BIOCH 490 (1-4, 0) Selected Topics in Biochemistry

Comprehensive study of selected topics in biochemistry not covered in other courses. Methods of instruction include paper discussion and orientation in genetic research. May be repeated for a maximum of eight credits, but only if different topics are covered.

Objective: To broaden students' knowledge and enhance their experience in the field of biochemistry by covering selected topics that are not covered in other courses.

Topical Outline: variable topics, topical outline depends on the instructors and the method of instruction.

Evaluation: depending on the method of instruction. Written (essays, lab reports, etc.) and /or oral presentations, quizzes, attendance, and participation will be counted for the final grade.

Subject: 490 students course and lab

Students that had been previously added by me to your sections of 490 will need to re send me their ID numbers so I can add them back into the courses. If they haven't noticed yet - they have been dropped. We need to make some changes to the curriculum so this doesn't happen again next year. But for now I can put them back in with out the lab.

Thanks, Sheryl

Subject: RE: Schedule Request Form

Hi.

I have changed the method of instruction for these courses to be lecture only for this semester since these courses were approved as a variable distribution course in 2004. Have Cindy to add the students back to the lecture and they won't be dropped again for not having the lab. Would you ask Dr. Murphy again to submit a change to the curriculum committee to change these courses permanently to lecture only. Creating a course as variable distribution is no longer allowed and our office is slowly trying to eliminate all variable distribution courses. They are difficult for departments and our office to maintain and almost always are offered as lecture only causing the problems you have mentioned below.

Thanks and have a good day.
