Overview: Online Masters for Science Educators

Program webpage: BIOL Online

The Department of Biological Sciences is pleased to offer an online, non-thesis Master of Biological Sciences for science educators interested in biological sciences. Our students include teachers at all levels, as well as scientists from museums, field stations and research laboratories. This program is fully in a distance-learning format and lectures are available 24/7.

We offer two academic paths to accommodate your needs: one for advanced students not seeking additional degrees, and one for students wishing to attain a non-thesis Masters in Biological Sciences degree.

Advanced Student Status (non-degree-seeking): Admission to the non-degree category is restricted primarily to those who may benefit professionally from additional study at the graduate level. For example, current primary, middle grades and secondary education teachers wishing to gain recertification most commonly apply as non-degree-seeking students. Regardless of the student’s reason for applying non-degree, in all cases the non-degree student must receive permission from the program coordinator or the department chair before enrolling in any graduate course. Please note that if you have been previously enrolled at Clemson anytime in the past six years as a non-degree student in the same area you wish to apply to, then you do NOT need to complete this application. Rather, please complete the Graduate Application for Re-Entrance.

Non-degree-seeking students may complete courses in our program curriculum before applying as a degree-seeking student. Students who have taken courses from our program curriculum before their admission to the graduate program may transfer 9 credits of those courses into the non-thesis degree program.

Please note that the tuition rate is higher for Advanced Student Status students (see Finances.) Non-degree-seeking students may benefit financially by applying to the degree-seeking program even though they do not intend to complete the program.

Non-Thesis Masters for Science Educators in Biological Sciences (degree-seeking students): This option requires a total of 30 semester hours of graduate course work. At least 18 of the 30 hours must be at the 800 level. Degree-seeking students may transfer up to 9 credits of graduate courses into the degree program from accredited degree-granting institutions whose scholastic reputation is acceptable to Clemson University. To transfer, the graduate course content must be similar to one of our required courses with a grade of B or above. Transfer credits must not have been used to satisfy the requirements for any other degree and must have been completed within the six-year period preceding the date the graduate degree will be awarded. Transfer courses cannot be revalidated for graduate credit. The program coordinator must approve all transfer courses. There are no exceptions to this requirement.

A research proposal and project whose results are presented in written format is also a requirement of the non-thesis Master’s degree. The scope of the research project is not as extensive as the regular master’s thesis degree option. However, it is expected that a non-
thesis student will conduct original scientific research (one semester of data collection during BIOL 8480) and write a research report (BIOL 8490) that is of the caliber of a manuscript suitable for submission to a peer-reviewed journal. The student and student’s graduate committee will determine the research project. For example, teachers may choose a research project that involves using their students to collect and analyze data.

**Accreditation:** Clemson University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award the bachelor’s, master’s, educational specialist and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia, 30033-4097 or call 404-679-4500 for questions about the status of Clemson University.

**State Authorization Reciprocity Agreement:** South Carolina is a member of the State Authorization Reciprocity Agreement (SARA) and Clemson University is an approved SARA institution, which means we adhere to established standards for offering post-secondary e-learning programs in all member states. Please review our state authorizations to see if this program is offered in your state and our process for student complaints against the university.

**Information about licensure/ teacher certification:** Our non-thesis Master of Biological Sciences is designed specifically for in-service teachers and other science educators who want to improve their science-content knowledge in biological sciences. It is intended for individuals who (a) already have the required licensure, or (b) who do not want or need teaching certification or licensure. There is currently no option to obtain licensure or certification through this program. Potential applicants should ensure this program meets their personal and/or professional goals prior to applying.

**Admission Requirements**

All students must be admitted to CU’s Graduate School as a degree or non-degree seeking student. The Program Name is Bio Science - Non-thesis for Science Educators and the Program Code is MS-BIOS-G-AAC for degree seeking students and ND-SCI-G code for non-degree seeking students. Students do not need an undergraduate degree in biology to be considered for admission. An overall undergraduate GPA of at least 2.75 is recommended by the Graduate School. GRE scores are not required for teachers with 1 or more years teaching experience.

**Steps to Admission for the online MS in Biological Sciences**

1. Application to the graduate school is online at the [Graduate School webpage](#). Apply to our college (College of Science) as a degree- (the program code is MS-BIOS-1-AAC) or non-degree-seeking student. Please note that the tuition rate is higher for non-degree seeking students.

2. Depending on their decision, the Graduate School may send an email asking if you accept their offer. You must click and accept!

3. Once accepted, you will need to [contact Clemson Computing and Information Technology](#) — CCIT — to set up a Clemson University user ID and email, as all correspondence will go through your Clemson account. Make sure to check for Graduate School emails as they may have additional requirements and payment reminders.
Advanced Student Status (non-degree-seeking) — This status is designed for applicants who are not immediately interested in seeking a degree, but who wish to enroll in graduate-level courses. No letters of recommendation are required of those seeking Advanced Student Status. If you are interested in applying for this status, you must hold a baccalaureate degree from a regionally accredited institution. Students do not need an undergraduate degree in biology to be considered for admission. Apply under the ND-AFLN-1 code. There is a $60 nonrefundable application fee for non-degree seeking students.

Should you decide to pursue a degree, you will need to submit a new, degree-seeking application and be accepted into the program. There is a required $80 application fee for domestic applicants and a $90 fee for international applicants. Fees are nonrefundable.

Up to 12 credits from your non-degree studies may apply toward your degree, pending department approval.

Degree-seeking students wishing to pursue a graduate degree at Clemson University should apply for admission using the degree-seeking application for admission. This includes all applicants seeking a master’s doctoral or any professional degree. In general, degree-seeking applications should be received no later than five weeks prior to the first day of class.

Admission to the graduate program requires a suitable undergraduate education, two letters of recommendation, a resume and suitable GRE scores (GRE scores are not required for teachers with one or more years of teaching experience). Students do not need an undergraduate degree in biology to be considered for admission. An overall undergraduate GPA of at least 2.75 is recommended. A satisfactory TOEFL score (550 from paper exam, or 213 from online exam, or 80 from internet exam, or 6.5 or higher on the IELTS test) is required for international students whose native language is not English. There is a required $80 nonrefundable application fee for domestic applicants and a $90 fee for international applicants. Apply for Non-Thesis for Science Educators — Bio Science, code MS-BIOS-1-AAC.

Transfer courses — Degree and non-degree seeking student may transfer up to 9 credits of graduate courses into the degree program. To transfer, the graduate course content must be similar to one of our required courses with a grade of B or above. Transfer credits must not have been used to satisfy the requirements for any other degree and must have been completed within the six-year period preceding the date the graduate degree will be awarded.

All credits transferred to Clemson’s graduate programs must have been completed at a regionally-accredited institution and must be verified by submission of an official transcript. You must then have an official transcript sent from the institution(s) where credit was earned to the Office of Enrolled Student Services, 104D Sikes Hall. Only when courses have been verified by Enrolled Services to meet all Graduate School requirements will they be approved for application toward the degree.

Grades earned for courses taken at institutions other than Clemson University will not be included in the student’s grade point ratio.
Requirements for Degree

The Program Curriculum consists of 10 courses. Seven of the ten required courses are science content courses. The other three courses cover how to design an experiment and statistically analyze data, how to write publications and grant proposals, and how to conduct research, respectively. Lectures and assignments are available via Clemson’s online student information platform, Canvas, and are available 24/7. A brief description of required courses (3 credit hours each) is as follows:

**BIOL 8400 Understanding Biological Inquiry** – This online course is designed for teachers and those who want to understand the methods and approaches to biological inquiry. It provides a broad background into the scientific methods utilized in the biological sciences and the application of inquiry-based teaching methods in the classroom.

**BIOL 8410 Understanding Ecology and Ecosystems** – This online course is designed for teachers and for those who want to understand ecological interactions and systems. It provides a broad background in ecology that includes populations, habitats, communities, trophic interactions, and ecosystems. It provides a foundation for understanding interactions between organisms and their environments.

**BIOL 8420 Understanding Cellular Processes** – This online course is designed for teachers and for those who want to increase their knowledge about cell biology. Students will study how and where intracellular and extracellular molecules control cellular functions such as gene expression, secretion, motility, signaling, cell-cycle control, and differentiation.

**BIOL 8430 Understanding Genetics and Evolutionary Biology** – This online course is for teachers who want to increase their content knowledge in the areas of genetics and evolution. The course will focus on Mendelian genetics, molecular genetics, gene expression and regulation, population genetics, forces of evolutionary change, and the role of evolutionary change in the origin of new species and the diversity of life.

**BIOL 8440 Understanding the Human Body** – This online course is designed for teachers and for those who want to increase their content knowledge about the anatomy and physiology of the 11 organ systems in humans. Studies will include food processing and nutrient allocation, circulation and respiration, excretion, communication via hormones and nervous transmission, reproduction, behavior, locomotion and support.

**BIOL 8450 Understanding Animal Biology** – This online course is designed for teachers and for those who want to increase their content knowledge about the taxonomy, morphology, adaptations, and evolution of vertebrates.

**BIOL 8460 Understanding Plant Biology** – This online course is designed for teachers who want to increase their content knowledge about plants and includes the study of plants from bryophytes to angiosperms, including growth, photosynthesis, nutrition, reproduction, ecology, and evolution.

**BIOL 8470 Understanding Microbiology** – This online course is designed for teachers and for those who want to increase their knowledge about microorganisms. Topics include prokaryotic cell structure and function, microbial growth and growth control, food microbiology, bacterial genetics, immunology, virology, microbial diseases, and epidemiology. Laboratory concepts will be emphasized.

**BIOL 8480 Understanding Scientific Research** – Research problems for teachers in selected
areas of biological sciences to provide an introduction to research planning and techniques. Teachers will undertake either an instructor approved, individual project or participate in a group creative inquiry project involving their classroom during the academic year. Both are assisted by and under the supervision of the instructor. Instructor note: BIOSC 8400 Understanding Biological Inquiry is recommended before enrolling in BIOL 8480 because BIOL 8400 covers experimental design and data analyses.

BIOL 8490 Understanding Scientific Communication – This online graduate course will help teachers develop their ability to write grant proposals, scientific manuscripts, and conference presentations on biological topics, and to communicate about biological issues with public audiences.

Under most circumstances, students are limited to only two courses each semester with the exception of BIOL 8480, which may be taken at any time. However, BIOL 8400 Understanding Biological Inquiry (Fall semester) is recommended, not required, before enrolling in BIOL 8480. Our program can be completed in 6 semesters; however, a master's student has six years (18 semesters) to complete the program

**Fall Semester**
- BIOL 8400 Understanding Biological Inquiry
- BIOL 8420 Understanding Cellular Processes
- BIOL 8440 Understanding the Human Body
- BIOL 8460 Understanding Plant Biology
- BIOL 8480 Understanding Scientific Research

**Spring Semester**
- BIOL 8430 Understanding Genetics and Evolutionary Biology
- BIOL 8450 Understanding Vertebrate Biology
- BIOL 8470 Understanding Microbiology
- BIOL 8480 Understanding Scientific Research

**Summer Semester**
- BIOL 8400 Understanding Biological Inquiry
- BIOL 8410 Understanding Ecology and the Environment
- BIOL 8490 Understanding Scientific Communication
- BIOL 8480 Understanding Scientific Research
New Student Information

Program webpage: BIOL Online

Academic Calendar

Program Curriculum: The curriculum consists of 10 required courses. Seven of the ten required courses are biology-content courses. The other three courses cover how to design an experiment and statistically analyze data, how to write publications and grant proposals, and how to conduct research, respectively. Lectures and assignments are available via Clemson's online student information platform, Canvas, and are available 24/7.

Course Schedule: Our ten courses are offered on a fixed schedule because of instructor availability. Typically, students are limited to only two courses each fall, spring, and summer semesters with the exception of BIOL 8480, which may be taken at any time. However, BIOL 8400 Understanding Biological Inquiry and BIOL 8490 Understanding Scientific Communication are recommended before enrolling in BIOL 8480. Our program can be completed in 6 semesters (2 years); however, a master's student has six years to complete this degree.

Fall Semester
BIOL 8400 Understanding Biological Inquiry
BIOL 8420 Understanding Cellular Processes
BIOL 8440 Understanding the Human Body
BIOL 8460 Understanding Plant Biology
BIOL 8480 Understanding Scientific Research

Spring Semester
BIOL 8430 Understanding Genetics and Evolutionary Biology
BIOL 8450 Understanding Animal Biology
BIOL 8470 Understanding Microbiology
BIOL 8480 Understanding Scientific Research
BIOL 8490 Understanding Scientific Communication

Summer Semester
BIOL 8400 Understanding Biological Inquiry
BIOL 8410 Understanding Ecology and the Environment
BIOL 8450 Understanding Animal Biology
BIOL 8490 Understanding Scientific Communication
BIOL 8480 Understanding Scientific Research

BIOL 8710: The only other course we offer is for students whose financial aid requires 5 or 6-credit hours minimum and they have only one required course to take during a semester. BIOL 8710 Special Topics in Biology is offered for 2 or 3 credit hours. The course requires a research paper on recent advances in biology. You would pick your topic and have it approved by the course instructor. The final paper has a 2500 (2 credit) or 3500 (3 credit) word minimum (not including cover page or references) and should demonstrate a thorough understanding of a particular topic. The paper must be 90% or above original. You should be prepared to review a
minimum of 8 relevant references that relate specifically to your topic. We will give you a Guide for Citing Resources and the assessment rubric for the paper. You would have to pay tuition for the 2- or 3- credit hours. This course does not replace a course listed on your GS2.

Courses per Semester: Most of our students have other responsibilities, which dictates how many courses they take each semester. Many enroll in one class, others enroll in two classes, and some do a combination of one or two classes per semester. Students may, after they understand the workload, enroll in three classes. Each course runs for a full semester (15 weeks). The anticipated course load for each 3-hour course is approximately 9 hours per week, which includes ~3 hours at lecture, ~3 hours assigned reading, and ~3 hours study/assignments.

Registering for Courses: Registration for Summer 2022 begins on April 11th. We use iROAR to register for classes. After you decide which course or courses you will take this fall semester, please do the following:

Go to iROAR
Click Student Registration Services
Click Register for Classes
Select Fall 2022
Enter your CU ID# and Password
Click Continue
Click Find Classes
Enter Subject and Course Number, for example, BIOL 8450
Click Add Class
Click Submit

**You are NOT registered for a class by clicking add. You have to click the submit button under your class summary to be registered. This is located in the bottom right of the page. Your schedule is Saved when you click Submit
Click Find Classes if you plan to take more than one course.

Paying Your Bill: https://www.clemson.edu/finance/student-financials/billing.html

- Student bills are available exclusively online through iROAR. Students can login using their userid and password. Authorized users can also access the student bill using their unique userid and password. The online bill reflects the student’s current registration and billing information. Because the bill is real-time, students can verify that all fees are satisfied before the payment deadlines.
- If you cannot access your bill online, please call 864-656-5592 or email us at studentbillquestions@clemson.edu.
- If your fees change for any reason after your initial payment is made (i.e. housing adjustment, meal plan addition, change in schedule, etc.), it is the student’s responsibility to ensure prompt payment of the balance is made. Login to iROAR to view your current charges and payment status.
- A $150 late reinstatement fee is charged for paying and/or registering after the published dates. The late registration fee is non-refundable.

Payment Deadline
Please check Payment Due Date at [https://www.clemson.edu/finance/student-financials/billing.html](https://www.clemson.edu/finance/student-financials/billing.html). If you add a course after the due date, payment must be made immediately.

**Information about financial assistance** is at [http://www.clemson.edu/graduate/finance-tuition/loans.html](http://www.clemson.edu/graduate/finance-tuition/loans.html) (If this link is not active, please paste the URL into your web browser)

**Transfer courses** — Degree and non-degree seeking student may transfer up to 9 credits of graduate courses into the degree program. To transfer, the graduate course content must be similar to one of our required courses with a grade of B or above. Transfer credits must not have been used to satisfy the requirements for any other degree and must have been completed within the six-year period preceding the date the graduate degree will be awarded.

All credits transferred to Clemson’s graduate programs must have been completed at a regionally-accredited institution and must be verified by submission of an official transcript. You must then have an official transcript sent from the institution(s) where credit was earned to the Office of Enrolled Student Services, 104D Sikes Hall. Only when courses have been verified by Enrolled Services to meet all Graduate School requirements will they be approved for application toward the degree.

Grades earned for courses taken at institutions other than Clemson University will not be included in the student’s grade point ratio.

**Plan of Study (GS2) — Plan of Study Information**

Degree-seeking master’s students must submit the GS2 by the middle of their second semester. The GS2 is online and accessible through iROAR. Submitting a GS2 is a 2-step process that includes (A) Committee Selection and (B) Plan of Study.

Non-thesis MS degrees do NOT require a committee: however, they do require a faculty advisor. The faculty advisor for the online M.S. degree in Biological Sciences (MS-BIOS-G-AAC) is Dr. Robert Ballard, C88357337. Once Dr. Ballard is selected, click the submit button to trigger the approval process. *You will receive an email when the process has been completed. DO NOT submit a Plan of Study until your faculty advisor is approved.*
Leave of absence: A student in good academic standing (minimum 3.0 GPA and has successfully met other program or Graduate School requirements) who must interrupt a graduate program may request a leave of absence from graduate study. A leave of absence may be granted for up to 12 months, with a possible renewal of up to one additional 12-month period.

Formally notify the program and the Graduate School of your intended leave by completing the online form GS-LoA Request for Leave of Absence. After you complete this form, forward it electronically to secure the necessary signatures from your graduate program advisor or coordinator. Please refer to the Graduate School's policies and procedures pertaining to Leave of Absence, Continuous Enrollment, and Readmission in the Graduate School Policies & Procedures Handbook.

Graduation Checklist: Checklist

Graduation Deadlines These deadlines are University and Graduate School deadlines.

Legal Presence: This law applies to all students and faculty (US citizens, permanent residents, and international visitors). It applies to all institutions in South Carolina. In accordance with section 59-101-430 of the SC Code of Laws, also known as the South Carolina Illegal Immigration Reform Act, those unlawfully present in the United States are prohibited from attending a public institution of higher education in South Carolina. Those unlawfully present in the United States are also prohibited from receiving a public higher education benefit including scholarships, financial aid, grants or resident tuition.

What documents will be accepted as proof of U.S. citizenship?
- SC driver's license if you were born after January 1, 1987
- U.S. Passport
- U.S. or U.S. Territory Birth Certificate
- Certificate of Naturalization
- U.S. Government Issued Consular Report of Birth Abroad
- Certificate of Citizenship
- Social Security Approval via Federal Application for Student Financial Aid (FAFSA)

Legal Presence FAQ – I am taking all coursework online and will not be in South Carolina before I need to register for the subsequent term. What can I do?

You may e-mail a scanned copy of one of the approved documents above to Registration Services.

Continuous enrollment: As a graduate student enrolled in a degree program, you are required to maintain continuous enrollment after initial matriculation (i.e., you must register each fall and spring semester until you either have graduated, have permanently withdrawn, or have been dismissed). If you are enrolled in the spring and fall semesters, you are not required to register during the summer. Registration in a zero-credit internship or similar course satisfies this requirement. Registering to audit a course does not meet this requirement.

The Graduate School may dismiss any student who fails to comply with the continuous enrollment policy. If you are terminated from your program for failure to maintain continuous enrollment, you will be required to reapply for admission (see Leave of Absence below).
Readmission requires a positive recommendation from your academic program as well as approval by the Graduate School and, therefore, is not guaranteed.

**Canvas** – [Canvas](#)
Canvas is the course management system used to share documents, submit assignments, and assign grades for individual students.

**Accreditation:** Clemson University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award the bachelor's, master's, educational specialist and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the status of Clemson University.

**State Authorization Reciprocity Agreement:** South Carolina is a member of the State Authorization Reciprocity Agreement (SARA) and Clemson University (CU) is an approved SARA institution, which means we adhere to established standards for offering post-secondary e-learning programs in all member states. Please review our state authorizations to see if this program is offered in your state and our process for student complaints against the university.

**Information about licensure/teacher certification:** Our non-thesis Master of Biological Sciences is designed specifically for in-service teachers and other science educators who want to improve their science-content knowledge in biological sciences. It is intended for individuals who (a) already have the required licensure, or (b) who do not want or need teaching certification or licensure. There is currently no option to obtain licensure or certification through this program. Potential applicants should ensure this program meets their personal and/or professional goals prior to applying.
