapes. American beech prefers moist, well-drained, acid soil, is intolerant of wet or compacted soil, prefers sun but will tolerate shade. It can be difficult to grow other plants or lawn underneath a standing American beech. Beech develops suckers from its vast system of surface roots and entire beech groves have often grown from the roots of a single tree. Fall color is golden bronze and leaves often last into winter. Grows 50-80' high. Zone: 3-9

Fraxinus pennsylvanica | green ash

3 gallon ... \$28 SEC B

A native lowland species. Young trees are pyramidal in shape, gradually maturing to a more rounded but usually irregular crown. Features odd-pinnate compound leaves, each with 5-9 leaflets. Yellow fall foliage. Easily grown in average, medium wet, well-drained soils. Freely self-seeds. Wood is commercially used for tool handles, oars, garden furniture and sports equipment. Grows 50-70' high. Zone: 3-9

Ginkgo biloba | maidenhair tree, ginkgo

3 gallon ... \$24 SEC B

Easily grown in average, medium moisture soil in full sun. Prefers moist, sandy, well-drained soils. Tolerant of a wide range of soil conditions, including both alkaline and acidic soils and compacted soils. Also tolerant of saline conditions, air pollution and heat. Adapts well to most urban environments. A dioecious species. Plant male specimens, as the females produce fruit that becomes messy and smells awful when it falls to the ground in the fall. Grows 50-80' tall. Zone: 3-8

Liquidambar styraciflua 'Rotundiloba' | fruitless sweet gum

7 gallon ... \$50 SEC B

J.C. Raulston introduced the fruitless sweetgum tree in 1997. Unlike its parent, it doesn't produce (or rarely produces) those spiny, messy "gumball" fruits. It also grows slower and has a more open pyramidal shape. The leaves have the same 5 lobes but the tips are rounded rather than pointed. It tolerates sand, loam, clay, acidic, and well-drained soils. It has moderate drought and salt tolerance. The leaves turn deep purple in the fall (USDA hardiness zones 6 and 7) and early winter (USDA hardiness zones 8 and 9). Use as a shade or large lawn tree. Do not plant near driveways or sidewalks due to the aggressive root system. Grows 40-50' tall 20-25' wide. Zone: 3-8

Nyssa sylvatica | black gum

5 gallon ... \$44 SEC B

A stately tree with a straight trunk and rounded crown (more pyramidal when young) that typically grows 30-50' tall, but occasionally to 90'. Primarily dioecious (separate male and female trees), but each tree often has some perfect flowers. Small, greenish-white flowers appear in spring on long stalks (female flowers in sparse clusters and male flowers in dense heads). Although flowers are not showy, they are an excellent nectar source for bees. Flowers give way to oval, 1/2" long fruits which are technically edible but quite sour (hence the common name, sour gum). Fruits mature to a dark blue and are attractive to birds and wildlife. Spectacular scarlet fall color. Grows 30-50' tall and 20-30' wide. Zone: 3-9

Ostrya virginiana | Eastern hop hornbeam

3 gallon ... \$24 SEC B

A small to medium-sized, understory tree with a generally rounded crown. Features birch-like, oval to lance-shaped, sharply serrated, dark yellowish-green leaves. Female catkins are followed by drooping clusters of sac-like, seed-bearing pods which resemble the fruit of hops. Easily grown in average, medium, well-drained soil. Grows 25-40' tall and 20-30' wide. Zone: 3-9

Oxydendrum arboreum | sourwood

3 gallon ... \$30 SEC B

A beautiful small specimen flowering tree with multi-season interest for lawns, patios, shade gardens or open woodland areas. It is perhaps most commonly found on rocky wooded slopes in the Appalachian Mountains, often growing in combination with other heath family members (e.g., azaleas and rhododendrons) that share the same acidic soil preferences. In cultivation, it typically grows 20-25' tall with a straight, slender trunk and narrow oblong crown. In the wild, it may reach 50-60' tall. Gray bark on mature trees is fissured, ridged and scaly. Grows 20-50' tall and 10-25' wide. Zone: 5-9

Platanus occidentalis | American sycamore

7 gallon ... \$45 SEC B

The sycamore is native to lowland areas, typically reaching its largest size along streams, rivers, and floodplains. The signature ornamental feature of this huge tree is its brown bark which exfoliates in irregular pieces (potato chip-like) to reveal creamy white inner bark. Mature trees typically display mottled white bark. It is not known for its fall color which is a yellowish-brown, but the interesting bark provides winter interest. Grows 75-100' tall and wide. Zone: 4-8

Prunus 'Yoshino' | Yoshino cherry

7 gallon ... \$64 SEC C

A cherry tree's blooms are iconic, and the Yoshino is no exception. With full, colorful blooms and strong growth, the Yoshino cherry tree is a must-have for lovers of flowering trees, especially since it's one of the first to bloom each spring. And its exotic branching pattern means a jaw-dropping display: a pure white cloud of delicate flowers that make your landscape look like springtime on parade. It's the star of Washington, D.C.'s Cherry Blossom Festival for a reason. Even better is the fact that the Yoshino is drought resistant and adapts well to an array of soil types. So, whether you're planting your Yoshino in borders along your driveway or as an accent, it's virtually carefree. Forget yard of the month...you'll have the yard of the year with this heavy-blooming, long-lasting tree. Grows 30-40' tall and wide. Zone: 5-8

Quercus bicolor | swamp white oak

7 gallon ... \$50 SEC B

A large tree that forms a broad, open, rounded canopy casting dense shade below. Shiny, dark green, 5-6" leaves turn a showy yellow/brown to red in fall. Oval, one-inch acorns attract a variety of wildlife and birds. Bark is dark brown and deeply ridged and furrowed. Grow with a single leader. Plant in acidic soils. Very long-lived, to 300+ years. Grows 50-70' tall and wide. Zone: 4-8

butterflies

hummingbirds

Quercus hemisphaerica | Darlington oak

Darlington oak is a tardily deciduous native oak tree which grows rapidly to 60 feet or more and has a life span of about 50 years. In nature, it can be found in sandhills, dry hammocks, and other dry, sandy soils. It makes a good shade or street tree, is moderately salt-tolerant and prefers dry sandy soils. The leaves generally stay on the tree until new leaves are formed in spring. The acorns are biennial and loved by wildlife. It is a great tree for use in naturalized areas. It is a butterfly larval host plant. Grows 40-60' tall and 30-40' wide Zones: 6-9

3 gallon... \$22 SEC B

Quercus laurifolia | laurel oak

Quercus laurifolia, also known as swamp laurel oak or diamond leaf oak, is a deciduous oak tree with a broad, rounded crown. It is native to the southeastern and south-central United States, and can be found on alluvial flood plains up to 500 ft in altitude. While it can tolerate wetter sites, it cannot survive continuous or prolonged flooding. The tree is often grown for pulpwood, but it is also popular for landscaping due to its fast growth and pleasing appearance. Its acorns provide food for a variety of wildlife, including raccoons, deer, turkeys, and various birds and rodents. The tree germinates in the spring and can mature within 50 years. Despite being host to a variety of insects, diamond-leaf oak usually does not suffer from serious insect problems. Grows 40-80' tall and 30-40' wide. Zones: 7-9

3 gallon... \$22 SEC B

Quercus macrocarpa | bur oak

A majestic, native of the white oak group, and an excellent shade tree with a broad-spreading, rounded crown. Leathery, dark green leaves (6-12") with rounded lobes vary in shape. Prefers moist well-drained loams but adapts to most soil conditions. Good drought tolerance. May take up to 35 years to bear acorns. Expect 1-2' of growth a year. Grows 60-80' tall and wide. Zone: 3-8

7 gallon... \$54 SEC B

Quercus palustris | pin oak

A medium sized deciduous oak of the red oak group that typically grows 50-70' (less frequently to 100') tall with a broad pyramidal crown. Upper branches are ascending, middle branches are somewhat horizontal and lower branches are descending. Smooth gray-brown bark usually develops ridging with age. Leaves turn deep red in fall. Grows 50- 70' tall and 40-60' wide. Zone: 4-8

7 gallon... \$48 SEC B

Quercus rubra | Northern red oak

Northern red oak is a medium-sized, moderate to fast-growing, deciduous tree with a rounded to broad spreading crown that branches close to the ground. It may grow 50 to 75 feet tall and equally as wide. It has green leaves on the upper sides and the undersides are grayish-white. They have 7 to 11 pointed lobes that are sharply pointed at the tips. The fall foliage is reddish-brown. The Northern red oak prefers full sun, moist to dry, well-drained, acidic, fertile, sandy to loamy soils. Once established, they are drought, dry soil, black walnut, and air pollution tolerant. It is easily transplanted. The Northern red oak is typically planted for its ornamental value due to its shape and fall foliage. It is also an important food source for squirrels, deer, and birds. It may be used as a specimen, shade tree, street tree, and in recreational areas. Grows 50-70' tall and 50-75' wide. Zone: 4-8

7 gallon... \$50 SEC B

Quercus shumardii | Shumard oak

Shumard oak is a native large deciduous tree in the red oak group in the beech family. It is an attractive tree with a pyramidal shape when young and a more open rounded crown at maturity. The trees can reach 70 feet in height and 40 feet wide. It is tolerant of urban conditions like drought, dry soil, and air pollution. Shumard Oak is relatively fast-growing, adaptable and drought tolerant but also tolerates short-term flooding and wind. The lobed leaves often have nice red fall color. Grows 50-70' tall and 30-40' wide. Zone: 5-9

7 gallon... \$48 SEC B

Taxodium ascendens | pond cypress

3 gallon ... \$22 SEC B

A deciduous conifer that is native to the coastal plain from Virginia to Florida to Louisiana. It is most often found on the peripheries of ponds and lakes, hence the common name. It is very similar in form and habit to the common bald cypress (*Taxodium distichum*). In comparison to bald cypress, pond cypress trees (1) are somewhat smaller; (2) have appressed, spirally arranged leaves, (3) have root knees that are more rounded, and (4) usually grow on pond margins as opposed to in the water. Also commonly called dwarf cypress or hat-rack cypress. Foliage turns orange-brown in fall. Grows 50-60' tall and 10-15' wide. Zone: 5-9

Taxodium distichum | bald cypress

5 gallon ... \$30 SEC B

A long-lived, pyramidal conifer (cone-bearing tree) which grows 50-70' tall (less frequently to 125'). Although it looks like a needled evergreen (same family as redwoods) in summer, it is deciduous. Trunks are buttressed (flared or fluted) at the base, and when growing in water, often develop distinctive, knobby root growths ("knees") which protrude above the water surface around the tree. Soft, feathery, yellowish-green foliage turns an attractive orange/ cinnamon-brown in fall. Rounded, wrinkled, purplish-green cones mature to brown. Heavy, straight-grained, rot-resistant wood has been used for a variety of purposes including barrels, railroad ties and shingles. Grows 50-70' tall and 20-45' wide. Zone: 4-9

Tilia americana | basswood

7 gallon ... \$36 SEC B

A fast growing, medium to large deciduous tree with an ovate, rounded crown. Noted for its fragrant pale-yellow flowers in drooping cymes in late spring, small nutlets with attached leafy wings and large ovate dark green leaves. Flowers attract pollinators and honeybees. Prefers moist, fertile, well-drained loams. Tolerates some drought but is intolerant of urban conditions. Use as a lawn or shade tree. Grows 50-80' tall and 30-50' wide. Zone: 2-8

Ulmus americana | American elm

5 gallon ... \$28 SEC B

Medium to large deciduous tree, with a vase-shaped, broad-rounded crown. Small green flowers appear in spring before the foliage emerges. Flowers give way to single-seeded wafer-like samaras (each tiny seed is surrounded by a flattened oval-rounded papery wing). Seeds mature in April-May as the leaves reach full size. Rough-textured, ovate-elliptic, dark green leaves (to 6" long) have toothed margins. Leaves typically turn an undistinguished yellow in fall. May be used as a lawn, shade or street tree. Grows up to 80' tall. Zone: 2-9

Agave x 'Lemon Lime' | century plant

1 gallon... \$30 SEC E

Incredibly beautiful! Handsome rosettes of thick, spiny-edge, blue-green leaves with a lime green stripe down the center of each leaf. Mature plants (at least 10 years old) are topped with a magnificent flower stalk that can reach 20'+ feet tall! Grows 4' tall and 4' wide. Zone: 9-12

*Heterothera canescens* | hoary false golden aster

1 gallon... \$8 SEC E

Use as a low growing plant for a border, in a potted arrangement, in a short meadow or in a mass as a groundcover. The low mat of silvery foliage contrasts nicely both in color and in texture with other plants. Cut back plants in winter to basal rosettes. Good nectar source for small butterflies. Grows 9-12" tall and 6-12" wide. Zone: 4-8

*Tecoma fulva* Chicklet® Orange | esperanza

1 gallon... \$16 SEC E

Tecoma Chicklet® Orange is a compact, non-invasive shrub form that retains all the orange trumpet-shaped flowers of the outsized vine types in a manageable size. Great for pollinators, the orange bell-shaped flowers attract hummingbirds, butterflies, native bees, and moths. This shrub is also somewhat deer resistant. Did we mention hummingbirds love it? A long flowering season of lightly fragrant, uniquely shaped orange flowers makes this an excellent choice to bring color and wildlife to your yard. This flowering shrub will keep producing more deep-orange blooms all season long. *Tecoma* Orange esperanza does well grown in containers or raised beds and is great for lining a low deck or porch. Once established, Chicklet® Orange trumpet bush does not need much watering or fertilizing. It is perfect for out-of-the-way spots where your hose doesn't reach. Grows 3-6' tall 2-4' wide tall. Zone: 8-11

*Yucca filamentosa* 'Color Guard' | Spanish bayonet

5 gallon... \$36 SEC E

'Color Guard' is a gold-centered variegated form. It features leaves with green margins and striking creamy gold centers. Long filamentous curly white threads are found along the leaf margins. Grows 3-6' tall and 2-3' wide. Zone: 4-10

Camellia japonica | Japanese camellia

3 gallon... \$42 SH1

Camellias are an old southern gardening favorite. They bloom in early spring when not much else is blooming and add color to what might otherwise be considered a dreary landscape. These evergreen shrubs prefer shade to part-shade with some protection from drying winter winds. All camellias grow best in well-drained soils that are high in organic matter and slightly acidic (pH 5.5 – 6.5). Excess sun, cold or shade can reduce flowering. Yellow leaves may mean too little acidity in the soil. Some flower bud dropping may be natural, but sometimes may be caused by over-watering or under-watering. Limit pruning to removal of dead or damaged wood, unproductive branches, and disproportionately long shoots. Prune immediately after flowering or in early summer to stimulate branching. The flowers on each plant will usually last three to four weeks. Pruning later in the year can remove flower buds. Grows 7-12' tall and 5-10' wide. Zone: 7-9

	FLOWER COLOR	BLOOM TYPE	SIZE
'Colonial Dame'	white to blush pink	semi-double	10-12' tall, 6-10' wide
'Grace Albriton'	pale pink with darker pink petal points	formal double	8-10' tall, 6-8' wide
'Greensboro Red'	light red	semi-double	8-10' tall, 7-8' wide
'Marie Bracey'	rose pink	fully double	8-10' tall, 6-8' wide

Camellia sasanqua | sasanqua camellia

3 gallon... \$42 SH1

Sasanqua camellias will tolerate a sunnier position than the japonica varieties. They are drought tolerant, fall/winter blooming shrubs that work well as accent plants, hedges, or tall foundation plantings. A good tree form can be achieved by pruning lower branches. There are numerous cultivars available, including dwarf forms. They do well in containers and container plants can be overwintered indoors in greenhouses or cool but bright sunrooms to protect from frost. This plant is slightly salt tolerant. Grows 6-10' tall and 5-7' wide. Zone: 7-9

	FLOWER COLOR	BLOOM TYPE	SIZE
'Leslie Ann'	white with rose edge	semi-double	7-8' tall, 4-5' wide
'Northern Exposure'	white	single	6-8' tall, wide
October Magic® Pink Perplexion™	soft pink	fully double	4-5' tall, wide
'Yuletide'	brilliant red	single	4-5' tall, 6-8' wide

Cryptomeria japonica 'Globosa Nana' | dwarf Japanese cedar

3 gallon... \$32 SEC A

A dwarf globose selection of Japanese cedar with uniform, somewhat loose branching bearing nodding tips, particularly in spring. Awl-like foliage is dense and compact, turning yellowish green in the heat of the summer and more Blueish green in winter. Grows 3-10' tall and wide. Zone: 9-10

Distylium 'Vintage Jade' | distylium

3 gallon... \$32 SEC A

A lovely low spreading shrub with dark green evergreen foliage offers a refreshing touch of green throughout the year. Blooms in late winter with small, reddish-maroon flowers. Distylium is a good alternative for boxwood, cherry laurel, holly and juniper in foundation plantings or anywhere you want low maintenance evergreens. Grows 3-4' tall and 4-5' wide. Zone: 7-9

Fatsia japonica 'Spider's Web' | Japanese aralia

3 gallon... \$36 SH1

A very distinctive evergreen with large palmate leaves. The lobed leaves can reach 16 inches across and provide contrast in the shade garden. Some of the leaves on this variegated variety are bordered with a heavy white speckling that often finds its way into the center of the leaf. Makes a great houseplant for those who live in colder climates. Grows up to 5' tall and wide. Zone: 7-10

Gardenia jasminoides | gardenia

size/price varies SH1

Beloved for their intoxicating fragrance and attractive, waxy, creamy-white flowers contrasting beautifully with their shiny, leathery, dark green leaves, gardenias are irresistible heat-loving evergreen shrubs or trees. Gardenias are not the easiest shrubs to grow, but their exquisite fragrant flowers make up for the extra attention they require. Gardenia plants usually grow from 2-12 feet tall and wide, depending on the variety. Blooming profusely over a long period of time extending from mid-spring to late summer or even fall, gardenia flowers may be solitary or in small clusters, single semi-double or double. They are well suited for containers, raised beds, hedges, espaliers, screens, borders, ground covers or as specimen plants. Plant your gardenias near a deck or window where you can enjoy the divine fragrance! Zone: 7-11

FLOWER

	Color	Size	Type	SIZE	PRICE

'Daisy'	white	2"	single	3-4' tall, 4-5' wide	3 gallon...\$28
'Frostproof'	white	2-3"	double	4-5' tall, 3-4' wide	3 gallon...\$28

Ilex glabra 'Gem Box' | inkberry holly

1 gallon... \$20 SEC A

A great native alternative to boxwood! This cool new dwarf, broadleaf evergreen looks more like a boxwood than an inkberry. A dense, ball-shaped plant, Gem Box ilex has small, dainty, dark green leaves with attractive red tips during the spring flush. It maintains good branching right to the ground so it never looks bare legged like other cultivars may. It's great as a small evergreen hedge or used as a container specimen in milder climates. Grows 24-36" tall and wide. Zone: 5-9

Ilex glabra Squeeze Box® | inkberry holly

1 gallon... \$20 SEC A

Finally, a tall, upright inkberry holly! Squeeze Box® inkberry holly (*Ilex glabra*) is perfect for bringing height and a touch of formality to your garden or landscape. This native evergreen naturally grows with an upright pyramidal shape that can be used for a handsome specimen, unique hedge, or any where you need year-round height and color. Squeeze Box® is a male plant so it will not produce berries but can be used as a pollinator for female plants. Host plant for Henry Elfin butterfly. Grows 4-6' tall and 2-3' wide. Zone: 5-9

Ilex glabra Strongbox® | inkberry holly

1 gallon... \$18 SEC A

Looking for a boxwood alternative? Look no further! Standing 2-3 foot tall and wide, Strongbox® inkberry holly creates a nice mounding evergreen shrub. The foliage is often mistaken for a boxwood, although it is darker green in color. Filling out nicely from top to bottom, Strongbox® can be shaped into squares, circles or cylinder shapes. This native shrub can be planted in full sun to part shade locations and provides color and interest in every season. Strongbox® inkberry holly can be shaped into short hedges, used as a specimen or in container designs. Although Strongbox® rarely needs to be trimmed, you may trim this evergreen if desired in the fall or winter. Grows 2-3' tall and wide. Zone: 5-9

Illicium floridanum | Florida anise

3 gallon ... \$24 SH1

A broad-leaved, upright, rounded evergreen shrub or small tree with a compact stature. Native to the Gulf coast. Leaves are shiny, leathery, smooth and give off an anise odor when crushed. Maroon flowers in April-May emit an interesting odor. Great for naturalizing. Tolerates moist soils. Wilts when dry. Grows 10' tall and 4-6' wide. Zone: 7-10

Illicium parviflorum | yellow anise tree

5 gallon ... \$32 SH1

A large shrub or small tree that will assume a loose cone shape if left untrimmed. Leaves release a pleasantly aromatic anise fragrance when crushed. Small yellow flowers are inconspicuous and are followed by a star-shaped seed capsule. Low maintenance but needs adequate moisture. Prefers sandy, acidic soils, but adaptable. Contains toxic compounds. Grows 20' tall and 15' wide. Zone: 7-10

Juniperus communis Tortuga® | common juniper

1 gallon ... \$20 SEC A

Tortuga® juniper (*Juniperus communis*) is a durable evergreen shrub that is tough as nails. Deer, drought, poor soil, and chilly temperatures don't matter; Tortuga® keeps its neat jade green foliage looking fresh! Its toughness and low-spreading habit make it an ideal choice for adding evergreen interest to the edge of pathways or as a ground cover between larger shrubs. It is very easy to care for, making it a shoo-in for various gardens and landscapes. Grows 2' tall and 4' wide. Zone: 2-7

Juniperus horizontalis 'Wiltonii' | blue rug juniper

1 gallon ... \$10 SEC A

'Wiltonii' is a female cultivar noted for its excellent, dense, prostrate form. It features silver blue foliage that acquires purple tones in winter. This cultivar is synonymous with *J. horizontalis* 'Blue Rug' and sometimes commonly called blue rug juniper. Grows 4-6" tall and 6-8' wide. Zone: 3-9

Leucothoe axillaris | coastal doghobble

3 gallon ... \$24 SH1

A low-growing, evergreen shrub with a vase-like shape which grows slowly with shiny, dark green leaves and clusters of slightly fragrant white flowers which bloom in May. The leaves turn a purplish-bronze color in winter. These particular Leucothoes prefer an acidic, organic soil. Full sun works well as long as they have good moisture because they do not tolerate drought very well. Grows 3-4' tall and 4-6' wide. Zone: 5-9

Leucothoe fontanesiana Paisley Pup™ | doghobble

1 gallon ... \$20 SH1

Ditch the typical and embrace the fantastical with Paisley Pup™ doghobble. This broadleaf evergreen is native to North America and is filled with eye-catching variegated foliage in shades of pink, green, cream, and bronze. Tiny bell-shaped blooms are strung along arching branches, feeding pollinators in the late springtime. Shade-tolerant, deer-resistant, and low-growing, Paisley Pup™ solves landscape woes with charm. Grows 3-4' tall and 4-5' wide. Zone: 5-8

Loropetalum chinense | Chinese fringe flower

size/price varies SEC A

The genus name, *Loropetalum*, is derived from the Greek words for strap and petal, and refers to the long, thin petals of its fringe-like blooms. While native to China, Japan and the Himalayas, loropetalum is well-adapted to all regions of South Carolina. Loropetalums show excellent versatility in the landscape. They are attractive when grown in clusters or mixed screens as well as foundation plantings, single specimens, espaliers and bonsai. They make attractive hedges but lose their naturally graceful form if heavily pruned. When limbed up, they form lovely, small trees. Loropetalum can also be an effective groundcover but may require periodic removal of vertical stems. Low-growing forms are being selected for this purpose. Zone: 7-10

	FLOWER	FOLIAGE	SIZE	PRICE

Plum Delight®	dark pink	reddish-purple	4-6' tall, wide	5 gallon...\$32

Magnolia figo | banana shrub

3 gallon... \$32 SEC A

Fragrant, creamy-yellow blooms shaded with purple have a banana-like scent. Compact densely branched shrub displays narrow, glossy leaves. Use near the front of borders, so fragrance can be enjoyed. Grows 6-10' tall and wide. Zone: 8-11

Morella cerifera 'Tom's Dwarf' | wax myrtle

2 gallon... \$24 SEC A

'Tom's Dwarf' is a versatile shrub that adds beauty and functionality to any landscape. With its compact size it is perfect for small gardens, borders, or even container planting. Its dense foliage provides year-round privacy and acts as a natural windbreak. Additionally, 'Tom's Dwarf' variety requires minimal maintenance, making it an ideal choice for busy homeowners or landscapers. Grows 3-5' tall and 4-6' wide. Zone: 7-9

Nerium oleander 'Hardy' | oleander

7 gallon... \$38 SEC A

Oleanders are distinctive and beautiful, large, flowering shrubs that thrive with little care. They are very heat and drought-tolerant once established, and will grow especially well. The 'Hardy' is the hardiest cultivar surviving even in some protected locations in the Piedmont, although it may suffer damage in some winters. Oleanders grow at a medium to rapid pace, producing 1 to 2 feet or more of growth per year. Established plants that have been damaged by cold will regrow very quickly from the base. Note: like all oleanders, this plant is toxic if ingested. Grows 8-12' tall and wide. Zone: 7-12

Osmanthus fragrans | fragrant tea olive

3 gallon... \$32 SEC A

A large upright shrub. Leaves are a dark, shiny green and the edges may be finely toothed or smooth. Rather slow growing and usually quite long lived. Fragrant, white flowers cover the shrub in autumn, winter and early spring. Prefers reasonably good soil but is adaptable. Grows 10-15' tall and 6-8' wide. Zone: 7-10

Osmanthus fragrans var. *aurantiacus* | orange flowered tea olive

3 gallon... \$32 SEC A

An evergreen shrub or small tree with glossy leaves and small orange very fragrant flowers. The flowers in bloom perfume the whole garden. Blooms in late winter to early spring and then again in the fall. Best in winter shade and moderately drained soils. More cold-hardy than the species. Has a long history of use in traditional herbal medicine and flavoring tea. Grows 15' tall and 8' wide. Zone: 7-9

Thuja occidentalis Fire Chief™ | American arborvitae

3 gallon... \$36 SEC A

Plant the Arborvitae Fire Chief™ evergreen shrub to provide interest in your landscape all year long. In spring, its foliage is bright gold that turns sage-green with fiery red tips in fall. This Thuja evergreen has a compact form, rounded habit, and requires little maintenance. It is slow growing and grows in a rounded shape making it perfect to be planted in containers. It looks impressive in rock gardens, foundation plantings, accent, and as a single shrub. Grows 2-4' tall and wide. Zone: 5-8

How to Plant a Tree

Before digging, call 811 to locate underground utilities.

Remove any twine, tape or tags.

Carefully remove containers, wrappings, wires and ties from rootball before planting.

Dig a hole 2-3 times the rootball diameter. Do not dig the hole too deep.

Find the top most major root (known as the root flare). Do not cover the root flare with soil. Be sure to dig the hole so that the root flare is above the soil.

Loosen outside roots and unwrap any circling roots.

Stake tree only if tree feels unstable. Secure stakes with wide flexible material such as webbing straps or chainlock ties. Allow for some tree movement. Remove within 1 year.

Apply a 3-4" layer of mulch. Do not place mulch near trunk of tree as it could cause the bark to rot.

Create a water basin around the outside of the rootball to contain water.

Backfill with existing soil from the hole. Water the backfill to settle the soil.

Set the rootball on undisturbed soil to prevent settling.

Ilex cassine | Dahoon holly

3 gallon... \$22 SEC A

A native holly that does well in wet, boggy soils but will tolerate drier soil with some supplemental watering. It is somewhat shrubby with red berries and gray bark. Grows up to 20-30 feet in the wild but is usually smaller in the landscape. A "softer" holly as it does not have spines or teeth on its leaves like the American holly. Very nice fruit set in fall and winter great for attracting birds! Worthwhile and underused selection. Relatively pest and disease-free. Grows 20-30' tall and 10-15' wide. Zone: 7-9

Ilex vomitoria | yaupon holly

3 gallon... \$24 SEC A

A thicket-forming, broadleaf evergreen shrub or small tree that grows in an upright, irregularly branched form. Plants are dioecious (separate male and female plants) and female plants have berry-like red fruits. Native habitat includes dry to wet conditions, and a variety of soils. Native American Indians used the leaves to make a ceremonial drink. Grows 10-20' tall and 8-16' wide. Zone: 7-9

Magnolia grandiflora 'Kay Parris' | Southern magnolia

3 gallon... \$64 SEC A

Considered to be one of the very best of the evergreen magnolias, 'Kay Parris' an introduction from Gilberts Nursery Inc., is a relative newcomer. Believed to be a cross between two other fine magnolia varieties, 'Little Gem' and 'Bracken's Brown Beauty', this small tree or multi-stemmed large shrub can stand up to any of its competition as long as it is provided regular watering. The leaves are a glossy, medium green with wavy leaf margins. This selection has a deep orange-brown, almost velvet-like underside to its leaves. The extremely fragrant flowers are a bit smaller than the standard Southern magnolia and appear from late May to late September. It is drought tolerant once established but in dry hot areas will need some shade. Grows 20' tall and 10' wide. Zones: 6-9

Morella cerifera | wax myrtle

3 gallon... \$22 SEC A

Commonly used in landscaping as both a small, multi-trunked tree and as a shrub. Leaves are gray-green to yellow-green and aromatic when crushed. Will eventually form a colony if suckers are not removed. Traditionally planted around southern homes to help keep living spaces pest free. Tolerates wet and xeric conditions. Very easy to grow. Dioecious. Grows 20' tall and 6-12' wide. Zone: 7-10

Persea palustris | swamp red bay

3 gallon... \$22 SEC A

A small to medium-sized evergreen tree with a single trunk. Leaves are thick, leathery, and fall from the tree after 1.5 to 2 years, usually in early summer. When crushed, leaves have an aromatic spicy fragrance (like a kitchen "bay" leaf). Host for the larvae of several butterflies. Performs well in acidic, moist to wet soils. Grows 20-30' tall and 10-15' wide. Zone: 7-11

Prunus caroliniana | Carolina cherry laurel

3 gallon... \$22 SEC A

Carolina Laurel Cherry is a small evergreen shrub to small tree that may easily grow to 35 feet tall. The fresh leaves of this plant have a maraschino cherry fragrance when crushed and glands on the lower surface of the leaves. This species is native to the southern United States. Full sun is preferred but it is tolerant of shade as long as the soil is moist and well-drained. This plant is easy to transplant, can withstand heavy pruning, and is moderately salt tolerant. Established plants have good drought tolerance. Use as a hedge, as a foundation plant, and in small groups or mass planting. It can become weedy in disturbed areas on roadsides and along fence rows and will also put out root suckers and self-seed in the landscape. Grows 15-35' tall and 15-20' wide. Zone: 7-10

Gordonia lasianthus | loblolly bay

5 gallon... \$24 SEC A

Prized for its fragrant flowers, *Gordonia lasianthus* has a columnar or pyramidal habit with leathery, glossy dark leaves that have gray undersides. The foliage glimmers in the wind as a result of their silvery undersides. From spring to frost, a profusion of large, fragrant white flowers cover the canopy. Performs best in part shade in acidic, moist to wet soils. Perfect for bog gardens and near ponds and streams. If in full sun, make sure sufficient water is available. Needs little pruning to develop a strong structure. Grows 30-75' tall and 10-15' wide. Zone: 7-9

Hesperocyparis arizonica 'Carolina Sapphire' | Arizona cypress

3 gallon... \$30 SEC A

A conical, broadly pyramidal growing conifer with sturdy branched. Features a beautiful silvery blue coloration year-round and a pleasing aroma. Great for hot, dry, low-maintenance landscapes. Developed by Clemson University in 1968. Prefers well-drained soil. Grows 30-40' tall and 15-20' wide. Zone: 7-9

Magnolia grandiflora | Southern magnolia

3 gallon... \$22 SEC A

Noted for its attractive glossy dark green leaves and its large, extremely fragrant flowers. It is the only evergreen in the magnolia family. Magnolias are one of the oldest known tree species in the world (based on data from USNA). This is a magnificent tree for planting in the South as a specimen in large yards, parks, or commercial sites. Giant fragrant white flowers are borne in the summer months and are extremely ornamental. Be sure to provide plenty of space to grow. Lower branches tend to reach the ground and can be pruned out to appear more tree-like. Nothing will grow underneath the tree, and it requires a mulch to prevent erosion problems. The woody brown fruits with bright red seeds are used in dried arrangements. Grows 60-80' tall and 30-50' wide. Zone: 6-10

Magnolia grandiflora Alta™ | Southern magnolia

3 gallon... \$64 SEC A

While most Southern magnolias have a broad spreading, pyramidal shape, Alta™ offers a more contained, denser form which can be attributed to its tight branching pattern. The small foliage brings a finer, more formal texture to the landscape, changing the perception of a traditional Southern Magnolia. "The gaps in Southern magnolia aesthetics and culture have been filled by Alta™." – Dr. Michael Dirr Grows 20-30' tall and 8-10' wide. • NOTE: It's difficult, if not impossible, to provide information that relates to the mature size of the Alta™ Magnolia as no one anywhere seems to have a full-grown specimen. Here's what is known: a height of 20 feet and width of 8 feet or so in 10 years can be expected. Zone: 6-9

Pinus palustris | longleaf pine

3 gallon... \$22 SEC A

A majestic tree with a towering, straight trunk, and a relatively small, open crown. Native to coastal areas of SC. The needles and cones are larger than in other pines. Seedlings show no development of a trunk for an average of 5 years, remaining in a "grass" stage while they develop a large tap root and root system. Grows in the driest, sandy uplands, and in wetlands that have saturated soils for 6 months of the year. Grows 100' tall. Zone: 7-9

Athyrium filix-femina 'Victorae' | lady fern

¾ gallon.. \$12 SH2

Lady ferns have reliable color and are easy to grow. Best growth will occur in partial shade and a rich, moist soil. Relatively tolerant of sun and dry soil as compared to many other ferns. A very low maintenance plant that adds a lot of aesthetic value to the landscape. The pinnae (leaflets) crisscross one another forming a series of letter x's on the frond. In addition, the tip is crested forming drooping tassels of split tips. Not surprisingly this cultivar attracts a tremendous amount of attention in the garden or container. Grows 18-24" tall and spreads 20-24". Zone: 3-8

Athyrium niponicum var. *pictum* | Japanese painted fern

1 gallon... \$12 SH2

The most colorful fern around with subtle shades of green, purple and red on a grey-blue background. The color is more intense with some direct sun, preferably morning or late afternoon. Strong-growing and dependable, the lady ferns are great garden plants. Deciduous. Grows 12-18" tall and 18-24" wide. Zone: 4-9

Dryopteris goldiana | giant wood fern

¾ gallon.. \$12 SH2

Goldie's fern, also known as giant wood fern, is a striking addition to the shade garden, whether as a specimen plant or border plant. Very sturdy and stately, this fern spreads slowly by rhizomes, reaching up to four feet high in ideal conditions. Quite cold hardy, *Dryopteris goldiana* is excellent for tough moist shady sites. Deer resistant. Grows 3-4' tall. Zone: 3-8

Dryopteris ludoviciana | Southern wood fern

1 gallon... \$12 SH2

A stately, semi-evergreen, rhizomatous, clumping fern native to the southeast US. A wonderful addition to a woodland garden. Shiny, leathery 3" fronds form a striking upright architectural specimen. Although native to swamps, will perform well in normal garden conditions. Best to remove old fronds in spring just before new ones emerge. Moist, well-drained soil. Grows 3' tall and 2' wide. Zone: 6-9

Onoclea sensibilis | sensitive fern

¾ gallon.. \$12 SH2

Sensitive fern has distinctive, coarsely lobed leaves of a slightly chartreuse color. A good native fern for clay soils, it grows best in partial or full shade, in moist settings. It also does very well in average garden soils, as long as there is consistent moisture and the soil is not allowed to dry out. In optimal conditions sensitive fern spreads quickly by rhizomes, making it an excellent ground cover plant for low moist areas. The name, sensitive fern, refers to the tendency of the leaves to die-back with the first frost. Rabbit and deer resistant. Grows 1-2' tall and 2-3' wide. Zone: 3-9

Osmunda regalis var. *spectabilis* | royal fern

¾ gallon.. \$12 SH2

Royal fern is truly one of the most distinctive and spectacular bold-textured deciduous native ferns with its light green, leathery leaves and graceful architectural stature. With adequate moisture, royal fern can reach 6' tall and create a lush, tropical feel along a stream or beside a pond. Grows 4-6' tall and 2-3' wide. Zone: 2-10

Polystichum acrostichoides | Christmas fern

¾ gallon.. \$12 SH2

Rhizomatous evergreen fern with 2' tall fronds that are leathery and lance shaped. Grows in fountain-like clumps. Expands, but does not spread. Occurs in nature on both dry and moist sites. Best grown in organically rich, dry to medium moisture, well-drained soils. Common name refers to the fronds that are green at Christmas time, and the stocking shape of the pinnae. Grows 1-2' tall and wide. Zone: 3-9

Thelypteris kunthii | Southern shield fern

1 gallon ... \$12 SH2

A beautiful, deciduous terrestrial fern forming dense patches of arching, light green fronds with alternating leaflets. It is one of the best ferns for the South and tolerates more sun than other ferns. It is even grown in full sun in sites where the soil stays consistently moist. Naturalizes well in woodland gardens among the trees and other native plants, but also provides wonderful, soft texture in shady to partly shaded landscape borders and home foundation plantings. Grows 2-4' tall and wide. Zone: 5-8

clemson.edu/hgic

South Carolina's trusted source for home and garden information since 1999.

Amelanchier alnifolia Standing Ovation™ | serviceberry

3 gallon ... \$36 SEC F

In the spring, the shrub will bloom with an extensive range of white flowers that are reminiscent of dogwoods. The summer season allows the bush to develop edible berries with a taste similar to blueberries. These fruits can be used in preserves, eaten fresh, dried like raisins, or pressed for juice. Once the fall season comes around, the round leaves will start to change into red and orange hues to give your landscape a spectacular autumn show. Grows 15' tall and 4' wide. Zone: 2-8

Asimina triloba | paw paw

1 gallon ... \$32 SEC F

Large, slightly drooping, elliptical, medium green leaves (6-12" long) retain green color well into fall before turning to a bright yellow. Cup-shaped, purple flowers appear in spring, and give way to edible, oblong, yellowish green fruits which mature in early autumn to a dark brown. Flavor and fleshy consistency of the sweet-flavored fruits resembles bananas. Grows 15-30' tall. Zone: 5-9

Carya illinoensis | pecan

3 gallon ... \$24 SEC F

The pecan tree is one of the most valuable cultivated plants originating from North America. Not only are the nuts harvested to be used in many different popular desserts, but the wood is used for furniture, flooring, veneer and as charcoal for smoking meats. It is also a host plant for many *Lepidoptera* (butterflies and moths) species and a food source for birds and other wildlife. Grows 70-100' tall and 40-70' wide. Zone: 5-9

Diospyros virginiana | persimmon

3 gallon ... \$32 SEC F

A slow growing tree with long, dark green leaves. Black bark on older trees forms distinctive, regular square blocks. A dioecious species. Female flowers develop into showy orange fruits (2") that are astringent initially, but deliciously sweet when ripe. Adaptable as to site; tolerates drought and flooding. Plant 2 or more. Grows up to 50' tall. Zone: 6-10

Ficus carica | fig

3 gallon ... \$32 SEC F

1 gallon ... \$18

Ficus carica, commonly called common fig, is a deciduous shrub or small tree noted for its spreading habit, attractive foliage and edible fruit. Old trees with smooth silver-gray bark (sometime gnarled with age) are ornamentally attractive. Large, palmate, hairy, 3-5 lobed leaves (to 10" long) are rough dark green above and smooth light green beneath. Non-showy greenish flowers form in spring inside hollow receptacles near the branch growing tips. The fruit (edible fig) develops within each receptacle. The main fruit crop ripens in late summer or fall on new wood. In some areas, a lesser crop may appear in spring on new wood. Species plants as well as most fig cultivars are parthenocarpic (fruits develop without cross pollination).

Malus domestica | apple

size/price varies SEC F

Apple trees grow best in temperate countries with a cool climate and plenty of rain during the winter. The tree requires a winter period, in which it is dormant, in order to fruit in the spring, but must be protected from frost while the flowers and fruit are young. The tree is small and deciduous with a broad, twiggy crown. Blossoms are produced in spring simultaneously with the budding of the leaves. The flowers are white with a pink tinge that gradually fades. The fruit matures in autumn and is typically 5-9 cm in diameter. The tree originated from Central Asia, where its wild ancestor is still found today. There are more than 7,500 known cultivars of apples resulting in range of desired characteristics. Cultivars vary in their yield and the ultimate size of the tree, even when grown on the same rootstock. Different cultivars are available for temperate and subtropical climates. Commercially popular apple cultivars are soft but crisp. Other desired qualities in modern commercial apple breeding are a colorful skin, ease of shipping, lengthy storage ability, high yields, and disease resistance. Grows 20-25' tall and 10-15' wide. Zone: 4-9

Prunus | stone fruit

size/price varies SEC F

Stone fruits get their name from the pit or “stone” in their center that is encased in a fleshy outer area. Also known as drupes, stone fruits tend to have thin skins that may be fuzzy or smooth. The pit is actually a large seed, and stone fruits can be either clingstone or freestone depending on how easily the flesh pulls away from the seed. Since most stone fruits won’t ripen after being harvested, they’re picked at their peak and only good for a small window of time. This makes them highly seasonal, with different stone fruits arriving at different seasons. When picking stone fruit, don’t be afraid of a few bruises as this indicates a ripe, tasty fruit that may actually be better than a hard, spotless one. If you want to test the ripeness of a stone fruit without squeezing (and bruising) them, their smell is a great indicator of ripeness – the more aromatic the better. There’s a lot of variety within stone fruits, and a few might surprise you – plums, apricots, dates, mangoes, coconuts, cherries, olives, raspberries and blackberries to name a few. There are even some fun hybrid stone fruits like pluots (plum + apricot, favoring the plum more) and apriums (apricot + plum, favoring the apricot more). Not only are these trees and shrubs appreciated for the fruit but they are gorgeous spring-flowering trees. Grows 15-25’ tall and wide. Zone: 4-8

Prunus persica | peach

size/price varies SEC F

Widely popular for their sweet, juicy fruits and beautiful blossoms, peach trees are a low, broad tree, 15 to 25 feet tall with an equal or greater spread, peach trees form a rounded crown with upwardly reaching branches clothed in three to six-inch-long, dark green, deciduous leaves. The lovely flowers which appear in April before the new leaves unfold are available in single, semi-double, and double forms in colors ranging from pure white to deep red and bicolors. The flowers are susceptible to damage by late spring frosts or especially cold winters. The luscious three-inch diameter fruits mature in July to August. Bright yellow fall color really stands out in many years. Grows 15-25’ tall and wide. Zone: 5-9

Rubus | bramble

1 gallon... \$18 SEC F

It is frequently difficult to impossible to distinguish Rubus species by their fruits. Druplets of Rubus species look very similar, and there is much variability within species. The name *Rubus fruticosus* refers not to a single species, but is used in the aggregate sense, comprising some 2,000 described European species, these nearly all the European species in section *Rubus*, subgenus *Rubus* of the genus *Rubus*. The name is based on a mixture of *R. plicatus* Weihe & Nees and *R. ulmifolius* Schott. Many of the species arose as a result of hybridization and apomixis. Blackberries and hybrid berries are becoming increasingly popular producing plentiful fruit that can be used for culinary purposes. Many have pleasant flavor for eating fresh when fully ripe. They are relatively easy to grow, but due to their vigor require more attention. Grows 4-9' high.

Sambucus canadensis | elderberry

3 gallon... \$22 SEC F

A deciduous, somewhat sprawling, suckering shrub that typically grows to 5-12' tall. Tiny lemon-scented white flowers appear in large flat-topped clusters (cymes to 10" across) in June. Flowers give way to clusters of black elderberry fruits (drupes) in late summer. Fruits of species plants are sometimes used to make jams, jellies, pie fillings and elderberry wine. Fruits are attractive to wildlife. Grows 5-12' tall and wide. Zone: 3-9

Vaccinium | blueberry

2 gallon... \$24 SEC F
3 gallon... \$32

A deciduous shrub with leaves that are spirally arranged and start out red-bronze in the spring only to develop into a dark green. The flowers are white, bell-shaped. Blueberries are not self-fertile and must have two or more varieties to pollinize each other. The berries are edible and are used as sauces and syrups, and in breads, muffins, pancakes, and pies, and may have pain killing properties (antinociceptive effects). Grown as an ornamental plant, especially for its fall colors, typically bright orange or red. Grows best in acid soil and is subject to few pests and diseases. If maintained with mulching, it may endure temperatures as low as 10°F. Has few insect or disease problems, but birds and squirrels do love the berries! Grows 3-6' tall and 3' wide. Zone: 7-10

Vitis rotundifolia | muscadine grape

3 gallon ... \$30 SEC F

Muscadine grape is a native, deciduous climbing vine unique to the American South. In nature, it is typically found in dry upland forests with especially sandy or rocky soil, swamps, roadsides, and thickets. It is the most common and familiar grape. Muscadine grapes are large and have a thick skin but are good for eating and wine-making due to their sweet, pungent flavor. The height and width of the vine vary due to the amount of support that the vine receives. Muscadine grape is dioecious, meaning that a male and female or perfect flowering cultivar is needed to produce fruit. Differing from other grape species, the tendrils are simple, while other species have forked tendrils. Their resistant to Pierce's disease and the insect phylloxera make this vine valuable as a commercial crop. These diseases are widespread in the southeast US, killing the plants roots. Attracts pollinators and wildlife. Zone: 5-9

Andropogon ternarius | splitbeard bluestem

1 gallon \$8 SEC G

Andropogon ternarius varies across its natural range, growing up to 5' tall in some areas. Flowering stems emerge bluish-green turning copper, red, and bronze in the fall. From late summer through fall the inflorescences have spikelets covered in silvery, white hairs. The effect is shimmering white tufts that contrast with the stems and sparkle in the sunlight. Looks beautiful in many settings including meadows, cottage gardens, woodland areas or planted en masse. Grows 2-3' tall and 1-2' wide. Zone: 5-10

*Carex EverColor*® 'Everillo' | Japanese sedge

1 gallon \$8 SEC G

Cheery and bright, the lime green foliage progresses to bright golden yellow. Morning sun exposure intensifies the breathtaking ribbons of golden yellow. Colorful foliage, year-round. Add drama to shady spots or containers with this versatile, easy care grass. Use as a groundcover, to edge a path, or tuck into a window box. Prefers a moist, well-drained soil. Grows up to 18" tall and wide. Zone: 5-9

*Chasmanthium latifolium* | river oats, inland sea oats

1 gallon \$8 SEC G

More shade tolerant than other ornamental grasses. Drooping seed heads hang in clusters from arching stems. Green seed heads turn purplish bronze by late summer. Bright green leaves turn a coppery color after frost. Leave foliage in place for winter interest. Tolerant of poor soils, but prefers moist, fertile soils. Grows 3-5' tall and 1-2' wide. Zone: 3-8

*Eragrostis elliottii* | Elliott's lovegrass

1 gallon \$8 SEC G

Elliott's lovegrass is a perennial bunchgrass that occurs naturally in flatwoods, sandhills, prairies and disturbed sites throughout Florida. Its delicate little flowers appear in such abundance that they cover the plant in a billowy beige haze. It typically blooms in fall but may produce flowers in summer or even year-round. Its seeds are tiny yet prolific, providing plenty of food for invertebrates and small birds, which use the plant's dense foliage for cover, as well. Grows 1-2' tall and wide. Zone: 8-11

*Eragrostis spectabilis* | purple lovegrass

1 gallon \$8 SEC G

Warm season perennial grass with a phenomenal range of seasonal color and texture. In spring, petite plants form a loose open mound of blue-green blades. In summer, foliage is topped by attractive nebulous clouds of rosy-purple spikelets. As autumn rolls around, foliage develops a bronzy red patina and seeds ripen to a soft beige color. This tough ornamental grass is a stunning addition to any rock garden or drier landscape. Grows 12-24" tall. Zone: 3-9

*Muhlenbergia capillaris* | pink muhly grass

1 gallon \$8 SEC G

A native clump-forming, warm season, perennial grass with attractive summer foliage and spectacular fall flowers. Masses of airy, open, loosely branched inflorescences (12") in pink to pinkish-red float above foliage. Best grown in sandy or rocky, dry to medium moisture, well-drained soils. Use in groups and masses. Propagate by division or seed. Grows up to 3' tall and wide. Zone: 5-9

*Schizachyrium scoparium* | little bluestem

1 gallon \$8 SEC G

A native, warm season, ornamental grass that forms upright clumps of slender green leaves with a touch of blue at the base. Purplish-bronze flowers appear in racemes rising above the foliage in mid-summer. Fluffy, silvery-white seed heads are attractive and persist into winter. Lovely bronze-orange fall foliage color. Tolerates most soil conditions including clay. Good drought resistance once established. Cut to the ground in late winter. Grows 2-4' tall and 2' wide. Zone: 3-9

Agapanthus orientalis Queen Mum™ | lily of the nile

8" pot..... \$14 SH2

Featuring extra large (up to 10 inches in diameter!) dual colored white and violet blue flower heads and clumping strap-like foliage. Ideal for beds, borders, pots, and boxes. Pest and drought tolerant, making this an easy to grow plant! Grows 24-30" tall and 18-24" wide. Zone: 8-10

Agastache 'Blue Boa' | hummingbird mint

¾ gallon.. \$12 SEC J

Luxurious, deep violet-blue flower spikes over ultra-green foliage. Unlike any other *Agastache*. The flower spikes are long, wide and extremely showy. It's a great perennial color spot for summer bloom. It is drought tolerant once established and attracts hummingbirds as well as butterflies. We have found all of that to be absolutely true in our trial gardens. This is a must-have feature in your perennial beds and meadows. Grows to 12-18" tall and 6" wide. Zone: 5-10

Agastache 'Pink Pearl' | hummingbird mint

¾ gallon.. \$12 SEC J

Spikes of light pink flowers pair with darker buds for a lovely two-tone effect from late spring to frost. Unique among *Agastache* for its shorter, compact growth habit and dense blooms that cover the entire plant. *Agastache* is the ultimate pollinator perennial, adored by bees, butterflies and hummingbirds. Grows 16" tall and wide. Zone: 6-10

Anemone 'Dainty Swan' | windflower

¾ gallon.. \$12 SH2

Nodding buds rise above deep green foliage. Icy white blooms feature bright pink petal backs - creating a unique two-toned look. 'DaintySwan' has a long bloom season from summer to fall. Grows 18-30" tall and 20-24" wide. Zone: 5-8

Anemone Fantasy™ 'Red Riding Hood' | wind flower

¾ gallon.. \$12 SH2

This new thickly-petaled, single-flowered rosy pink windflower selection is vigorous, and fills pots quickly. Covered in flowers from late July to October, it is a grower and gardener's dream, with its many flowers and strong, upright stems. The fall seed heads are like little, creamy white cotton balls that last and give interest to the fall garden until a good, hard frost Grows 12-18" tall and 18-24" wide. Zone: 5-9

Anemone Frilly Knickers™ | wind flower

¾ gallon.. \$12 SH2

Semi-double white flowers with the most adorably ruffled edges unfurl to reveal a surprise – a periwinkle lavender backside and dark stems. This is a tough plant, growing to 24" tall in full flower and completely covered in flowers. The tough, leathery, olive green leaves make for the perfect backdrop to the flowers. This is a great plant for the woodland edge, and all along the middle of any mixed border or sunny foundation planting. Grows 18-20" tall and 18" wide. Zone: 5-9

Anemone tomentosa 'Robustissima' | windflower

¾ gallon.. \$12 SH2

A delicate *Anemone*, this late season-bloomer delights with single, light pink blooms that are offset by deep green foliage. A perfect choice for a border or small space garden, this *Anemone* is also deer and rabbit resistant. Blooming from last summer to fall, this easy-to-grow perennial makes for amazing late season bouquets and is a truly versatile choice for any garden. Grows 3-4' tall and 2-3' wide. Zone: 4-8

Aspidistra elatior | cast-iron plant

A very easy to maintain evergreen that has rich green, arching leaves up to 4" wide rising from thick rhizomatous roots. Definitely a vertical, linear effect. Very drought tolerant and can grow in a variety of soil conditions. Best in well-drained, fertile soils. Divide clumps in spring. Grows 3' tall and 2' wide. Zone: 7-9

3 gallon... \$30 SH2

Aspidistra sichuanensis 'Spek-tacular' | cast-iron plant

Linda Guy of Carolina Nurseries, Monck's Corner, SC, found this selection on a stand in a roadside market on an exploratory trip to China. She said that it was laying in the stall bare-root and all dried up. But she miraculously coaxed new growth out of it. It has truly "Spek-tacularly" tall heavily spotted leaves which will reach up to 57" in height! That's 4' 9" high without flopping. When it was named it, the species was not known, but since it has flowered, it has been identified as an *Aspidistra sichuanensis* selection. Initially it had been identified as an *A. elatior* selection. It would make an incredible pot plant for environs further north. Grows 3' tall and 4' wide. Zone: 7-10

3 gallon... \$36 SH2

Baptisia alba | white false indigo

White false indigo (*Baptisia alba*) is a marvel among prairie plants. Its growth cycle begins in spring when a slender purple stem emerges from the ground. By late June it has transformed into a beautiful, five foot flowering perennial. Architectural spikes bearing columns of white blooms arise from a base of gray-blue foliage – all elevated on sturdy forked stems. The plant has a deep taproot and does not respond well to being moved, so site them carefully. Bumblebees are frequent visitors and this *Baptisia* is a larval host plant for several species of butterflies and moths as well. Grows 2-4' tall and 24-30" wide. Zone: 5-8

3/4 gallon... \$8 SEC H

Boltonia asteroides | false chamomile

When most native flowers are yellow, this robust bloomer shines bright white from late summer to first frost. Hundreds of aster-like blossoms on a single plant are an inch across and feature yellow centers surrounded by narrow white ray petals that sometimes are tinged pink to purple. Narrow gray-green leaves and sturdy stems add to the plant's visual appeal. Standing water is can be tolerated for short periods making it a nice addition to your rain garden! It is rhizomatous by nature so will spread, but not aggressively. A pollinator magnet! Grows 5-6' tall and 2-4' wide. Zone: 3-10

3/4 gallon... \$8 SEC H

Chelone obliqua 'Tiny Tortuga' | turtlehead

This tiny native cultivar features uniquely shaped, hot pink blooms above lustrous dark green leaves that have a bronzy sheen. Flowers from mid-summer into fall and is a favorite of butterflies. A great choice for mixed containers, rain gardens, perennial borders and along pond and stream edges. Performs best in evenly moist conditions with fertile loamy soil and abundant organic matter. Grows 18-24" tall and 12-16" wide. Zone: 4-9

3/4 gallon.. \$12 SH2

Chrysogonum virginianum | goldenstar, green and gold

Green and Gold is a rhizomatous, low-growing perennial which typically forms an easily-controlled foliage mat 1"-2" tall while spreading to 18" wide or more. Use in the garden as a shady ground cover, in woodland gardens, native plant gardens or naturalized areas. Green and Gold is easily grown in average, medium moisture, well-drained soils in part shade to full shade. This plant prefers moist, acidic, organically rich soils in sun-dappled part shade. It will tolerate full sun only if grown in consistently moist soils. Spent flower stems should be removed for best ground cover appearance. This plant can be grown from seed and may self-seed in the garden. Growth rate is moderate to rapid. Grows 1-2" tall and 12-24" wide. Zone: 5-9

1 gallon.... \$8 SH2

Coreopsis lanceolata | lanceleaf coreopsis

¾ gallon ... \$8 SEC I

Lanceleaf coreopsis (*Coreopsis lanceolata*) blooms for weeks on end, creating a fantastic early summer display of golden yellow flowers. Butterflies are regular visitors, and songbirds feed on the ripe seeds in late summer. This durable plant grows in any well-drained soil, and exalts in dry sandy soils. Grows 30" tall and plant 36" apart. Zone: 6-9

Coreopsis tripteris | tall tickseed

1 gallon ... \$8 SEC I

Coreopsis tripteris is a tall and stately perennial with handsome foliage and lovely yellow flowers. Leaves are arranged in opposite pairs and are deeply divided into narrow segments that appear to be odd-pinnately compound. From mid-summer until autumn the stems are topped by a glowing daisies with purple or red-brown centers. This resilient plant thrives in sunny sites with moist or mesic soil. Grows 3-9' tall and 2-8' wide. Zone: 3-8

Epimedium 'Pink Champagne' | barrenwort, bishop's hat

1 gallon ... \$18 SH2

An evergreen perennial with long narrow-shaped green leaves splashed with purple. In mid-late spring, a profusion of large flowers dance on wiry stems well above the mottled foliage. Adorned with rose-pink sepals and long strawberry-pink petals with pale yellow tips. An easy to grow plant that is virtually pest and disease free. Excellent as a groundcover. Grows 1-2' tall and spreads 2-3' wide. Zone: 5-8

Epimedium 'Songbirds' | barrenwort, bishop's hat

1 gallon ... \$18 SH2

One of the most floriferous *Epimedium* selections out there, according to the hybridizer, Tony Avent. Golden yellow flowers have small rose sepals, although at a glance they appear yellow. Its deep green lance-shaped leaves have some sporadic spotting. This variety is a season extender: it flowers later than other offerings and has a long inflorescence. A beautiful choice for dry shade. Deer and rabbit resistant. Grows 16-18" tall and 26-30" wide. Zone: 5-8

Eryngium aquaticum | marsh rattlesnake master

1 gallon ... \$8 SEC H

This wildflower grows naturally in bogs, marshes, and wet areas. It can grow in loamy soil in garden areas where water is adequately applied. It prefers wet soil but will tolerate dry and once established is quite drought tolerant. It grows in full sun to part shade with the more sprawling habit in fertile soil or in too much shade. Taller plants may need support. The interesting foliage and flowers are great in cut and dried arrangements and can make this a specimen plant in your garden. Or plant in groups in low spots, near water gardens, rain gardens, ponds, or in borders. It naturalizes easily through seed. Grows 18"-4' tall and 3-4' wide. Zone: 6-8

Eurybia divaricata | white-wood aster

1 gallon ... \$8 SH2

Eurybia divaricata is a shade-loving aster. It produces large quantities of flowers with white rays and yellow central disks, that seem to float above the contrasting deep-green foliage. Although the individual flowers are delicate and only 1" across, it blooms in large, showy terminal clusters. As the flowers mature, their central disk goes from yellow, to red and bronze, before going to seed. Host plant for the Pearl Crescent butterfly. Grows 12-36" tall and 18-30" wide. Zone: 3-8

Eutrochium dubium 'Baby Joe' | Joe-Pye weed

¾ gallon.. \$10 SEC J

This is a wetland species which is native primarily to sandy swamps, riverbanks and moist thickets in Eastern North America from Nova Scotia and Maine south along the coastal plain to South Carolina and Alabama. Small disk flowers (rays absent) ranging in color from pale pink to dark purple bloom in corymbiform, dome-shaped clusters (4-7" across) from July to September. Grows 2-3' tall and 1-2' wide. Zones 3-9

Eutrochium fistulosum | hollow Joe-Pye weed

1 gallon... \$10 SEC J

A robust, upright perennial with hollow purple stems accented by huge, rounded, tight clusters of pink or purplish- mauve flowers. It is an important pollen and nectar plant and attracts butterflies (particularly the swallowtail butterfly) and other pollinators by the dozens. Its height makes it an excellent background plant in border perennial beds but is also majestic standing alone. Flower color is darker in cooler weather. Grows 5-8' tall and 3-4' wide. Zone: 4-8

Gaillardia 'Sunset Flash' | blanket flower

1 gallon... \$12 SEC I

These tough perennials can beat the heat with beauty, showing off vibrant blooms almost year-round. Water-wise and drought tolerant once established, these compact plants and their color-fast blooms love the sun. Large flowers have two rows of flat, bright orange-red petals with yellow tips. Blooms from late spring or summer, right up until frost. Birds love the seeds! Grows 12-14" tall and wide tall. Zone: 5-9

Gaillardia 'Sunset Orange' | blanket flower

1 gallon... \$12 SEC I

This compact plant holds its shape and its blooms won't fade. It produces heavy amber to orange-toned colorfast double-blooms that age well in early spring to fall with low water use. Birds love the seeds! Grows 14-16" tall. Zone: 5-9

Gaillardia pulchella | blanket flower

1 gallon.... \$8 SEC I

Daisy-like flowerheads feature rays in shades of red, yellow or red/yellow bicolor, with contrasting darker center disks (usually purplish). Cultivars include some double-flowered forms and expand the available flower colors to include interesting shades of orange and maroon. Blooms late spring to fall. In areas where goldfinches are present, gardeners should consider leaving some spent flowerheads for the birds. Oblong to oblanceolate gray-green leaves (to 3" long). Grows 12-18" tall and 12-18". Zone: 2-11

Helianthus angustifolia | swamp sunflower

1 gallon.... \$8 SEC H

A native sunflower that grows upright with rough, hairy stems and narrowly lance shaped, mid green leaves. Flowers in early autumn, with daisy like flower heads, with yellow ray florets and purple disk florets. Creates a beautiful mass of golden yellow. Grow in moderately fertile, humus rich, moist but well drained, neutral to alkaline soil. Prune back in midsummer so plant will not be leggy when blooming in the fall. Grows 6-10' tall. Zone: 5-9

Helianthus floridanus | Florida sunflower

1 gallon.... \$8 SEC H

Flowering in late fall, this sun loving plant is a perfect plant for any garden. This upright perennial produces bright yellow flowers in late fall that attract hummingbirds and butterflies. Prefers moist soils. Grows 3-4' tall and wide. Zone: 7-10

full sun

part shade

Helianthus tuberosus | Jerusalem artichoke

1 gallon... \$10 SEC H

A type of sunflower that is grown for its edible tuberous roots. A large, coarse, multi-branched perennial with rough, sandpapery leaves and stems, and numerous yellow flowerheads. Flowers during late summer and early fall. The edible tubers are produced just below the ground on thin white rhizomes. Grows up to 10' tall. Zone: 3-9

Heliopsis helianthoides | oxeye sunflower

1 gallon... \$8 SEC H

Heliopsis helianthoides is similar to *Helianthus*, the true sunflower. It is an easy to grow plant that flourishes in moist to dry, open woodlands, prairies, and fields. It tolerates a wide range of soil conditions, including poor soil but does best in moist, well-drained soil in full sun. Grows 3-5' tall and 1-3' wide. Zones 3-9

Helleborus | Lenten rose

1 gallon... \$18 SH2

Hellebores are the harbingers of spring, blooming for six weeks or more beginning in late winter. They are often flowering during the Christian season of Lent, from which they get their common name, Lenten rose. This is the perfect plant for naturalizing in moist, woodland areas where its extensive root system will spread as far as it is allowed. They require a moist but well-drained site. Take care to amend the soil with plenty of organic matter, such as well-aged leaf mulch and compost. You'll be rewarded with long-lived, deer- and vole-resistant plants that will spread nicely on their own. Grows 12-24" tall and wide. Zone: 4-9

Heuchera americana 'Dale's Strain' | alumroot

1 gallon... \$12 SH2

Heuchera americana 'Dales Strain' is a colorful selection of the native alum root. Leaves are lobed and almost round and are highlighted with silvery blue and red marbling. In late spring, tiny white flowers are held above the foliage in loose panicles. Foliage transitions to a bright orange hue in fall and winter. Plants thrive in moist rich woods in shade to part sun. This heat tolerant cultivar will also handle difficult dry shaded sites. Deer resistant. Grows 12-24" tall and 18" wide. Zone: 4-7

Heuchera | coral bells

1 gallon... \$12 SH2

A genus consisting of about 55 species of evergreen to semi-evergreen herbaceous perennials which are all native to North America. Plants grow in a variety of different habitats including woodland areas, Appalachian seeps, prairies, rocky cliffs and alpine slopes. Plants range in size from dwarf alpine plants with flower spikes rising to only 5" tall to much larger woodland plants with flower spikes towering to 36" tall. The first significant hybrid heucheras were introduced into commerce around 1980, with the volume of new introductions increasing to almost avalanche proportions in recent years. Hybrids have now supplanted species plants in the marketplace. Species plants most frequently used in producing the hybrids of today are *H. sanguinea*, *H. americana*, *H. micrantha*, *H. villosa* and *H. cylindrica*. Leaves of hybrid plants are available in an expanded variety of colors including various shades of green, blue-green, violet, purple, maroon, bronze, silver-black, orange-yellow, yellow, or red, but often with a streaked, mottled or marbled variegation which sometimes includes bold contrasting veins. Flowers of hybrid plants are also available in a variety of different colors including various shades of white, pink, coral or red. Grows 1-2' tall and 12-18" wide. Zone: 4-9

	FOLIAGE COLOR	FLOWER COLOR	SIZE
'Berry Smoothie'	metallic rose pink	creamy white	18" tall, 20" wide
'Black Forest Cake'	dark chocolate	bright cherry red	6" tall, 12" wide

Carnival 'Watermelon'	peach, pinks and green	white	10-12" tall, 12-14" wide
'Citronelle'	citron yellow to chartreuse	creamy white	12" tall, 14" wide
'Fire Chief'	scarlet	bicolored pink and white	8" tall, 15" wide
Forever® 'Midnight'	deep purple-black	white	12" tall, 22" wide
'Paris'	silvery green	deep rose	7" tall, 14" wide
'Stainless Steel'	silver with purple veining	creamy white	8-12" tall, 20-24" wide

x Heucherella 'Sweet Tea' | foamy bells

1 gallon... \$12 SH2

Anyone who gardens in the shade is familiar with heucherella. 'Sweet Tea' was bred using *Heuchera villosa*, a native of the eastern United States, as one of its parents, which has added enough resistance to heat, drought, and humidity to make it able to handle even the extreme climate of Texas. 'Sweet Tea' has large, stained, orange-bronze leaves with dark burgundy veins and short spikes of small white flowers that appear in early spring. Its brightly colored foliage, however, is the main reason to have this plant. Grows 20-27" tall and 18-23" wide. Zone: 4-9

Hibiscus grandiflorus | swamp rosemallow

2 gallon... \$16 SEC H

Hibiscus grandiflorus – the name says it – has grand flowers that are pale pinkish violet with crimson bases. The spectacular flowers open in the late afternoon and are finished by noon the following day, but a succession of blooms (up to a dozen or more per plant each day) keeps up the show from mid-summer through autumn. A happy giant rose mallow plant grows bigger each year by adding additional stalks from its root crown. Grows up to 10' tall. Zone: 7-10

Hosta 'Royal Standard' | plantain lily

1 gallon... \$18 SH2

Hosta 'Royal Standard' displays large mounds of wavy, green, glossy, pointed leaves demonstrating both sun and drought tolerance. Best of all, a profusion of pure white flowers with a clean, fragrance beginning in late August. Fragrance is stronger in the evening. Grows 26" tall and 63" wide. Zone: 3-9

Iris cristata | dwarf crested iris

The colorful blooms and easy culture of dwarf crested iris make it a valuable addition to the shady native woodland garden. In mid-spring, this attractive perennial groundcover is a mass of pale to deep violet blooms that reach 4-6" in height. Its 5-6" sword-like leaves arise from small rhizomes, that quickly spread, to form impressive colonies with a unique textural quality. *Iris cristata* does well in average, well-drained woodland soils in shade to partial shade and, once established, is dependably drought tolerant. Grows 6-8" tall and 15" wide. Zone: 5-8

1 gallon... \$10 SH2

Iris pseudata 'Shiryukyo' | pseudata iris

This mid-season to late season bloomer produces reddish purple standards with a deep purple marking that outlines the bright yellow signal above dark green foliage. Pseudata Iris are a cross between *Iris pseudocorus* and *Iris ensata* ("pseudata" is combination of both names). *Iris pseudata* creates the best of both species-the hybrid vigor, the higher bud count, color blend, eye signals, a longer season of bloom, and the plants are sterile and do not seed around. Deer and rabbit resistant. Grows 45-54" tall and 48" wide. Zone: 4-9

1 gallon... \$10 SEC H

Iris sibirica 'Purring Tiger' | Siberian iris

Dusty lavender flowers sit above golden yellow petals. The golden yellow petals are lined with purple veining that matches the heart of the flower. 'Purring Tiger' is compact for Siberian Iris, standing about a foot and half tall. Expect this mid-season bloomer to roar to life as it flowers in early summer. Grows 18-20" tall and 18-24" wide. Zone: 4-9

1 gallon... \$10 SEC H

Iris verna | dwarf iris

Dwarf Iris is a herbaceous, flowering, perennial native to the eastern United States. Depending on the variety, it is native to all regions of North Carolina. In native environments, it most often occurs in nutrient-poor acidic soils of open to semi-shaded woodlands. Dwarf Iris is a small, fragrant Iris with leaves that are narrower and straighter than those of *Iris cristata*, and blossoms that appear on short stalks in early spring before the leaves appear. Additionally the flowers lack the crested ridges that are found on the sepals and the flowers are strongly scented. Grows 2-3". Zone: 6-8

1 gallon... \$10 SH2

Leucanthemum x superbum 'Becky' | shasta daisy

Prized for its durability in the hot, humid summers of the south and its cold tolerance in the north, 'Becky' has proven to be a sturdy, hardy cultivar. Copious amounts of very large, 3" single, white blooms are produced atop strong stems which are ideal for cutting. Despite its height, this variety does not usually require staking. Grows 136-42" tall and 18-24" wide. Zone: 5-9

1 gallon.... \$8 SEC H

Liatris spicata | blazing star

Tallest of the genus with upright spikes bearing pinkish-purple tassels in July and August. One of the best garden performers! An excellent cut flower and a magnet for butterflies, bees, rare moths and hummingbirds. Deer resistant! Grows 2-4' tall. Zone: 3-8

1 gallon.... \$8 SEC I

Lobelia cardinalis | cardinal flower

Clump-forming habit with brilliant red flower spikes set against green and purple-bronze colored foliage. Each individual spike of scarlet flowers opens from bottom to top and stays in bloom for several weeks. A favorite of hummingbirds. Makes an excellent cut flower. A real showstopper! Grows 2-4' tall and 2' wide. Zone: 3-8

1 gallon.... \$8 SEC J

Lobelia siphilitica | blue cardinal flower

Blue cardinal flower is an upright perennial which produces long-lasting spikes of bright blue flowers atop a finely toothed, lance-shaped foliage from later summer to mid-fall. This is an extremely hardy, low care plant that adds architectural interest to the late summer garden. Grows 2-3' tall and 12-18" wide. Zone: 4-9

1 gallon.... \$8 SEC J

Monarda fistulosa | bee balm

Wild bergamot, known by many other common names, is a popular and showy perennial. Clusters of lavender, pink or white flowers, looking like ragged pompoms, bloom atop 2-5 ft., open-branched stems. This showy perennial, frequently cultivated, has aromatic leaves used to make mint tea. Oil from the leaves was formerly used to treat respiratory ailments. The leaves smell minty. Grows 2-4' tall and 2-3' wide. Zones: 3-9

1 gallon.... \$8 SEC J

Monarda punctata | spotted bee balm

A clump-forming, mint family member that features branching or simple, square stems. Yellow, two-lipped flowers which are spotted with purple appear in the upper leaf axils and stem ends in tiered, stem-ringing clusters, subtended by a whorl of showy, pinkish, leafy bracts. Aromatic, oblong leaves may be used in teas. Long summer bloom period. Found on dry, sandy soils, but tolerant of soil type. Grows 2-3' tall and 12-18" wide. Zone: 3-8

1 gallon.... \$8 SEC J

Penstemon laevigatus | Eastern smooth beardtongue

If you're a first-time penstemon grower, this is a great one to start with in your garden. It has pale purplish-white tubular flowers that appear in clusters May through July attracting an abundance of birds and bees, as well as hummingbirds. Easy to grow in rich, moist soils in sun, but will even tolerate some shade. Excellent addition to rock, cottage, and native meadow gardens. Host plant for common buckeye butterflies. Grows 2-3' tall and 2' wide. Zone: 6-8

1 gallon.... \$8 SEC J

Phlox divaricata 'Blue Moon' | woodland phlox

Selected for outstanding flower color and very full flower petals. Bears many fragrant, 5-petaled flowers with the arrival of spring. Foliage is lance shaped and medium green. A long-lived, carefree native groundcover that will naturalize over time. Thrives in rich, shady, and moist soil. Appreciates a light layer of mulch. Grows 12-18" tall and 8-12" wide. Zone: 3-9

1 gallon... \$10 SH2

Polemonium reptans 'Stairway to Heaven' | Jacob's ladder

'Stairway to Heaven' is a colorful new cultivar of the native form, featuring green leaves with white leaf margins that are tinged with pink in spring. Pale lavender blue, bell-shaped flowers bloom for many weeks in late spring. Foliage provides good contrast to other shade plants and combines well with purple heucheras and deep green ferns. Generally pest and disease free. Deer and rabbit resistant. Grows 1-2' tall and wide. Zone: 3-8

3/4 gallon.. \$12 SH2

Pycnanthemum muticum | mountain mint

Its leaves are broad and lustrous, the bracts are silvery and very showy, the flowers are pinkish and its habit is more compact. Nicely aromatic. This native is happiest at the wood's edge, so it is an excellent for a naturalized border or woodland garden. Mountain mint is one of the best nectar sources for native butterflies, so butterfly gardeners can't do without this. Bees go crazy for it too! Grows 2-3' tall and 2' wide. Zone: 4-8

1 gallon.... \$8 SEC H

Ratibida pinnata | grey-head coneflower

A coarse plant featuring pinnately divided leaves (to 5") on stiff stems. Flowers have a dull-gray central disk that smells of anise when bruised. Below the disk are 3-7, downward pointing, bright yellow ray flowers (to 3"). Blooms throughout summer. Native to central NA. Average, medium moisture, well-drained soils. Tolerates poor, dry soils. Grows 3-5' tall and 2' wide. Zone: 3-8

1 gallon \$8 SEC I

Rudbeckia hirta 'Sahara' | black-eyed Susan

Rudbeckia hirta 'Sahara' is a favorite for cut-flower arrangements. Vases will overflow with its reliable abundant blooms. In meadows, along the roadside or in your garden bed, *Rudbeckia* are one of the most versatile and recognized perennials. Picture-perfect punctuated with butterflies and the goldfinches will love the seed. Grows 18-24" tall and wide. Zones: 5-9

1 gallon ... \$12 SEC J

Rudbeckia fulgida 'Goldsturm' | orange coneflower

A garden classic with bold texture and upright habit. Bright gold petals with a deep brown cone highlight the garden in late summer. Each flower may last up to two weeks! Makes a wonderful and long-lasting cut flower. Provides seeds in the winter for birds and nectar for butterflies. Beautiful and versatile, outstanding in mass plantings as well as perennial borders, meadows and prairie gardens. Tolerates hot, humid summers and some drought. Deadhead to prolong blooming season. Disease and pest resistant. Grows 2-3' tall and 1-2' wide. Zone: 5-7

1 gallon \$8 SEC J

Rudbeckia laciniata | tall coneflower

There are not many woodland flowers that will reach the height of this coneflower. Its bright yellow flowers and relatively late bloom time compared to many spring-blooming woodland flowers make it a wonderful addition to your shade or semi-shade planting. Its preference is for part shade, but will grow in full sun if the soil holds moisture well. *Rudbeckia laciniata* is also referred to by its Cherokee name Sochan. The spring basal leaves are a traditional Cherokee food. Grows 2-9' tall and 18-36" wide. Zone: 3-8

3/4 gallon ... \$8 SEC J

Salvia coccinea | scarlet sage

Salvia coccinea is perennial in warmer climates and annual where winter temperatures are below freezing. It can be grown as an annual to zone 4 and as a perennial in zones 9 and 10. It will sometimes survive as a perennial in zone 8 when winters are frost free. The bright red flowers are an inch long and arranged in loose whorls along the upright stem and bloom continuously from early summer to the first frost. It tolerates drought but will flower more abundantly with watering during dry spells. Scarlet sage is best grown in sandy, fertile soil but will tolerate clay soil with good drainage. Though it looks similar to *Salvia elegans*, which has edible flowers, the flowers of *Salvia coccinea* are NOT edible. Crush a flower. If it smells like sage or grass it is *Salvia coccinea*, do not eat. If it smells like pineapple, it is *Salvia elegans* and is edible. Grows 12-36" tall and 12-30" wide. Zone: 8-10

1 gallon \$8 SEC I

Sisyrinchium 'Purple' | blue-eyed grass

A great evergreen groundcover. Bright purple flowers with yellow centers "scream" spring! This selection has very nice evergreen foliage and consistent purple spring flowers. Very versatile: sun or shade, moist or dry sites. Bloom time early spring-summer. Grows 10-12" tall. Zone: 7-9

hummingbirds

“Convincing gardeners to grow goldenrods is a bit like trying to sell Toyotas in Detroit, but I will continue anyway. They are certainly ubiquitous in the fall landscape and are still wrongly accused of causing hayfever. Therefore, it bears repeating that goldenrods, like aster, Joe-Pye, ironweeds, and all the Composites, are insect-pollinated, so their pollen is heavy and sticky in order to facilitate transfer by our six-legged friends. It is the wind-pollinated plants like grasses, ragweed and many trees (I am allergic to maples for example) that produce the great quantities of light, airborne pollen that get into our noses and throats and cause the immune reaction known as hayfever. There are goldenrods for every situation, and if you avoid the aggressively weedy species like *S. canadensis* (My apologies to Canada) and *S. graminifolia*, they are agreeable garden subjects at home in the border, meadow, rock, or shade garden. Once I started to learn the different species, I became more and more aware of their subtle differences and convinced of their important role in native ecosystems as soil stabilizers and sources of food and shelter for wildlife. They are beautiful in leaf and flower, too, and no wildflower garden is complete without a few of our hundred or so species scattered around.”

– William Cullina

The New England Wild Flower Society Guide to
Growing and Propagating Wildflowers, p. 197

Solidago odora | sweet goldenrod

¾ gallon ... \$8 SEC H

Sweet goldenrod is easily identified by its anise-scented leaves. Native to dry, sandy, open woods in the eastern U.S. Branched, plume-like clusters of yellow, daisy-like flowers bloom in August-September. Foliage historically used in herbal medicines for treatment of a variety of problems. Easily grown in average, dry to medium, well-drained soils. Grows 2-4' tall and 1-2' wide. Zone: 4-9

Solidago rugosa 'Fireworks' | rough goldenrod

1 gallon ... \$8 SEC H

A compact, cascading, clump-forming perennial with a radiating flower form that resembles fireworks. Long arching spires of brilliant yellow flowers are held well atop the foliage. Fall bloom period. Prefers moist, well-drained soils but easily grown. Deadhead to encourage additional blooms. A nice cut flower. Grows to 2-3' in height and spread. Zone: 4-8

Solidago stricta | wand goldenrod

1 gallon ... \$8 SEC H

Solidago stricta has small, erect, bract-like leaves pressed upward against the stem, which give this goldenrod a wand-like appearance. It is native to sandy pine barrens and wet coastal plain areas from New Jersey to Texas. Narrow, erect, plume-like clusters (to 10" long) of yellow, daisy-like flowers bloom in August-October atop stems rising to 3-6' tall. Goldenrods are attractive to bees and butterflies. Goldenrods have been wrongfully accused of causing hay fever which is actually an allergic reaction to wind-borne pollen from other plants such as ragweed. This species is commonly called wand-like goldenrod. Grows 3-6' tall and 2-4' wide. Zone: 5-9

Spigelia marilandica | Indian pink

1 gallon ... \$10 SH2

A clump-forming native found in moist woods and along stream banks. Features upward facing, trumpet-shaped, red flowers atop an 18" stiff stem. Each flower is yellow inside and flares at the top. Flowers in mid-spring and will repeat if deadheaded. Prefers moist, organically rich soils. Clumps improve with age. Poisonous if ingested. Grows 12-24" tall and 12-18" wide. Zone: 5-9

Stokesia laevis | Stokes' aster

¾ gallon ... \$8 SEC J

A summer blooming perennial grown for many years for its beautiful flowers and ease of culture. Easy to grow in average to moist soils with good drainage. Because of its heat tolerance, it is widely grown in the south. Grows 12-18" tall and wide. Zone: 5-9

Stylophorum diphyllum | celandine poppy

¾ gallon ... \$8 SH2

Also known as wood poppy, this attractive woodland plant will grow well in zones 4-8 in with little to no care in rich woodland soils. It can tolerate drier, sunnier sites with some care. Imagine these bright yellow poppies next to some blue Jacob's ladder or *Mertensia*, pinkish trout lily or white trillium in a spring, woodland garden – a welcome, well-deserved sight in April after a long winter. After seeds drop out of its large, hairy pods, celandine poppy will go dormant. Grows 12-18" tall and 9-12" wide. Zone: 4-8

Symphotrichum cordifolium | blue wood aster

¾ gallon ... \$8 SEC J

A stout herbaceous perennial boasting branched, upright-arching stems topped by profuse clusters of daisy-like flowers in late summer and fall. Blooming for weeks, the flowers feature golden-yellow centers surrounded by narrow rays ranging from dark blue to pale blue. Tough and adaptable, blue wood aster is an excellent choice for the mixed border where it makes a beautiful foil for other late-season perennials. Deer and rabbit tolerant. Grows 2-5' tall and 1-2' wide. Zone: 3-8

Symphotrichum georgianum | Georgia aster

1 gallon ... \$8 SEC J

A rare native with royal blue-purple 2" flowers with yellow discs blooming in the fall. A deciduous perennial that dies back to the ground each winter and re-emerges again in the spring. May be cut back during the summer to control height. Thrives in poor soil and desert-like conditions. Does not tolerate wet soils. Grows 4-5' tall. Zone: 5-9

Symphotrichum novae-angliae | New England aster

1 gallon ... \$8 SEC J

Magnificent in bloom, New England Aster (*Aster novae-angliae*) lights up the late season landscape with bunches of deep violet to lavender-pink flowers. Large and showy, this aster can grow up to six feet high. The flowers are an important source of nectar for late season pollinators, especially Monarchs as they stock up for their fall migration to Mexico. This deer resistant native prefers moist, rich soils, but is easily grown in a broad range of conditions, thriving in full sun or light shade in all but the driest soils. When it goes into bloom the lower leaves begin to dry up, and this is normal. If height becomes an issue, cutting back the stems before mid-July can help control the need for staking. Bees and butterflies are frequent visitors to this amazing pollinator favorite, and larval host for the Pearl Crescent, the Gorgone Checkerspot butterfly and the Northern Flower moth. Grows 3-6' tall and 2-3' wide. Zones 4-8

Symphotrichum novi-belgii 'Woods Blue' | New York aster

1 gallon ... \$12 SEC J

A dwarf aster that produces masses of small, purple-blue flowers with sunny golden centers while also providing a critical source of food for pollinators at a time when many plants in the garden are subsiding. 'Wood's Blue' begins its flower show around midsummer and continues blooming nonstop into fall. The flowers top sturdy stems, which makes them ideal for late-season bouquets. Try this New York Aster at the edge of a sunny border where moisture is steady. Grows 9-15" tall and 12-18" wide. Zone: 4-8

Symphotrichum novi-belgii 'Woods Pink' | New York aster

1 gallon ... \$12 SEC J

Virtually mildew and rust-free. Like all the Wood's Asters, it is a wonderful container plant, with a compact habit and unstoppable clear pink flowers with gold centers. Bred for compact habit, long bloom period and heavy flowering, consider this as a sturdy perennial alternative for mums. Grows 12-18" tall. Zone: 5-8

full sun

part shade

full shade

US native

SC native

butterflies

hummingbirds

Symphotrichum novi-belgii 'Woods Purple' | New York aster

1 gallon... \$12 SEC J

'Wood's Purple' has perfectly clean foliage, and is loaded with single, clear purple flowers in late summer and early fall. It is slightly earlier than 'Wood's Blue'. Bred for compact habit, long bloom period and heavy flowering. Grows 12" tall. Zone: 5-8

*Tiarella* 'Angel Wings' | foamflower

3/4 gallon.. \$12 SH2

Tiarella is a genus of 7 species of low-growing perennials suitable for rock gardens or ground cover beneath trees and shrubs. They are closely allied to the genus *Heuchera*, bearing feathery spikes star-shaped flowers. 'Angel Wings' has deep pink flower buds that open to pale pink, then white spikes from spring to summer. They are very attractive to pollinators. Grows 4" tall. Zones: 4-9

*Tiareella* 'Timbuktu' | foamflower

1 gallon... \$12 SH2

Truly low-maintenance shade native that thrives in a woodland garden, 'Elizabeth Oliver' is a beautiful selection with a tidy clumping habit, striking red streaked leaves and delicate flowers tinged with pink. A good groundcover. Grows 12-18" tall and 12" wide. Zone: 4-8

*Tiareella cordifolia* 'Running Tapestry' | foamflower

1 gallon... \$12 SH2

This woodland native makes an excellent groundcover, with its running mounds of fuzzy maple-shaped leaves and delicate upright spikes of foamy white to pink flowers. Hybridizers have been busy with this plant in recent years, and now we have a whole menagerie of interesting leaf forms to complement the spring blossoms. Grows 12-15" tall and 12-18" wide. Zone: 4-8

*Tricyrtis formosana* 'Autumn Glow' | toad lily

1 gallon... \$12 SH2

Impressive variegation is what sets this toad lily apart from older cultivars. Compared side by side with 'Gilt Edge', you'll see that the overall plant size, habit, and flowers are nearly identical, but it is that light edge that really makes 'Autumn Glow' truly live up to its name. Orchid-like, reddish purple to blue violet speckled blossoms appear from late summer into early fall in the north, midsummer in the south. An excellent perennial for adding late season color to the shade garden. Grows 24-26" tall and 24-36" wide. Zone: 4-9

*Tulbaghia violacea* | society garlic

1 gallon... \$12 SEC H

Plants have good heat and drought tolerance, but generally appreciate consistent moisture during the growing season. Plants will grow in part shade, but with decreased flowering. It somewhat resembles garlic chives (*Allium tuberosum*) in appearance. Flowers and leaves are edible (mild garlic flavor) and may be used in soups and salads. Grows 12-24" tall and 9-12" wide. Zone: 7-10

*Viola pedata* | bird's foot violet

1 gallon... \$8 SEC H

Called bird's foot violet because its leaves are shaped like a bird's foot, it is a bit fussier than the rest of the violets but is well worth the trouble! The soil needed for *Viola pedata* must be well-drained, otherwise the plant could rot; preferably sandy soils, and grows best in full sun to partial shade. *Viola pedata* needs to be kept free of weeds and other aggressive plants so as not to be crowded out. It's a short-lived perennial, but it will self-seed readily. Spring is the typical bloom time, but because of the early bloom time, it's not uncommon to see many *Viola* species bloom again in the early fall. Grows 3-6" tall and wide. Zone: 4-8

Zizia aurea | golden Alexander

Golden Alexander is covered with brilliant golden, three to four inch-wide umbels that bloom for several weeks in late spring. This is an excellent low-growing perennial for heavy clay soils in semi-shade to full sun. Moist, well-drained soil is best, but this very adaptable plant will tolerate both wet conditions and dry conditions, as long as there is plenty of moisture early in the growing season. Very low-maintenance. *Zizia aurea* is a host plant for the black swallowtail and the Ozark swallowtail – which lay eggs on umbelliferous plants in the *Apiaceae* family, including parsley, parsnip and dill. Grows 12-24" tall and wide. Zone: 3-8

1 gallon ... \$8 SEC H

RHODODENDRONS

Rhododendron arborescens | sweet azalea

A large, loosely branched shrub. Glossy, bright green, deciduous foliage lacks the hairs on the underside of the leaves that other native azaleas have. Foliage turns deep red to purple in fall. Fragrant, funnel-shaped, white or pink-tinged flowers with protruding, red stamens cluster in subtle groups of 3 to 6 after the leaves appear. Relatively tall and fast-growing for a native azalea, *Rhododendron arborescens* is one of the hardiest native white azaleas and one of the last azaleas to bloom in the spring. It is drought-sensitive and requires moist, partially shaded sites. Grows to 8-12' tall and wide. Zone: 4-7

3 gallon ... \$28 SH1

Rhododendron atlanticum | coastal azalea

A compact, stoloniferous, deciduous shrub native to coastal plain areas from New Jersey and Pennsylvania south to Georgia. It is often used in azalea hybridizing programs because of its potent flower fragrance. Abundant clusters of 2 inch long white flowers, sometimes flushed with pink, and with very long stamens that extend well beyond the corolla, bloom in clusters of 3-13 in April just before the new leaves flush. In the landscape, use coastal azalea as an accent, border, or hedge in a native, butterfly or woodland garden. It also grows well in containers that can be situated outside or even indoors as a year round houseplant! Grows to 3-6' tall and wide. Zone: 6-8

3 gallon ... \$28 SH1

Rhododendron austrinum | Florida azalea

An upright deciduous shrub with loose, irregular branching. Fragrant funnel-shaped flowers (yellow, peach, orange-red) in dense clusters (8-15 flowers) in early spring just before or as the foliage emerges. Shallow, fibrous root systems benefit from mulch. Slowly naturalizes by root suckers. Best grown in acidic, light, sandy well-drained soils. Grows to 6-10' tall and 4-6' wide. Zone: 6-9

3 gallon ... \$28 SH1

Rhododendron austrinum 'Don's Variegated' | Florida azalea

Loose multi-stemmed woody shrub; easy to grow; fragrant flowers; drought tolerant. Clear yellow, cream, gold-orange to almost red flowers in spring before leaves emerge, then produces fruit as an elongated capsule. Has alternate, simple dark green leaves; yellow to bronze-orange fall color. Grows to 8-10' tall. Zone: 7-9

3 gallon ... \$26 SH1

Rhododendron austrinum X *Gibraltar* 'Tiger' | azalea

'Tiger' is a wonderful selection made by the folks at Auburn University. It is an *austrinum* X *Gibraltar* hybrid with orange ruffles and yellow accents that happens to be mildew resistant and heat tolerant. Like other native hybrids, it blooms in spring, and appreciates partial shade in moist well drained soil. Grows 6-10' tall and 3-5' wide. Zone: 5-8

Rhododendron canescens | mountain azalea

3 gallon ... \$28 SH1

Large deciduous shrub featuring clusters of fragrant, funnel-shaped, pink to white flowers in early spring as the foliage begins to emerge. Pistil and stamens of each flower protrude well beyond the corolla in an upward arch. Flowers give way to woody, 1/2' long capsules. Adds a splash of color when planted among evergreens. Will also do well under high trees. Grows to 6-15' tall and 6-12' wide. Zone: 5-9

Rhododendron canescens 'Dwarf' | mountain azalea

3 gallon ... \$34 SH1

Deciduous shrub featuring clusters of fragrant, funnel-shaped, pink to white flowers in early spring as the foliage begins to emerge. Pistil and stamens of each flower protrude well beyond the corolla in an upward arch. Flowers give way to woody, 1/2' long capsules. This selection a smaller form of the species. Zone: 5-9

Rhododendron canescens 'Varnadoe's Phlox Pink' | mountain azalea

3 gallon ... \$38 SH1

A beautiful azalea that starts blooming at a very young age, 'Varnadoe's Phlox Pink' is a time tested, heat and humidity tolerant native azalea that produces full trusses of large, fragrant, bright to light pink flower buds that open to soft pink to white honeysuckle-like trumpet flowers that light up and fill the garden with a wonderful, spicy aroma. Plant this one near windows or close to patios, decks and other outdoor living spaces where the beautiful flowers and fragrance can be enjoyed. Grows 10-12' tall and wide. Zone: 6-9

Rhododendron flammeum 'Chinchulla' | Oconee azalea

3 gallon ... \$34 SH1

An upright, rounded, medium-sized, deciduous azalea primarily being found in woodland areas, dry slopes, and stream bluffs. Funnel-shaped flowers with showy stamens to 2" long bloom in mid-April as the leaves first begin to emerge. 'Chinchulla' is a red flowering selection. Grows 6-8' tall. Zone: 6-7

Rhododendron indicum 'Formosa' | Southern indica azalea

3 gallon ... \$24 SH1

A classic of the Southern landscape featuring single 3" purple/lavender blooms with a deeper blotch in spring against bright green foliage. Has a large upright habit, and strong sun and heat tolerance. Grow in rich, acidic well-drained soil and water regularly. The shallow, non-aggressive root system makes them a great foundation planting choice and can even be used as a colorful hedge. Grows 6-8' tall and 4-6' wide. Zone: 8-10

Rhododendron indicum 'George L. Tabor' | Southern indica azalea

3 gallon ... \$24 SH1

A Southern Indica variety of evergreen azalea with masses of showy, single, light orchid blooms with white variegation. A beautiful shrub for a hedge, screen or mass plantings. Provide well-drained, humus rich, acid pH soil. Keep roots cool with a thick layer of mulch. Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. Feed with an acid fertilizer after bloom. Prune after flowering. Grows 6-8' tall and 4-6' wide. Zone: 8-10

Rhododendron indicum 'Mrs. G.G. Gerbing' | Southern indica azalea

3 gallon ... \$22 SH1

This time-honored variety is the standard for white Satsuki azaleas. Blooms early and abundantly in medium, single pure white flowers. Dense foliage on dense spreading shrub produces a versatile landscape candidate. Ideal for urban landscapes. A natural in Asian-inspired gardens. Grows 6-8' tall and 4-6' wide. Zone: 7-9

Rhododendron x 'Admiral Semmes' | Confederate Series azalea 3 gallon... \$34 SH1

Indeed a beauty! *Rhododendron* 'Admiral Semmes' never fails to showcase its sweet-scented dazzling yellow flowers that emerge in spring. Dark green leaves are shimmering in summer and changing orange-bronze in fall. The amazing azalea attracts hummingbirds, butterflies and other nectar loving insects. It flourishes well in heat and humidity in rich, moist but well-drained soil. Grows 6-10' tall and 4-6' wide. Zone: 5-9

Rhododendron x 'Colonel Mosby' | Confederate Series azalea 3 gallon... \$34 SH1

'Colonel Mosby' is an upright deciduous azalea that is part of the Confederate General Series. The large bright pink to salmon flowers with a yellow flag that have a spicy fragrant and blooms in early to mid spring. Best grown in part sun and rich, moist, acidic well-drained soils. Improved heat and humidity tolerance, and mildew resistant. Grows 6-8' tall and 5-6' wide. Zone: 5-9

Rhododendron x 'Stonewall Jackson' | Confederate Series azalea 3 gallon... \$34 SH1

One in the Confederate Series that was bred for superior heat and humidity tolerance but will also handle temps down to -20 degrees F, 'Stonewall Jackson' is a hybrid deciduous azalea that produces super-abundant large clusters of spectacular fragrant golden-orange flowers with tints of red and pink on the petals. The flowers are similar in color to the Flame Azalea and just as profuse. A taller grower to 10 feet, lower branches can be removed to form a highly attractive small tree. Grows 6-10' tall and 6-8' wide. Zone: 5-9

Rhododendron x 'Pink Ruffles' | Rutherfordiana hybrid azalea 3 gallon... \$28 SH1

'Pink Ruffle' azalea is a very attractive mid-sized azalea shrub with beautiful medium green evergreen foliage, and a huge explosion of 3" diameter light pink colored blooms. Blooms are superb throughout the spring, but 'Pink Ruffle' is also well known to re-bloom again (though not as heavily) again in the fall. Very formal, elegant looking blooms. Newer foliage growth is very bright green, and matures into a slightly darker shade of green. Grows 2-4' tall and wide. Zone: 7-10

Rhododendron x 'Red Ruffles' | Rutherfordiana hybrid azalea 3 gallon... \$30 SH1

Produces masses of showy, deep cerise, single to semi-double blooms with frilly petals. A beautiful evergreen shrub for use as a low hedge or screen for an impressive color display. Best in dappled shade in hot summer areas but can tolerate sun to part sun in cooler climates. Also makes a colorful container planting. Grows 3-4' tall and wide. Zone: 7-9

Rhododendron x 'Wakaebisu' | Satsuki hybrid azalea 3 gallon... \$28 SH1

A spectacular Satsuki hybrid azalea, 'Wakaebisu' has everything. In mid to late spring and reblooming in late summer well into fall, it features loads of large 2.5 to 3 inch salmon-pink flowers with a blotch of purple-red freckles on the dorsal petal. Handsome, finely textured evergreen foliage is bright to medium green through the warm seasons turning attractive bronze shades through the winter months. Butterflies and hummingbirds love the flowers, and blooming branches serve very well for cutting to create stunning indoor floral arrangements. A fine accent in small garden spaces or grouped or as a natural low hedge where space allows. Also an excellent candidate for bonsai! Grows 2-3' tall and 3-4' wide. Zone: 6-9

Bignonia capreolata | crossvine

A show-stopping native, cross vine is a fast growing, self-clinging, woody vine with a profusion of fragrant, trumpet shaped flowers in bright shades of orange, yellow or red. It is practically smothered in large clusters of colorful blossoms in mid-spring. Hummingbirds love them! Grows 35-50' high and 6-9' wide. Zone: 5-9

1 gallon... \$10 SEC G

*Clematis* 'Ernest Markham' | clematis

A memorable sight when in bloom! A deciduous vine that gets covered with a profusion of large 4-6" vivid magenta flowers with blunt-tipped velvety petals and chocolate anthers. A gardener's favorite since its introduction in 1926! Clematis prefer to have their "heads in the sun and feet in the shade." This clematis flowers in late summer on growth made in that season. They should be pruned in late winter or early spring and require 'hard pruning' – simply cut the stems to a pair of strong buds about 12" above ground level before growth begins in early spring. Grows 10-12' high and 2-3' wide. Zone: 4-11

1 gallon... \$20 SEC G

*Clematis* 'Henryi' | clematis

Regarded as one of the biggest white clematis. A vigorous deciduous climber with huge, luminous, pure white flowers (6-8" across) adorned with chocolate brown anthers. Flowering comes in two waves – first in late spring to early summer, then from mid-summer to early fall. Excellent when grown into large shrubs needing summer interest. Grows 6-8' high and 3-6' wide. Zone: 4-8

1 gallon... \$20 SEC G

*Gelsemium sempervirens* | Carolina jessamine

A showy evergreen vine with glossy fine-textured foliage. Native to the southeastern United States and Central America. The large yellow flowers in early spring are fragrant and eye-catching from a distance. This selection is reportedly more cold-tolerant than the species. Also tolerant of drought, heat, humidity and poor soil. Deer resistant. Vines to 18' tall and 12' wide.

1 gallon... \$10 SEC G

*Isotrema tomentosum* (*Aristolochia tomentosa*) | woolly Dutchman's pipe

A native, woody, deciduous, twining vine. Features large, heart-shaped, hairy, deep green, overlapping leaves (4-8"). Unusual yellowish-green, trumpet flowers in mid spring. Ribbed, tubular seed capsules (3"). Prune in late winter. Prefers rich, moist soils (intolerant of dry soils). Larval plant for the pipevine swallowtail. Grows 20-30' high and 5-10' wide. Zone: 5-8

1 gallon... \$10 SEC G

*Lonicera sempervirens* 'Sulphurea' | trumpet honeysuckle

A yellow-flowered variety of our native vine that was found in 1991 in woodlands on the grounds of a 17th century church in Gloucester, Virginia. It is noted for its compact growth habit, yellow flowers in May and June, tendency to re-bloom and profuse fall berry production. This is a twining vine that needs a support structure. Prune as needed immediately after flowering. Easily grown in average, medium moisture, well-drained soils. Vines 4-9' long and 3-5' spread. Zone: 4-9

Plant Growth Enhancer

Based on years of research by renowned horticulturalist, Dr. T.L. Senn, this remarkable plant growth enhancer, a combination of Norwegian seaweed and humate enhances root development & plant absorption, increases leaf chlorophyll levels, accelerates & improves seed, reduces plant stress caused by drought, transplanting, flowering or other forces of nature or man, remarkably increases plants' resistance to frost damage and is environmentally friendly. ****NOT A FERTILIZER****

- 50 lb granular \$40
- 1 quart concentrate \$20
- 1 gallon concentrate \$90
- 2.5 gallon concentrate \$160

Potting Soil

Your potted plants deserve the best. Their roots can't seek out nutrition in the ground, so you have to bring it to them. That's why Happy Frog Potting Soil is amended with soil microbes that can help improve root efficiency and encourage nutrient uptake. Between the earthworm castings, bat guano, and aged forest products, your container plants have never felt so good.

- 2 cu.ft. bag \$26

Soil Conditioner

Don't treat your soil like dirt! Bring home some Happy Frog Soil Conditioner, and your plants will thank you. In every bag of Happy Frog Soil Conditioner you'll find finely-screened aged forest products, earthworm castings, and bat guano, not to mention soil microbes to help increase root efficiency and encourage nutrient uptake. Humic acid is also added, which may increase the uptake of important micronutrients.

- 1.5 cu.ft. bag \$20
