

Senior Director of Development for Student Affairs Brandy Page

Brandy Page is in her sixth year as a member of Clemson University's development team in 2018–19. She works intensely with Vice President Almeda Jacks and spearheads fundraising efforts within the Division of Student Affairs. Page oversees a team that includes development officers Meagan Conley, Paul Brammer and Bailey Griffin, donor relations manager Hannah Smith and administrative coordinator Hali Sullivan.

Page and her team are coming off the most successful fundraising cycle for Student Affairs to date. In fiscal year 2018, the group raised \$4.5 million toward capital projects, leadership initiatives and unrestricted purposes. The total nearly doubled the previous fundraising record.

Clemson has made great progress in regard to capital projects during Page's time focusing on Student Affairs. The Barnes Center opened in early 2017 as a late-night programming destination following a major gift from the family of Frank Barnes Jr., a 1938 Clemson graduate. Page has helped secure two pillar society contributions and over \$5 million in private gifts for the Samuel J. Cadden Chapel, a facility slated to be constructed in close proximity to the Brooks Center for the Performing Arts. Page and her team have also been significantly involved in fundraising for the Snow Family Outdoor Fitness and Wellness Center. Construction for the second phase will begin in 2018–19 on an Outdoor Recreation Center and 140,000 square foot intramural field, adding to a property that already includes the LoConte Family field.

Prior to her time with Student Affairs, Page was associate director of development from 2010–13. She worked directly with the College of Engineering, Computing and Applied Sciences to raise funds.

Page previously held positions as the director of corporate relations with the American Heart Association (2007–09) and income manager for the American Cancer Society (2006–07).

Page graduated from Evans High School in Augusta, Georgia and earned a bachelor's degree in speech communication from the University of Georgia in 2005. Her husband, Ryan, earned a civil engineering degree from Clemson in 2006. The couple has a son, McClain.
